Model: C11

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Vikye C11 Wireless Car Charger. Please read this manual thoroughly before use to ensure proper function and safety.

PACKAGE CONTENTS

Verify that all items listed below are included in your package:

- 1 x Wireless Charger
- 1 x Air Outlet Support
- 1 x Charging Cable
- 1 x Micro USB Magnetic Adapter
- 1 x Type C Magnetic Adapter
- 1 x Lightning Magnetic Adapter
- 1 x Instructions (this manual)

PRODUCT FEATURES

- **360-Degree Rotation:** The rear bracket allows for multi-angle rotation, enabling flexible adjustment of the viewing angle for navigation.
- **Auto-Clamping Mechanism:** Features a built-in rear fingerprint touch button. A simple touch opens the clamping arms, which then automatically secure the phone. This design allows for quick one-handed placement and removal of the device. The operation is silent due to a built-in silencer.

Intelligent sensing

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe the surface of the charger. Avoid using abrasive cleaners or solvents.
- **Storage:** When not in use for extended periods, store the charger in a cool, dry place away from direct sunlight and extreme temperatures.
- **Avoid Liquids:** Do not expose the charger to water or other liquids.

TROUBLESHOOTING

Charger not powering on:

Ensure the charging cable is securely connected to both the charger and a functional power source in your vehicle. Check the vehicle's power outlet or USB port for power.

Phone not charging wirelessly:

- Verify your phone supports wireless charging.
- Ensure the phone is centered on the charging pad.
- Remove any thick phone cases that might interfere with wireless charging.

- Check if the power source provides sufficient output (e.g., a QC 3.0 car charger for fast wireless charging).

Clamping arms not opening/closing:

- Ensure the charger is powered on.
- Gently touch the rear fingerprint touch button to activate the arms.
- Check for any obstructions in the clamping mechanism.

Phone not charging with magnetic adapters:

- Ensure the correct magnetic adapter is fully inserted into your phone's charging port.
- Verify the magnetic connection between the adapter and the charger is secure.
- Check the charging cable and power source.
