MELLCOM 10'x10' Hardtop Gazebo User Manual

Model: 10'x10' Galvanized Steel Roof Aluminum Frame Gazebo

Brand: MELLCOM

1. IMPORTANT SAFETY INFORMATION

Before assembly and use, please read and understand all instructions. Failure to follow these instructions may result in injury or damage to the product.

- **Snow and Wind Ratings:** Always check local snow and wind load ratings for your area and ensure the gazebo's specifications meet these requirements. This gazebo is designed to withstand a wind rate of 40 MPH and a snow load of 2500 LBS.
- **Pre-Installation Check:** Carefully inspect all instructions and accessories before beginning installation. Ensure all parts are present and undamaged.
- **Tools and Safety Gear:** Use appropriate tools and safety gear, including ladders and gloves, during the installation process.
- **Anchoring:** Ensure anchoring stands are securely fastened to the ground or deck surface to prevent movement, especially in windy conditions. The pre-drilled bases are designed for secure installation.
- **Roof Installation:** Proper roof installation is crucial for water resistance and structural integrity. Follow the instructions precisely to ensure correct alignment and sealing of panels.
- **Assembly Personnel:** It is recommended that 2-3 people work together to assemble the gazebo.

2. PRODUCT OVERVIEW

The MELLCOM 10'x10' Hardtop Gazebo is a durable and stylish outdoor structure designed to enhance your patio, lawn, or deck. It features a robust galvanized steel double roof and a rustproof aluminum frame, providing long-lasting protection and comfort.

Key Features:

- **Galvanized Steel Double Roof:** Fade-resistant and rust-resistant, designed to withstand heavy snow and wind. The double-top design promotes ventilation and cooling.
- **Rustproof Aluminum Frame:** Constructed with 2.93"x2.93" triangular powder-coated aluminum frames for enhanced stability and durability.
- **Integrated Netting & Curtains:** Fully enclosed zippered, removable double-layer PBV-coated curtains and netting offer protection from UV rays, insects, and provide privacy.
- **Convenient Top Hook:** Equipped with a "U" hook on the top roof for hanging lights or fans.

- **Spacious Design:** Provides ample space for outdoor furniture, suitable for various outdoor activities.

3. SETUP AND ASSEMBLY

The MELLCOM Hardtop Gazebo is designed for assembly by 2-3 people and typically takes 4-6 hours. It arrives in multiple boxes; ensure all boxes are received before starting. Follow the included detailed instructions for a smooth assembly process.

Assembly Tips:

- **Organize Parts:** Unpack and organize all components. It is helpful to sort hardware into labeled bags to easily identify bolts and screws.
- **Keep Fasteners Loose Initially:** When assembling the frame, keep all attachments hand-tight or slightly loose until the entire section is aligned and square. This allows for minor adjustments.
- **Ensure Level and Square Base:** Before proceeding with upper sections, verify that the four uprights and lower horizontal rails are perfectly level and square. This is critical for the overall stability and alignment of the gazebo.
- **Roof Panel Installation:**

- For rectangular models, begin roof panel installation on one of the shorter walls.
 - Install triangular corner pieces first, sliding them up from the bottom and aligning holes.
 - Ensure clips on roof tiles are secure. If any are too snug, gentle adjustment with pliers may be needed.
 - Do not fully tighten roof panel bolts until all panels are in place and properly aligned.
- **Curtain and Netting Installation:**
 - The finished side of both the solid panels and screen panels should face outwards.
 - The screen panels have a hook and Velcro straps. The hook goes through the solid fabric grommet and clips into the metal upright.
 - Utilize the double-track system to easily slide each layer of curtains and netting.
 - **Final Tightening:** Once all components are assembled and aligned, go back and fully tighten all nuts and bolts using the provided tools or appropriate wrenches.

4. OPERATING INSTRUCTIONS

The MELLCOM Hardtop Gazebo is designed for ease of use and adaptability to various weather conditions and privacy needs.

