AIRDOCTOR AD3000/AD3500 UltraHEPA Filter

AIRDOCTOR AD3000/AD3500 UltraHEPA Filter Replacement Instructions

Genuine Replacement UltraHEPA Filter for AirDoctor Air Purifiers

Introduction

This manual provides detailed instructions for replacing the UltraHEPA filter in your AIRDOCTOR AD3000 or AD3500 air purifier. Regular filter replacement ensures optimal performance and continued clean air in your home.

Filter Installation

1. **Power Off:** Ensure your AIRDOCTOR air purifier is powered off and unplugged from the electrical outlet before proceeding.
2. **Remove Front Cover:** Gently push the top edge of the front cover forward to release it, then pull it away from the unit.
3. **Remove Pre-Filter (if applicable):** If your unit has a pre-filter (often a black carbon filter), carefully remove it. Note its orientation for reinstallation.
4. **Remove Old UltraHEPA Filter:** Locate the UltraHEPA filter. It typically has a small tab or handle for easy removal. Pull the tab to slide the old filter out of its compartment.
5.

Image: Easy installation of the UltraHEPA filter. The filter slides into the designated slot within the air purifier.

6. **Unpack New UltraHEPA Filter:** Carefully remove the new UltraHEPA filter from its protective packaging.
7. **Insert New UltraHEPA Filter:** Align the new UltraHEPA filter with the arrows on the filter frame pointing towards the back of the air purifier. Slide the filter firmly into the compartment until it is securely in place. Ensure the pull tab remains accessible for future removal.
8. **Reinstall Pre-Filter (if applicable):** Place the pre-filter back into its position, ensuring correct orientation.
9. **Replace Front Cover:** Align the front cover with the unit and push it back into place until it clicks securely.
10. **Plug In and Power On:** Plug the air purifier back into the electrical outlet and power it on.

Resetting Filter Lights

After replacing the UltraHEPA filter, you must reset the filter indicator light on your AIRDOCTOR unit. This ensures accurate tracking of the new filter's lifespan.

1. **Locate Reset Button:** On the control panel, identify the "Filter Reset" button. It may be combined with another function, such as "Auto" or "Dim".
2. **Perform Reset:** Press and hold the "Filter Reset" button (or the combined button) for approximately 3 seconds.

3. **Confirmation:** You will hear a series of beeps (typically three) and the filter indicator light will flash before turning off, confirming the reset is complete.

Maintenance

The AIRDOCTOR UltraHEPA filter is designed to last for approximately one year under normal use. The air purifier's indicator lights will signal when it's time for a replacement. For optimal air quality, always use genuine AIRDOCTOR replacement filters.

Troubleshooting

- **Filter Light Remains On:** If the filter indicator light does not turn off after attempting the reset procedure, ensure the filter is correctly installed and firmly seated. Repeat the reset process, holding the button for the specified duration. If the issue persists, consult the main AIRDOCTOR air purifier user manual.
- **Reduced Airflow:** If you notice reduced airflow shortly after replacing the filter, ensure all filters are correctly installed and the front cover is properly secured.

Specifications

Brand:	AIRDOCTOR
Compatible Models:	AD3000, AD3500
Material Type:	UltraHEPA Filter
Item Weight:	1.49 pounds (0.68 Kilograms)
Product Dimensions:	17 x 14 x 2 inches (17"L x 2"W x 14"Th)
MERV Rating:	18
Air Filter Construction:	Pleated
Included Components:	UltraHEPA Filter
Part Number:	AD300HRF02, AD350HRF02
UPC:	874617004924
