Dapper Supply DP-WBFS1200

Dapper Supply Battery Powered Floor Scrubber Instruction Manual

Model: DP-WBFS1200

INTRODUCTION

This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your Dapper Supply Battery Powered Floor Scrubber. Designed for effective floor care, this machine features a wide 20-inch cleaning path and large capacity solution and recovery tanks. It is powered by a 3/4 peak horsepower brush motor offering 220 RPM, incorporating soft-start technology for extended lifespan. Please read this manual thoroughly before initial use.

KEY FEATURES

- **Powerful Cleaning:** 220 RPM brush speed for efficient cleaning performance.
- **Large Capacity Tanks:** 13-gallon solution tank and 14.5-gallon recovery tank for prolonged cleaning sessions.
- **Wide Squeegee Coverage:** Equipped with a 32-inch squeegee for effective water and solution recovery.
- **Dual Battery System:** Includes two 12V batteries, providing a 4.5-hour runtime per charge.
- **Fast Charging:** Fully charges in just 6 hours, minimizing downtime.
- **Comprehensive Accessories:** Comes with a scrub brush, pad driver, and a set of 3 scouring pads.
- **Extensive Coverage:** Capable of cleaning up to 23,000 sq. ft. per hour.
- **Compact Dimensions:** Product dimensions are 51 inches x 31 inches x 43.5 inches.

SETUP

1. Unpacking and Inspection

Carefully remove all components from the packaging. Inspect the machine for any signs of damage that may have occurred during shipping. Report any damage to Dapper Supply immediately.

2. Battery Installation and Initial Charge

The floor scrubber comes with two 12V batteries. Ensure they are properly installed in the designated battery compartment. For initial use, fully charge the batteries for approximately 6 hours. Refer to the charging port location for connection.

Image: Open battery compartment showing the two 12V batteries.

3. Attaching the Scrub Brush and Pad Driver

Attach the scrub brush or the pad driver with the appropriate scouring pad to the underside of the machine. Ensure it is securely fastened before operation.

Image: Front view of the scrubber, highlighting the brush assembly.

4. Filling the Solution Tank

Locate the 13-gallon solution tank. Fill it with clean water and an appropriate, non-foaming floor cleaning solution as recommended for your floor type. Do not overfill.

OPERATING INSTRUCTIONS

1. Starting the Machine

Ensure the machine is fully charged and the solution tank is filled. Grip the starting handle firmly. The control panel is located on the handle for easy access to power and brush controls.

Image: Control panel and starting handle.

2. Cleaning Process

Engage the brush motor and solution flow. Guide the scrubber across the floor in overlapping passes. The 220 RPM brush speed ensures thorough scrubbing, while the 32-inch squeegee efficiently recovers dirty water into the 14.5-gallon recovery tank.

3. Dirty Water Disposal

Once cleaning is complete or the recovery tank is full, locate the dirty water outlet to drain the collected water. Dispose of dirty water according to local regulations.

MAINTENANCE

1. Battery Charging

After each use, connect the scrubber to the charger. A full charge takes approximately 6 hours. Do not overcharge the batteries. Store the machine in a cool, dry place when not in use.

2. Tank Cleaning

Regularly clean both the solution and recovery tanks to prevent residue buildup and maintain hygiene. Rinse thoroughly with clean water after each use.

3. Brush and Squeegee Inspection

Inspect the scrub brush and squeegee blades regularly for wear and tear. Replace them as needed to ensure optimal cleaning performance and water recovery.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Machine does not power on.	Low battery charge; Power switch off; Loose battery connection.	Charge batteries; Turn on power switch; Check battery connections.
Poor cleaning performance.	Worn brush/pad; Incorrect solution concentration; Clogged solution nozzle.	Replace brush/pad; Adjust solution; Clean nozzle.
Water not being recovered.	Worn squeegee blades; Recovery tank full; Clogged recovery hose.	Replace squeegee blades; Empty recovery tank; Clear hose.

SPECIFICATIONS

Brand: Dapper Supply

Model Number: DP-WBFS1200

Brush Speed: 220 RPM

Solution Tank Capacity: 13 gallons

Recovery Tank Capacity: 14.5 gallons

Squeegee Width: 32 inches

Battery System: Dual 12V batteries (included)

Charging Time: Approximately 6 hours

Runtime: 4.5 hours per charge

Cleaning Coverage: Up to 23,000 sq. ft. per hour

Product Dimensions: 51 x 31 x 43.5 inches

Included Components: Pad Driver, Scrub Brush, Set of 3 Scouring Pads

Material: Plastic

Color: White

Power Source: Battery Powered

GTIN: 00860010434611
