Babymoov A001135

Babymoov Nutribaby(+) 6-in-1 Baby Food Processor Instruction Manual

Model: A001135 | Brand: Babymoov

1. INTRODUCTION

The Babymoov Nutribaby(+) is a versatile 6-in-1 baby food processor designed to simplify meal preparation for your child. It combines steam cooking, blending, defrosting, warming baby food jars, sterilizing, and warming baby bottles into one convenient appliance. This manual provides detailed instructions for safe and efficient use, helping you prepare healthy and delicious homemade meals for your baby.

2. IMPORTANT SAFETY INSTRUCTIONS

Please read and understand all safety instructions before using the Babymoov Nutribaby(+). Failure to follow these instructions may result in injury or damage to the appliance.

- Always ensure the appliance is placed on a stable, flat, heat-resistant surface.
- Do not immerse the electrical unit (base) in water or any other liquid.
- Unplug the appliance from the power outlet when not in use, before cleaning, and during assembly or disassembly.
- Keep the appliance out of reach of children during operation and when cooling down.
- Use only the accessories provided or recommended by Babymoov.
- Do not operate the appliance if it has a damaged cord or plug, or if it malfunctions or has been damaged in any

manner. Contact customer support for assistance.

- Exercise extreme caution when handling hot steam, hot water, or hot food.
- The product is made from Tritan (BPA-free) and Polypropylene. Ensure all parts are correctly assembled before use.

3. COMPONENTS OVERVIEW

Familiarize yourself with the different parts of your Nutribaby(+) food processor:

- **Main Unit:** Houses the motor and heating element.
- **Water Reservoir:** For steam generation.
- **Steam Baskets (x2):** Transparent baskets for cooking different foods simultaneously.
- **Blending Bowl:** For pureeing and mixing.
- **Control Panel:** Touch-sensitive interface with 6 pre-programmed functions and integrated timer.
- **Juice Collector:** Collects cooking juices to add flavor and nutrients to purees.
- **Spatula:** Included accessory for handling food.

4. SETUP AND FIRST USE

1. **Unpacking:** Carefully remove all components from the packaging. Retain packaging for future storage or transport.
2. **Initial Cleaning:** Before first use, wash all removable parts (steam baskets, blending bowl, lids, spatula) with warm soapy water. Rinse thoroughly and dry. Wipe the main unit with a damp cloth.
3. **Assembly:** Place the main unit on a stable surface. Ensure the water reservoir is empty and clean.

5. OPERATING INSTRUCTIONS

The Nutribaby(+) features an intuitive touch control panel with 6 pre-programmed functions. Each function is activated by a single button, and an integrated timer provides audible and visual alarms with automatic shut-off.

Robot multifonctions

Cuit à la vapeur tous les aliments et mixe en même temps.

Facile à utiliser

Avec 6 programmes, alarme, minuterie et arrêt automatique.

Image 5.1: Detailed view of the Nutribaby(+) control panel, showing function buttons and digital display.

5.1. Steam Cooking

1. Fill the water reservoir with the appropriate amount of water (refer to the water level markings for guidance).
2. Chop ingredients into small, even pieces. Place them in the steam baskets. You can use both baskets simultaneously for different foods, ensuring optimal cooking times for each.
3. Place the filled baskets onto the main unit and secure the lid.

4. Select the steam cooking function on the control panel and set the desired cooking time. The appliance will automatically shut off when done.

Image 5.2: Preparing vegetables for steam cooking in the Nutribaby(+).

5.2. Blending

The Nutribaby(+) offers 3 blending speeds to achieve the perfect texture for your baby's age and stage of food diversification.

1. Once ingredients are cooked, transfer them from the steam baskets to the blending bowl.
2. Add a small amount of the collected cooking juice to the blending bowl. This enhances flavor and helps achieve the desired consistency.
3. Secure the blending bowl lid.
4. Select the blending function and choose one of the 3 speeds. Blend until the desired texture is achieved.

4 à 6 mois

6 à 8 mois

8 mois et +

Evolutif

Adapté à la diversification alimentaire :
3 vitesses de mixage.

Complet

- Cuit tous les aliments : légumes, viande, poisson, céréales, féculents...
- Récupérateur de jus de cuisson pour ajuster la texture et conserver les nutriments

5.3. Other Functions: Defrosting, Warming Jars, Sterilizing, Warming Bottles

For defrosting, warming baby food jars, sterilizing, or warming baby bottles, place the items in the steam basket(s) and select the corresponding function on the control panel. Adjust the time as needed based on the item and its initial temperature. The appliance will use steam to perform these functions efficiently.

6. CLEANING AND MAINTENANCE

Regular cleaning ensures the longevity and hygiene of your Nutribaby(+).

- **Removable Parts:** All removable parts, including steam baskets, blending bowl, lids, and spatula, are dishwasher-safe. Alternatively, wash them by hand with warm soapy water and rinse thoroughly.
- **Main Unit:** Wipe the main electrical unit with a damp cloth. Do not immerse it in water.
- **Descaling:** Over time, mineral deposits (limescale) may build up in the water reservoir. To descale, mix white vinegar and water (e.g., 1:1 ratio) and pour into the reservoir. Run a steam cycle without food. Rinse thoroughly with clean water afterwards. Perform descaling regularly, depending on water hardness.

7. TROUBLESHOOTING

If you encounter issues with your Nutribaby(+), refer to the following common solutions:

Problem	Possible Cause	Solution
Appliance does not turn on.	Not plugged in; power outlet issue; main unit not correctly assembled.	Check power connection; try a different outlet; ensure all parts are securely in place.
Steaming function not working.	Insufficient water in reservoir; limescale buildup.	Fill water reservoir to appropriate level; perform descaling as per cleaning instructions.
Blending function not working.	Blending bowl not correctly secured; too much food; food too hard.	Ensure blending bowl and lid are securely locked; reduce food quantity; ensure food is cooked soft enough.
Food not cooking evenly.	Food pieces too large or uneven; baskets overloaded.	Cut food into smaller, uniform pieces; do not overload baskets.

If the problem persists after attempting these solutions, please contact Babymoov customer support.

8. SPECIFICATIONS

Feature	Detail
Model Number	A001135
Functions	6-in-1: Steam Cooking, Blending, Defrosting, Warming Baby Food Jars, Sterilizing, Warming Baby Bottles
