## MAINTENANCE

### Cleaning Instructions

- **General Cleaning:** For routine cleaning, vacuum the upholstery regularly using a soft brush attachment to remove dust and debris.
- **Spot Cleaning:** For spills, immediately blot with a clean, dry cloth. Do not rub, as this can spread the stain. For stubborn spots, use a damp cloth with a mild, water-based cleaning solution (Upholstery Cleaning Code: [W]). Test any cleaning solution on an inconspicuous area first.
- **Cushion Care:** Fluff and rotate cushions periodically to maintain their shape and extend their lifespan.
- **Frame Care:** Wipe the metal frame and legs with a damp cloth as needed.

### Long-Term Care

- Avoid direct sunlight to prevent fading of the fabric.
- Keep the sofa away from heat sources to prevent material damage.
- Periodically check and tighten all screws and bolts to ensure structural integrity.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Sofa feels unstable or wobbly.	Loose fasteners or uneven placement.	Check and tighten all screws and bolts. Ensure the sofa is on a level surface.
Pull-out bed mechanism is stiff or difficult to operate.	Mechanism may need lubrication or is misaligned.	Ensure no obstructions are blocking the mechanism. Apply a silicone-based lubricant to moving parts if necessary.
Chaise storage lid does not close properly.	Items inside are overfilling the compartment.	Remove some items from the storage compartment to allow the lid to close flush.
Cushions appear flat or lumpy.	Normal wear and tear; compression from prolonged use.	Fluff and rotate cushions regularly. Allow new cushions time to fully expand after unpacking.
