birdsnap H53

birdsnap H53 Hummingbird Feeder with Camera User Manual

Model: H53

INTRODUCTION

Welcome to the user manual for your birdsnap H53 Hummingbird Feeder with Camera. This manual provides detailed instructions for the setup, operation, maintenance, and troubleshooting of your device. Please read this manual thoroughly before using the product to ensure proper functionality and safety.

IMPORTANT SAFETY INFORMATION

- Always follow local regulations and guidelines for feeding wildlife.
- Keep the feeder clean and dry to prevent mold and bacterial growth.
- Always unplug the device and remove the camera before cleaning.
- Dispose of the product and its components in accordance with local recycling regulations.
- Always supervise children when using this product.
- This product is not a toy and should not be used as such.

PACKAGE CONTENTS

Verify that all items are present in your package:

- Hummingbird Feeder
- Ant Moat
- Brush
- Hook
- Manual
- Mounting Kit

Refill Nectar Easily

01 Take off the feeder base

02 Hold the feeder upside down and pour nectar

**03** Put on the base and lock tightly

04 Flip the feeder back and insert the camera

All components included in the birdsnap H53 package.

PRODUCT OVERVIEW

The birdsnap H53 is a smart hummingbird feeder equipped with a 2K camera for live streaming and recording. It features a 32GB memory card for local storage, an integrated ant moat, and AI bird identification capabilities. The feeder is designed to be hummingbird-friendly with realistic soft flowers and perches, and a silicone mechanism to deter bees.

SETUP

1. Charging the Camera

The camera unit houses a 5200mAh rechargeable battery. Before initial use, fully charge the camera using the provided Type-C cable. The camera is removable from the feeder for convenient charging.

Hummingbird Friendly Design

Ant Moat (Hanging)

Ant Moat (Mounting Brackert)

Anti-Bee

The camera unit can be removed for charging via Type-C cable.

2. App Installation and Wi-Fi Connection

Download the birdsnap application from your device's app store. Follow the in-app instructions to connect your camera to your home's 2.4Ghz Wi-Fi network. Note that the feeder is not compatible with 5Ghz networks.

3. Mounting Options

The birdsnap H53 offers versatile mounting options to suit your yard. It can be mounted on a wall, stand, tree, or fence using the included mounting kit. Choose a location that provides a clear view for the camera and is easily accessible for refilling and cleaning.

Cloud PKG	STG loop STG capacity	AI recognition	Maximum Video Time	Monthly Subscription	Annual Subscription
No plan	3-days cycle (≤0.5GB)	No	20s	No	No
Basic	15-days cycle (≤3GB)	Yes	3min	$ 2.99	$ 31.99
Plus	30-days cycle (≤5GB)	Yes	3min	$ 4.99	$ 48.49
Pro	60-days cycle (≤10GB)	Yes	3min	$ 7.99	$ 86.99

1. AI recognition requires basic/plus/pro cloud subscription.
2. Video time extends from 20s to 3min after cloud subscription.

30 Day Free Cloud Service

Correct procedure to prevent nectar leakage after refilling.

5. Ant Moat Setup

The feeder includes an ant moat designed to prevent ants from reaching the nectar. Fill the ant moat with water. This creates a barrier that ants cannot cross.

