Fodsports Clip

Fodsports FX8 Bluetooth Intercom Mounting Clip Instruction Manual

1. INTRODUCTION

This manual provides instructions for the proper installation and use of the Fodsports FX8 Bluetooth Intercom Mounting Clip. This accessory is designed to securely attach your Fodsports FX8 Bluetooth intercom unit to various types of helmets, ensuring stable communication during your rides. Please read these instructions carefully before installation.

2. PACKAGE CONTENTS

Verify that all components are present in your package:

- Fodsports FX8 Mounting Bracket
- Iron Clip
- 3M Double-Sided Adhesive (optional attachment)

3. SETUP AND INSTALLATION

The Fodsports FX8 mounting bracket offers two primary methods for attachment to your helmet: using the iron clip or the 3M double-sided adhesive.

3.1 Using the Iron Clip

1. **Prepare the Bracket:** Ensure the mounting bracket is clean and free of debris.
2. **Attach Iron Clip:** Slide the iron clip into the designated slot on the mounting bracket until it clicks securely into place.
3. **Position on Helmet:** Carefully slide the assembled bracket and clip onto the edge of your helmet, typically on the left side. Ensure the clip firmly grips the helmet shell without obstructing any moving parts or ventilation.
4. **Secure Intercom Unit:** Once the bracket is securely attached, slide your Fodsports FX8 Bluetooth intercom unit onto the mounting bracket until it locks.

Image 3.1: A detailed view of the Fodsports FX8 mounting clip, showing the attachment mechanism and connection points for the intercom unit.

3.2 Using 3M Double-Sided Adhesive (Optional)

This method is an alternative if the iron clip is not suitable for your helmet type or preferred attachment.

1. **Clean Helmet Surface:** Thoroughly clean and dry the desired attachment area on your helmet. Ensure it is smooth and free of wax or oils.
2. **Apply Adhesive:** Peel the protective backing from the 3M double-sided adhesive and firmly press it onto the back of the mounting bracket.
3. **Attach to Helmet:** Remove the remaining protective backing from the adhesive and press the bracket firmly onto the cleaned helmet surface. Hold for at least 30 seconds to ensure strong adhesion. Allow sufficient curing time (typically 24 hours) before attaching the intercom unit or riding.
4. **Secure Intercom Unit:** After the adhesive has cured, slide your Fodsports FX8 Bluetooth intercom unit onto the mounting bracket until it locks.

Important Note:

- This mounting bracket is specifically designed for the **New Version FX8 Bluetooth intercom**. It is not compatible with older versions of the FX8 or other intercom models.
- Do not attempt to use mounting brackets from different versions or models interchangeably.

4. OPERATION

The mounting clip serves as a secure base for your Fodsports FX8 Bluetooth intercom. Once the intercom unit is attached to the clip, its operation (powering on/off, pairing, communication) is managed directly through the intercom unit itself, as detailed in the Fodsports FX8 intercom's main instruction manual.

Ensure the intercom unit is fully seated and locked into the mounting bracket before each use to prevent accidental detachment.

5. MAINTENANCE

- **Cleaning:** Use a soft, damp cloth to clean the mounting bracket. Avoid abrasive cleaners or solvents that could damage the material.
- **Inspection:** Periodically inspect the mounting bracket and clip for any signs of wear, cracks, or damage. Ensure the clip maintains a firm grip on the helmet.
- **Adhesive Check:** If using the 3M adhesive, regularly check its adhesion to the helmet surface. Reapply if it shows signs of loosening.
- **Storage:** When not in use for extended periods, store the mounting clip and intercom unit in a cool, dry place away from direct sunlight.

6. TROUBLESHOOTING

- **Intercom Unit Not Securing:**
 - Ensure you are using the correct mounting bracket for the **New Version FX8** intercom.
 - Check for any obstructions in the bracket's slot or on the intercom unit.
- **Clip Not Holding Firmly:**
 - Verify the clip is fully inserted into the bracket.
 - Ensure the helmet edge is not too thick or thin for the clip's design. Consider using the 3M adhesive method if the clip fit is poor.
 - Inspect the clip for damage or deformation.
- **Adhesive Not Sticking:**
 - Ensure the helmet surface was thoroughly cleaned and dried before application.
 - Apply firm pressure for the recommended duration during installation.
 - Allow adequate curing time (24 hours) before use.
 - Avoid applying to curved or textured surfaces where adhesion may be compromised.

7. SPECIFICATIONS

Model Name	Clip (for Fodsports FX8)
Compatibility	New Version Fodsports FX8 Bluetooth Intercom
Attachment Methods	Iron Clip, 3M Double-Sided Adhesive
Material	Durable Plastic, Metal (Iron Clip)
Item Weight	0.02 Kilograms (0.634 ounces)
Package Dimensions	6.65 x 5.2 x 0.55 inches

8. WARRANTY AND SUPPORT
