ANTSKU solid wood gazebo

ANTSKU 12'x12' Hardtop Gazebo with Cedar Wood Frame - Instruction Manual

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, maintenance, and troubleshooting of your ANTSKU 12'x12' Hardtop Gazebo. This outdoor structure features a durable cedar wood frame and a galvanized steel double roof, designed for long-lasting outdoor use. Please read this manual thoroughly before beginning assembly or use to ensure safe and correct installation and operation.

HARDTOP DOUBLE ROOF

Double Roof Design
Keep ventilation

Anti-aging Panel
Long time service life

Tight Solid Structure
Provide comfortable space

SAFETY INFORMATION

- Always follow all assembly instructions carefully.
- Ensure all bolts and fasteners are securely tightened before and after assembly.
- Do not attempt to assemble the gazebo during strong winds or adverse weather conditions.
- It is recommended that 3-4 people assist with the assembly process for safety and ease.
- Anchor the gazebo securely to the ground using appropriate expansion screws for stability, especially in windy areas.
- Regularly inspect the structure for any loose parts or damage and address them promptly.
- Keep children and pets away from the assembly area.

SETUP AND ASSEMBLY

The ANTSKU Hardtop Gazebo comes with all necessary hardware and a detailed installation manual. Please ensure you have all components before starting assembly. The gazebo is packaged in 4 boxes. We recommend assembling with 3-4 people.

Key Assembly Features:

- **Pre-drilled Base:** Each post features a pre-drilled base for easy anchoring.
- **Expansion Screws:** For enhanced stability, especially in areas prone to wind, the use of expansion screws is highly recommended to secure the gazebo to the ground.
- **Triangular Stable Design:** The 4 corners are reinforced with a triangular stable design for increased durability and safety.

Refer to the separate installation manual included in your package for step-by-step assembly instructions and diagrams.

OPERATING INSTRUCTIONS

Your ANTSKU Hardtop Gazebo is designed for versatile outdoor use, providing a comfortable and protected space.

Curtains and Netting:

The gazebo features a double-track system with double-sided zippers for the inner polyester nettings and outer privacy curtains. This system allows for quick and easy adjustment.

- **Inner Polyester Nettings:** These maintain good ventilation while blocking insects, ensuring an open view.
- **Outer Privacy Curtains:** These provide privacy, block wind, and help retain warmth, creating a safe and comfortable environment.

MULTIPLE MODES

Inner Polyester Nettings

Keep ventilation

Block bugs out

Outer Privacy Curtains

Provide privacy place

Block the wind

Keep warm

All-Weather Use:

The galvanized steel double roof is designed to withstand various weather conditions, providing sun protection,

waterproofing, and snow resistance.

