8. MAINTENANCE

To ensure the longevity and optimal performance of your KAIY Bluetooth Receiver, please follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the device. Do not use liquid cleaners or aerosol sprays.
- **Power Supply:** Always ensure the device is powered via the provided Type-C cable and a compatible 5V/2A USB power adapter. Do not attempt to use the device without proper power.
- **Placement:** Place the receiver on a stable, flat surface away from direct sunlight, heat sources, and excessive moisture. Ensure adequate ventilation.
- **Handling:** Handle the device with care. Avoid dropping or subjecting it to strong impacts.
- **Storage:** If storing the device for an extended period, disconnect it from power and store it in a cool, dry place.
- **Compatibility:** Use with compatible wired speakers and amplifiers only.

9. TROUBLESHOOTING

If you encounter any issues while using your KAIY Bluetooth Receiver, please refer to the following common problems and solutions:

- **No Power:**
 - Ensure the Type-C power cable is securely connected to both the receiver and a working 5V/2A USB power adapter.
 - Verify the power outlet or USB port is functional.
- **Cannot Pair via Bluetooth:**
 - Make sure the receiver is in Bluetooth mode (check the LCD display).
 - Ensure Bluetooth is enabled on your source device (smartphone, tablet).
 - Move your source device closer to the receiver (within 33 feet).
 - Clear the Bluetooth pairing list on your source device and try pairing again.
 - Restart both the receiver and your source device.
- **No Sound Output:**
 - Check if the correct audio cable (RCA, Optical, or 3.5mm AUX) is securely connected between the receiver and your

audio system.

- Ensure your audio system (stereo, speakers) is turned on and set to the correct input source corresponding to the receiver's connection.
- Adjust the volume on both the receiver and your audio system.
- If using USB playback, ensure the USB drive contains compatible audio files and is properly inserted.

• **Sound Quality Issues (Distortion, Static):**

- Ensure the receiver is not too close to other electronic devices that may cause interference.
- Check the audio cables for any damage or loose connections.
- Reduce the distance between the source device and the receiver.
