AKUVU S2

AKUVU Rechargeable Smart Barking Collar S2 User Manual

Model: S2

1. Introduction

Thank you for choosing the AKUVU Rechargeable Smart Barking Collar S2. This device is designed to help manage excessive barking in dogs through humane and effective methods. It utilizes sound, vibration, and static shock (optional) to gently correct barking behavior. Please read this manual thoroughly before use to ensure proper operation and the safety of your pet.

2. Safety Information

- **Proper Fit:** Ensure the collar fits snugly but not too tightly. You should be able to fit two fingers comfortably between the collar and your dog's neck. A loose fit may result in inconsistent correction, while a too-tight fit can cause skin irritation or discomfort.
- **Usage Duration:** Do not leave the collar on your dog for more than 12 hours per day. Prolonged wear can lead to skin irritation or pressure sores.
- **Skin Inspection:** Regularly inspect your dog's neck for any signs of irritation, redness, or sores. If irritation occurs, discontinue use and consult a veterinarian.
- **Supervision:** Always supervise your dog when they are wearing the collar, especially during initial use.
- **Not for Aggressive Dogs:** This collar is not intended for use on aggressive dogs. If your dog exhibits aggressive behavior, consult a professional dog trainer or veterinarian.
- **Children:** Keep the device out of reach of children.

3. Package Contents

- AKUVU Smart Barking Collar Unit
- Adjustable Nylon Strap
- Magnetic USB Charging Cable

- Short and Long Contact Points (for different fur lengths)
- Test Light Tool
- User Manual

4. Product Overview

The AKUVU Smart Barking Collar features a clear display indicating battery, mode, and sensitivity. It offers four training modes and five sensitivity levels.

Detailed view of the collar's intuitive display, showing icons for beep, vibration, and shock, alongside battery status and sensitivity settings.

4.1 Components

- **Collar Unit:** The main device housing the electronics, display, and contact points.
- **Nylon Strap:** Adjustable and durable strap for securing the unit to your dog's neck.
- **Contact Points:** Small metal probes that deliver vibration or static shock. Choose the appropriate length based on your dog's fur.

4.2 Features

- **4 Training Modes:** The collar offers four distinct training modes to suit different dog temperaments and

training needs. These include:

a. Variable Warning Tone
b. Variable Vibration Mode
c. Variable Warning Tone + Vibration Mode
d. Variable Warning Tone + Vibration + Static Shock Mode

- **5 Sensitivity Levels:** Adjust the collar's sensitivity to barking from level 1 (least sensitive) to level 5 (most sensitive). This helps prevent false triggers and ensures effective response to your dog's barking.
- **Smart Anti-False Triggering:** Advanced technology ensures the collar only activates in response to your dog's barking, not from head shaking, other dogs' barking, or other environmental noises.
- **IP67 Waterproof:** The collar is designed to withstand water exposure, making it suitable for various outdoor activities and weather conditions.
- **Magnetic Fast Charge:** Easy and convenient charging with a magnetic USB cable.

5. Setup

5.1 Charging the Collar

Before first use, fully charge the collar. Connect the magnetic USB charging cable to the charging port on the collar unit and plug the other end into a USB power source (e.g., USB adapter, car charger, power bank, laptop/PC). The battery indicator on the display will show charging progress. A full charge typically takes approximately 2 hours and provides up to 15 days of use.

The collar charges quickly via a magnetic USB cable, offering extended use on a single charge.

5.2 Attaching the Strap and Contact Points

1. Thread the adjustable nylon strap through the loops on the collar unit.
2. Select the appropriate length contact points (short for short-haired dogs, long for long-haired dogs) and screw them securely into the designated holes on the back of the collar unit.

5.3 Fitting the Collar on Your Dog

Place the collar around your dog's neck, ensuring the contact points are touching the skin. Adjust the strap so it is snug but not restrictive. You should be able to comfortably slide two fingers between the collar and your dog's neck. The collar should not be able to rotate freely around the neck.

Proper fitting of the AKUVU Smart Barking Collar on a dog's neck is crucial for comfort and effectiveness.

