## SETUP

---

### 1. Battery Installation

The controller requires 3 AAA batteries (not included). To install:

1. Locate the battery compartment on the back of the controller.

2. Open the battery cover.
3. Insert 3 AAA batteries, ensuring correct polarity (+/-).
4. Close the battery cover securely.

## MAINTENANCE

---

- Keep the controller and USB receiver dry and clean.
- Avoid exposing the device to extreme temperatures or direct sunlight.
- Clean the surface with a soft, dry cloth. Do not use harsh chemicals or abrasive cleaners.
- Remove batteries if the controller will not be used for an extended period to prevent leakage.

## TROUBLESHOOTING

---

Problem	Possible Cause / Solution
Controller does not power on.	Check if batteries are installed correctly and have sufficient charge. Ensure the "MODE" button is pressed and held to power on.
Controller not connecting to PC.	Ensure the USB wireless receiver is securely plugged into a working USB port. Try a different USB port. Press the "MODE" button on the controller to re-initiate pairing. Ensure the controller is within the 15-meter transmission range. Check your PC's device manager to see if the controller is recognized. You may need to manually update or install drivers if not automatically detected (though it's designed for plug-and-play).
Vibration feedback not working.	Ensure the game you are playing supports vibration feedback. Check in-game settings to ensure vibration is enabled. Verify controller drivers are up to date.
Input lag or unresponsive controls.	Ensure the controller is within optimal range of the USB receiver. Minimize interference from other 2.4Ghz wireless devices. Check battery level; low batteries can affect performance.