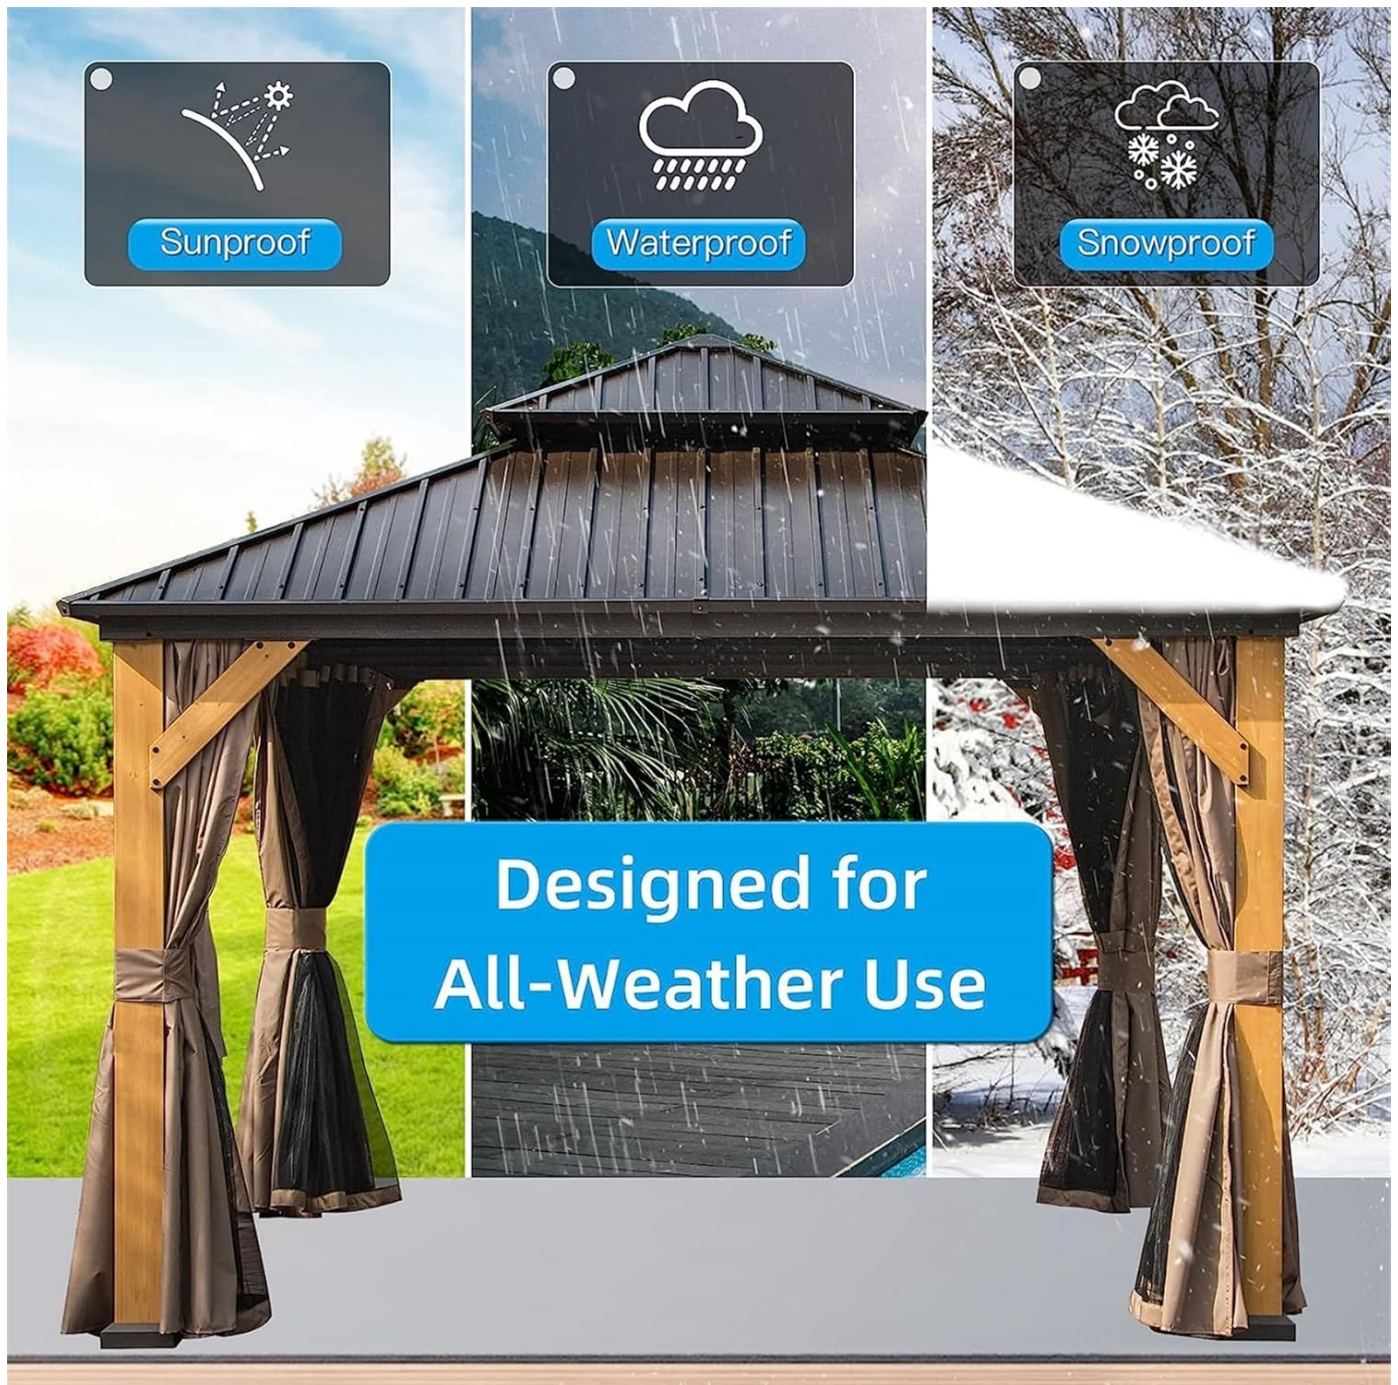

Figure 4: All-weather protection features of the gazebo.

Integrated Hooks:

Hooks are built into the center of the gazebo, allowing you to hang lights or other decorations to enhance your outdoor space.

MAINTENANCE

Regular maintenance will help prolong the life and appearance of your gazebo.

- **Roof Care:** The galvanized steel roof is designed to prevent fading and prolong service life. Periodically clean the roof to remove leaves, debris, and dirt.
- **Frame Care:** The premium cedar frame is resistant to fading, rust, and corrosion. Clean the wood frame with a mild soap and water solution as needed. Avoid harsh chemicals that may damage the wood finish.

- **Curtains and Netting:** The polyester curtains and netting can be cleaned with a damp cloth and mild detergent. Ensure they are completely dry before retracting or storing for extended periods to prevent mildew.
- **Hardware Inspection:** Annually, or more frequently if exposed to harsh weather, check all bolts, screws, and connections to ensure they remain tight. Tighten any loose hardware.
- **Winterization:** While the gazebo is designed for snow resistance, in areas with heavy snowfall, it is advisable to regularly clear snow from the roof to prevent excessive accumulation and potential structural stress.

TROUBLESHOOTING

This section addresses common issues you might encounter with your gazebo.

- **Gazebo feels unstable:** Ensure all anchoring points are properly secured to the ground using expansion screws. Double-check all frame connections and tighten any loose bolts.
- **Water leakage from roof:** Verify that all roof panels are correctly installed and sealed according to the assembly instructions. Check for any damage to the galvanized steel panels.
- **Curtains/Netting not sliding smoothly:** Inspect the double-track system for any obstructions or debris. Clean the tracks and ensure the zippers are not damaged.
- **Wood frame discoloration:** While cedar is resistant to fading, prolonged exposure to extreme elements can affect its appearance. Regular cleaning and optional wood treatment can help maintain its look.

If you encounter issues not listed here or require further assistance, please contact customer support.
