3. SETUP AND PRE-INSTALLATION TESTING

Before proceeding with the full installation, it is crucial to perform a pre-installation test of the new screen. This helps ensure the screen is fully functional before permanent attachment.

3.1. Important Considerations

- **Compatibility:** This screen is compatible only with Samsung Galaxy A03 Core models A032M/DS and A032F/DS.
- **Professional Assistance:** Screen replacement is a delicate operation. If you are not confident in your ability to perform the installation, consider seeking professional assistance.

- **Avoid Excessive Force:** To prevent damage, avoid applying excessive force to the screen corners during installation.

3.2. Pre-Installation Testing Steps

Follow these steps to test the new screen before final installation:

1. **Power Off:** Ensure your phone is completely powered off before connecting the new display.
2. **Connect Flex Cable:** Carefully connect the new screen's flex cable to the phone's motherboard.
3. **Initial Power On:** Power on the phone and enter the diagnostic mode (usually by dialing *#0*# on Samsung devices) to test display colors (Red, Green, Blue) and touch sensitivity.
4. **Full Touch Test:** Verify that the entire screen responds to touch accurately and smoothly.

6. MAINTENANCE

To prolong the life and maintain the performance of your new screen, consider the following maintenance tips:

- **Screen Protector:** Always use a screen protector to guard against scratches and minor impacts.
- **Gentle Cleaning:** Clean the screen with a soft, lint-free cloth. Avoid harsh chemicals or abrasive materials.

- **Avoid Pressure:** Do not apply excessive pressure to the screen, especially around the edges and corners.
- **Protection from Drops:** Use a protective case for your phone to minimize damage from accidental drops.

7. TROUBLESHOOTING

If you encounter issues after installing your new screen, refer to the following common problems and their solutions. For more detailed visual guidance, please refer to the troubleshooting video provided in the Setup section.

7.1. Screen Does Not Turn On or Shows Black Screen

Reason: The phone was not powered off before connecting the new display, or the battery cable was not properly connected.

Solution:

1. Power off the phone completely.
2. Disconnect the battery cable from the motherboard.
3. Reconnect the battery cable firmly.
4. Power on the phone to check if the issue is resolved.

7.2. Touch Not Sensitive or Unresponsive

Reason: The flex cable connector for the screen is loose, connected in the wrong position, or the connector itself is damaged/out of shape.

Solution:

1. Power off the phone.
2. Carefully remove the screen's flex cable from its connector on the motherboard.
3. Clean the connector on both the screen's flex cable and the motherboard using a soft brush or lint-free cloth.
4. Inspect the connector for any signs of damage or being out of shape. If damaged, contact customer support.
5. Reconnect the flex cable, ensuring it is seated correctly and securely.
6. Power on the phone and test the touch functionality.
