SETUP

Assembly

Unpack all components from the box. Connect the wand to the main body of the vacuum until it clicks securely. Attach your desired cleaner head to the end of the wand. Ensure all connections are firm before use.

Initial Charging

Before first use, fully charge the vacuum. The Dyson V15 Detect features a rechargeable lithium-ion battery that provides up to 60 minutes of run time. A full charge typically takes approximately 4.5 hours. Plug the charger into a wall outlet and connect it to the charging port on the vacuum's main body. The LCD screen will display charging status.

OPERATING YOUR VACUUM

Power Modes

The vacuum offers multiple power modes to suit different cleaning tasks:

- **Eco Mode:** Provides maximum run time for lighter cleaning tasks.
- **Auto Mode:** Intelligently optimizes power and run time based on the debris detected by the piezo sensor, adapting suction to floor type.
- **Boost Mode:** Delivers maximum suction for intensive spot cleaning.

Switch between modes using the control button on the top of the main body.

Cleaner Heads and Attachments

The Dyson V15 Detect comes with various cleaner heads and tools for different surfaces and cleaning needs:

- **Fluffy Optic Cleaner Head:** Equipped with illumination to reveal invisible dust on hard floors, ensuring thorough cleaning.
- **Additional Tools:** Includes various brushes and crevice tools for upholstery, tight spaces, and high-reach areas.
