HMHAMA SL60D, HMACDM2975-7

HMHAMA Replacement Accessories for Lubluelu SL60D Robot Vacuum Cleaner

Model: HMACDM2975-7 (Set2)

Brand: HMHAMA

Introduction

This instruction manual provides guidance for the installation and maintenance of the HMHAMA replacement accessory kit for the Lubluelu SL60D Robot Vacuum Cleaner. This kit includes one main brush, four side brushes, and four filters, designed to restore optimal cleaning performance to your robot vacuum.
These replacement parts are specifically compatible with the**Lubluelu SL60D Robot Vacuum Cleaner**. Regular replacement of these components is essential for maintaining the vacuum's cleaning efficiency and extending its lifespan.

Setup and Installation

Before beginning any installation or replacement, ensure your Lubluelu SL60D robot vacuum cleaner is turned off and unplugged from its charging base.

1. Main Brush Installation

To replace the main brush, locate the main brush cover on the underside of the vacuum. Open the cover, typically by pressing release tabs or unscrewing fasteners. Carefully remove the old main brush. Insert the new main brush, ensuring its ends align correctly with the slots in the vacuum. Close the main brush cover securely until it clicks into place.

2. Side Brush Installation

Locate the side brushes on the underside of the robot vacuum. Each side brush is typically held in place by a single screw. Use a screwdriver to remove this retaining screw. Carefully pull off the old side brush. Align the new side brush with the post and press it down. Secure it with the screw, ensuring it is tightened but not overtightened.

Image: Two three-armed side brushes, designed to sweep debris from edges and corners into the vacuum's path.

3. Filter Installation

Open the dustbin compartment of your robot vacuum and remove the dustbin. Locate the filter assembly within the dustbin. Remove the old filter, often by pulling it out or unlatching it. Insert the new HEPA filter into the designated slot, ensuring it fits snugly and creates a proper seal. Reinsert the dustbin into the vacuum until it locks into place.

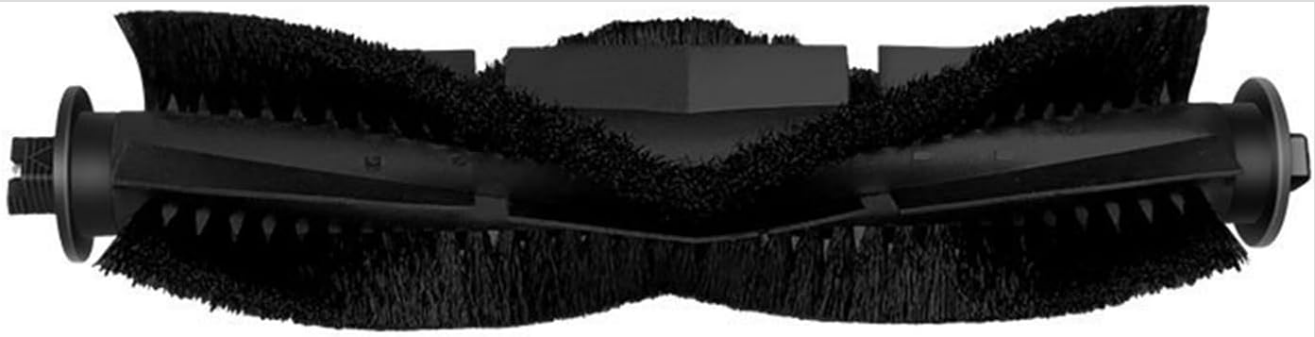

Image: A rectangular HEPA filter with pleated white filter material and a black foam pre-filter, designed to capture fine dust and allergens.

Maintenance

Regular replacement of these accessories is crucial for maintaining the cleaning efficiency of your Lubluelu SL60D robot vacuum. It is recommended to replace parts every 2-3 months, depending on usage frequency and environment, to ensure optimal performance.

- **Main Brush:** Inspect regularly for tangled hair and debris. Clean as needed.
- **Side Brushes:** Check for wear, damage, or bending. Replace if bristles are worn or broken.
- **Filters:** Clean periodically by tapping out dust. Replace as recommended to ensure effective dust capture and prevent reduced suction.

Troubleshooting

Issue: Side brush appears bent or curled.

Solution: If a side brush is bent or curled upon arrival or after use, immerse it in warm water for a few minutes. This will help it regain its original shape. This condition does not affect the brush's quality or performance.

Issue: Replacement parts do not fit the robot vacuum.

Solution: Ensure your robot vacuum cleaner is the**Lubluelu SL60D** model. These accessories are specifically designed for this model. Verify the model number of your vacuum against the compatibility information provided in this manual and on the product packaging.

Specifications
