Model: Sanpylw2qupog7td | Brand: Sanpyl

1. Introduction

This manual provides detailed instructions for the operation and maintenance of your L11 Body Camera. Please read this manual thoroughly before using the device to ensure proper function and to prevent damage.

2. Safety Information

Always adhere to the following safety guidelines:

- Do not expose the device to extreme temperatures or direct sunlight.
- Keep the device away from water and moisture.
- Do not attempt to disassemble or repair the device yourself. Contact qualified personnel for service.
- Use only the specified charging accessories.
- Keep out of reach of children.

3. Product Overview

The L11 Body Camera is a compact and versatile body camera designed for various recording needs. It features high-definition video recording, night vision capabilities, and a 180-degree rotatable lens for flexible capture angles.

3.1. Package Contents

Verify that all items are present in the package:

- L11 Body Camera
- User Manual
- Battery

5.5. Playback

To review recorded footage, enter playback mode via the menu. Select the desired video file from the list and press OK to play. The 1.54-inch full-color display allows for real-time footage playback directly on the device.

6. Maintenance

6.1. Cleaning

Wipe the camera body with a soft, dry cloth. For the lens, use a specialized lens cleaning cloth and solution to avoid scratches. Do not use abrasive cleaners or solvents.

6.2. Storage

When not in use for extended periods, store the camera in a cool, dry place, away from direct sunlight and extreme

temperatures. Ensure the battery is partially charged (around 50%) before long-term storage to preserve battery health.

6.3. Firmware Updates

Periodically check the manufacturer's website for any available firmware updates. Updates can improve performance, add new features, or fix bugs. Follow the instructions provided with the firmware update carefully.

7. Troubleshooting

Problem	Possible Cause	Solution
Camera does not power on.	Low battery; Power button not held long enough.	Charge the battery; Press and hold the Power button for 3-5 seconds.
Cannot record video.	No MicroSD card inserted; MicroSD card full or corrupted; Incorrect card format.	Insert a MicroSD card; Delete old files or replace card; Format the card in the camera settings.
Poor video quality at night.	Night vision not activated; Obstruction of IR lights.	Activate night vision mode; Ensure IR lights are clear.
Screen frozen or unresponsive.	Software glitch.	Perform a soft reset by pressing and holding the power button until it turns off, then restart. If problem persists, contact support.
