## 2. SAFETY INFORMATION

- **Maximum Weight Capacity:** Do not exceed the maximum weight recommendation of 1000 pounds (approximately 453 kg). Exceeding this limit may result in damage to the bed frame or personal injury.

- **Electrical Safety:** The built-in charging ports and outlets are designed for specific power requirements. Do not overload the outlets. If you experience any buzzing or unusual behavior from the electrical components, discontinue use immediately and contact customer support. *Note: Some users have reported compatibility issues with certain devices (e.g., iPhone 12 and*

### 4. SETUP AND ASSEMBLY

---

Assembly of the iPormis Queen Bed Frame is designed to be straightforward and can typically be completed in less than 40 minutes with the provided tools and instructions. It is recommended to assemble the bed frame in the room where it will be used.

#### Assembly Steps:

1. **Unpack and Organize:** Carefully unpack all components and lay them out on a clean, soft surface to prevent scratches. Identify each part using the labels and the parts list in your physical manual.
2. **Assemble the Frame:** Follow the step-by-step diagrams in your physical instruction manual to connect the main metal bed frame sections. Ensure all bolts are tightened securely but do not overtighten.
3. **Attach the Headboard:** Secure the wingback storage headboard to the assembled bed frame. Pay attention to the alignment for the integrated charging unit.

4. **Install Slats:** The solid wood slats feature a "one-click" easy installation system. Simply align and press them into place on the frame. Ensure each slat is firmly seated to provide optimal mattress support and prevent noise. The slats are designed with EVA foam to minimize squeaking.
5. **Insert Storage Drawers:** Place the four storage drawers into their designated compartments under the bed frame. The drawers are equipped with smooth mute wheels for easy movement and a latch system to keep them closed.
6. **Final Check:** Once assembly is complete, double-check all connections to ensure they are tight and secure.

## 6. MAINTENANCE

Regular maintenance will help prolong the life and appearance of your iPormis bed frame.

- **Cleaning the Fabric:** For general cleaning, gently vacuum the upholstered fabric to remove dust and debris. For spills, blot immediately with a clean, dry cloth. For stubborn stains, use a mild fabric cleaner following the product's instructions, testing on an inconspicuous area first.
- **Cleaning Drawers:** The storage drawers can be easily removed for cleaning underneath the bed. Wipe down the metal frames and fabric fronts with a damp cloth as needed.
- **Checking Connections:** Periodically check all bolts and screws to ensure they remain tight. Retighten if necessary to maintain stability and prevent squeaking.
- **Electrical Unit:** Keep the charging ports and outlets free of dust and debris. Do not attempt to disassemble or repair the electrical unit yourself.

## 7. TROUBLESHOOTING

If you encounter any issues with your iPormis bed frame, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Bed frame squeaks or wobbles.	Loose connections; slats not fully seated.	Ensure all bolts are tightened. Check that all wooden slats are properly clicked into place and are not loose.
Storage drawers do not close or open smoothly.	Obstruction; latch not engaging; wheels dirty.	Check for items blocking the drawer's path. Ensure the latch mechanism is clear and functional. Clean any debris from the drawer wheels.
Charging ports or outlets are not working or buzzing.	Power issue; device incompatibility; faulty unit.	Ensure the bed frame's power cord is securely plugged into a working wall outlet. Try a different device. Note that some devices (e.g., iPhone 12 and later) may experience compatibility issues leading to buzzing. If the issue persists, discontinue use of the electrical unit and contact iPormis customer support.
Mattress slides on the frame.	Incorrect mattress size; insufficient friction.	Ensure your mattress is the correct Queen size (60" x 80"). The wingback design helps prevent sliding, but a non-slip mattress pad can be used if needed.