6. Operating Instructions

6.1 Turning On/Off

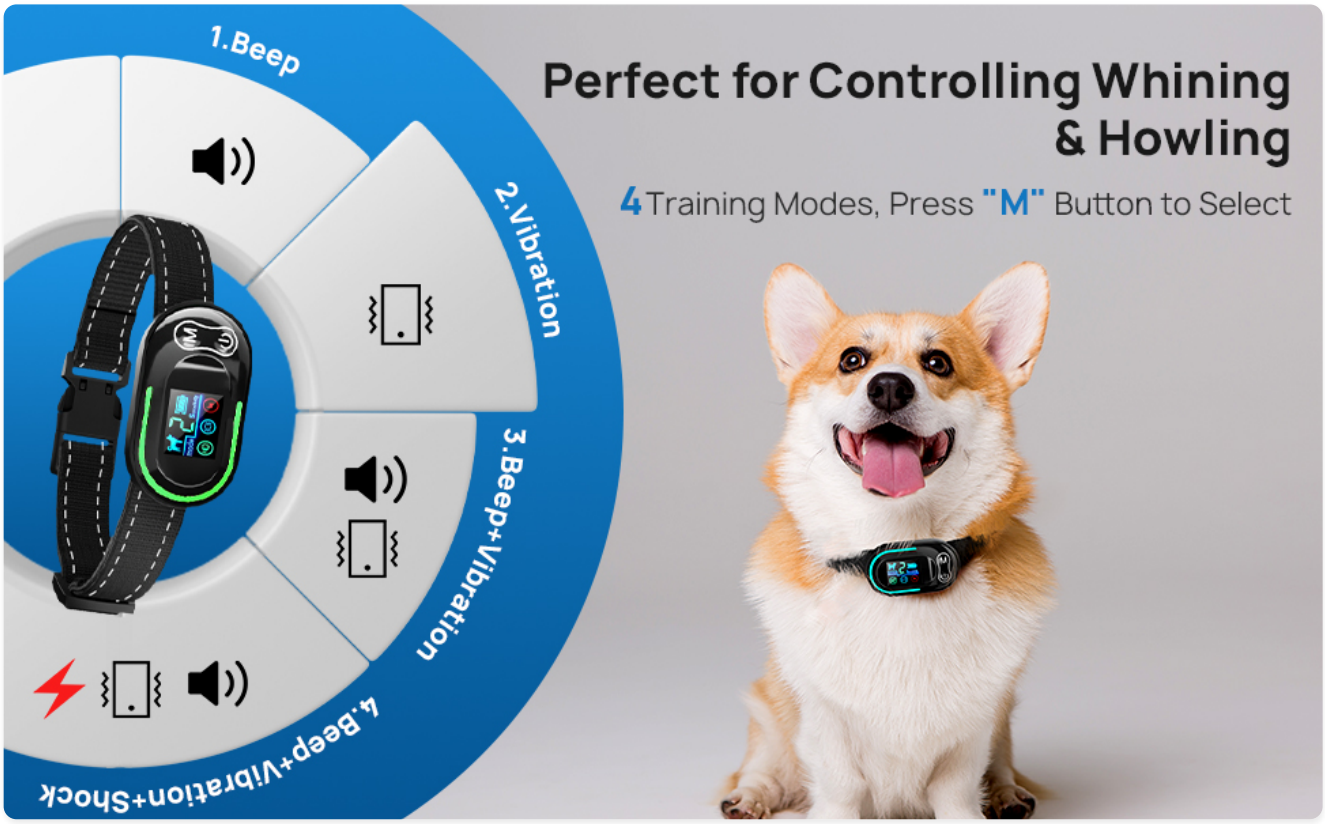

To turn the collar ON, press and hold the power button (usually marked with a power symbol) for 3 seconds until the display lights up. To turn it OFF, press and hold the power button again for 3 seconds.

6.2 Selecting Training Mode

Press the 'M' (Mode) button to cycle through the four available training modes. The display will show the current mode selected:

- **Mode 1:** Warning Tone Only
- **Mode 2:** Vibration Only
- **Mode 3:** Warning Tone + Vibration
- **Mode 4:** Warning Tone + Vibration + Static Shock

Choose the mode that best suits your dog's temperament and your training goals. Start with milder modes (Tone or Vibration) and only progress to Static Shock if necessary and with caution.

The collar offers four distinct training modes, allowing for customized correction based on your dog's needs.

6.3 Adjusting Sensitivity

Press the 'S' (Sensitivity) button to adjust the barking detection sensitivity. There are 5 levels, with 1 being the least sensitive and 5 being the most sensitive. Adjust this setting to prevent false triggers from other noises while ensuring it responds to your dog's actual barking.

6.4 Understanding the Display

The clear display shows:

- Current Training Mode
- Sensitivity Level
- Battery Level Indicator
- Low Battery Reminder

7. Maintenance

- **Cleaning:** Clean the collar unit and strap regularly with a damp cloth and mild soap. Air dry completely before re-use.
- **Storage:** Store the collar in a cool, dry place when not in use. Avoid extreme temperatures.
- **Inspection:** Regularly check the collar for signs of wear or damage. Replace if necessary to ensure proper

function and safety.

- **Water Exposure:** While IP67 waterproof, avoid prolonged immersion in water. Ensure the charging port cover is securely closed when not charging.

8. Troubleshooting

- **Collar Not Activating:**
  - Check if the collar is turned ON.
  - Ensure the battery is charged.
  - Verify contact points are making proper contact with your dog's skin. Adjust fit or use longer contact points if needed.
  - Increase the sensitivity level.
- **False Triggers:**
  - Decrease the sensitivity level.
  - Ensure the collar is not too loose, allowing it to rub or move excessively.
- **Collar Not Charging:**
  - Ensure the magnetic charging cable is properly connected to the collar and the power source.
  - Try a different USB power source or cable.
- **Skin Irritation:**
  - Remove the collar immediately.
  - Clean your dog's neck and the collar.
  - Allow the skin to heal before re-using. Consider using the collar for shorter periods or adjusting the fit. Consult a veterinarian if irritation persists.

9. Specifications

- **Brand:** AKUVU
- **Model:** S2
- **Material:** Nylon, Silicone
- **Product Dimensions:** 10L x 5W Centimetres (Collar Unit)
- **Battery:** 1 Lithium Polymer battery (included)
- **Charging Time:** Approximately 2 hours
- **Usage Time:** Up to 15 days on a single charge
- **Waterproof Rating:** IP67
- **Recommended Dog Weight:** 10-150 lbs

10. Warranty and Support

For warranty information or technical support, please refer to the product packaging or contact AKUVU customer service directly. Keep your purchase receipt as proof of purchase.