Curtains and Netting:

- **Privacy Curtains:** The outer layer consists of solid, PBV-coated curtains. These can be fully closed using the zippers for complete privacy and enhanced UV protection.
- **Insect Netting:** The inner layer features fine mesh netting, which can be zipped closed to protect against insects while allowing airflow.
- **Dual Track System:** Both the privacy curtains and insect netting operate on separate tracks, allowing them to be opened or closed independently.
- **Securing Curtains:** Use the integrated two-in-one Velcro straps to tie back the curtains and netting when not in use, keeping them neatly organized and preventing them from flapping in the wind.

Accessory Hook:

- A central "U" hook is provided on the interior of the roof structure. This hook is suitable for hanging lightweight accessories such as outdoor ceiling fans or decorative lighting. Ensure any hung items do not exceed the weight limit specified in the full instruction manual.

5. MAINTENANCE

Regular maintenance will ensure the longevity and optimal performance of your MELLCOM Hardtop Gazebo.

- **Cleaning the Frame:** Clean the aluminum frame periodically with a mild soap and water solution. Rinse thoroughly with clean water and dry with a soft cloth to prevent water spots and maintain the finish. Avoid abrasive cleaners or harsh chemicals.
- **Cleaning the Roof Panels:** The galvanized steel roof panels can be cleaned with a soft brush or cloth and a mild detergent. Rinse well. Remove any accumulated leaves, snow, or debris from the roof to prevent excessive load and potential damage.
- **Curtains and Netting Care:** The PBV-coated curtains and netting are removable for cleaning. Follow the care instructions on their labels, typically involving gentle washing with mild soap and air drying. Ensure they are completely dry before storing to prevent mildew.
- **Hardware Check:** Periodically check all nuts, bolts, and screws to ensure they remain tight. Re-tighten as

necessary, especially after strong winds or heavy rain.

- **Anchoring System:** Regularly inspect the anchoring points for stability. If the gazebo is installed on soft ground, ensure the anchors remain firmly in place.
- **Winterization (if applicable):** While the galvanized steel roof is designed for snow load, consider removing curtains and netting during heavy winter seasons or extreme weather to prolong their life.

6. TROUBLESHOOTING

This section addresses common issues and their potential solutions.

Problem	Possible Cause	Solution
Gazebo feels unstable or wobbly.	Loose fasteners; uneven ground; inadequate anchoring.	Ensure all bolts and screws are fully tightened. Verify the ground is level. Re-secure or reinforce anchoring points.
Roof panels do not align properly during assembly.	Frame not square/level; panels installed out of sequence; manufacturing tolerance.	Disassemble the affected section, ensure the main frame is perfectly square and level before re-attempting. Follow the instruction manual's sequence for panel installation. Minor adjustments with pliers may be needed for clips.
Water leakage from the roof.	Improperly installed roof panels; missing or damaged seals.	Inspect roof panel overlaps and ensure they are correctly interlocked and sealed. Check for any gaps or damaged seals and apply appropriate sealant if necessary.
Curtains/netting do not slide smoothly.	Debris in tracks; bent tracks; improper installation.	Clean tracks of any dirt or debris. Inspect tracks for bends or damage and gently straighten if possible. Ensure curtain/netting hooks are correctly inserted into the tracks.

7. SPECIFICATIONS

- **Product Dimensions:** 120"L x 120"W x 114"H (10'L x 10'W x 9.5'H)
- **Material:** Galvanized Steel Roof, Aluminum Frame
- **Color:** Brown
- **Item Weight:** Approximately 205.7 Pounds
- **Water Resistance Level:** Water Resistant
- **Ultraviolet Light Protection:** 99%
- **Wind Rate:** Up to 40 MPH
- **Snow Load Capacity:** Up to 2500 LBS
- **Occupancy:** 6-7 people
- **Assembly Required:** Yes
- **Manufacturer:** MELLCOM