OPERATION

1. Live Stream and Notifications

Once connected, the 2K camera provides a vivid and clear live stream of your feeder. The birdsnap app will notify you when a bird is detected, allowing you to watch birds up close anytime, anywhere.
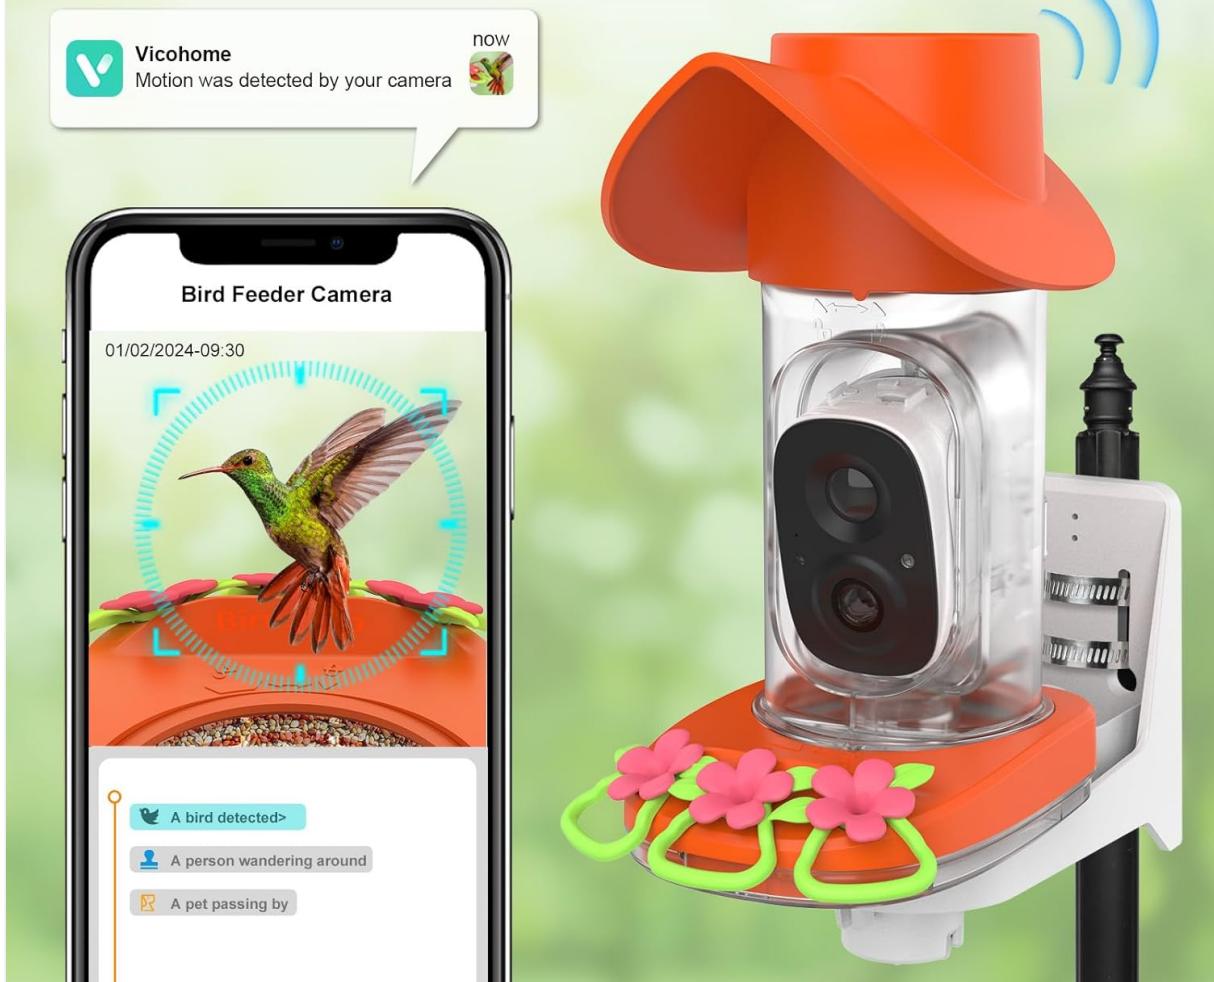

App interface displaying bird detection and live stream.

2. AI Identification

The birdsnap H53 features AI identification capable of recognizing over 10,000 bird species. A 30-day free trial is available for this feature, with subscription required for continued use and extended video recording times.
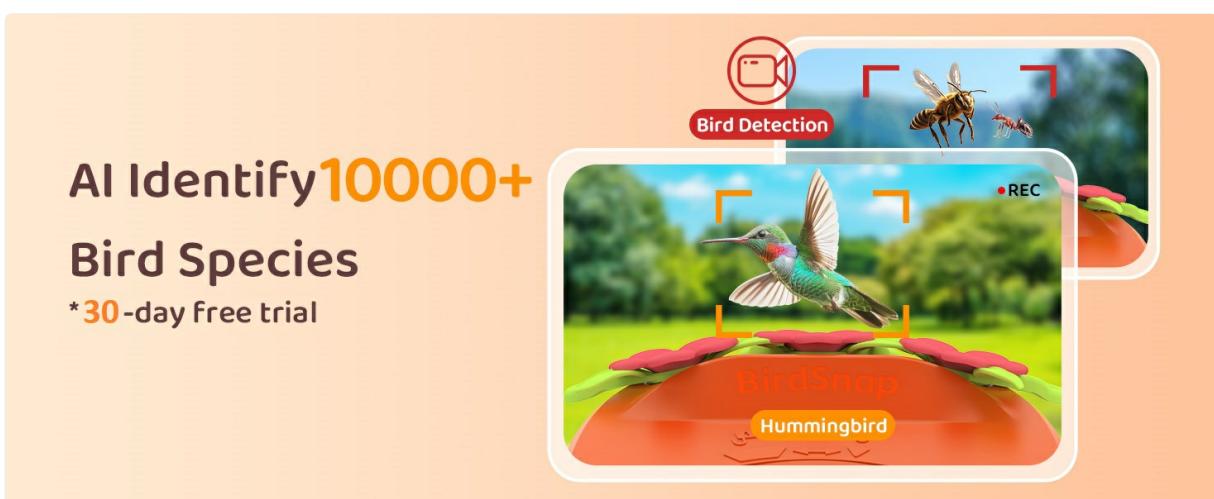

AI identification recognizing a hummingbird.

3. Storage

The feeder comes with a 32GB memory card for local video storage. Additionally, 0.5GB of lifetime free cloud storage is provided, offering a 3-day loop recording. Cloud subscription plans are available for increased storage and features.

4. Sharing

You can share access to your bird camera with up to three other phones, allowing family and friends to enjoy bird watching simultaneously.

MAINTENANCE

1. Cleaning the Feeder

Regular cleaning is essential to maintain a healthy environment for hummingbirds. To clean, first remove the camera unit. Then, detach the feeder base and separate all components. Wash all parts thoroughly with warm water and a mild soap. Use the provided brushes to clean hard-to-reach areas and feeding ports. Rinse all parts completely and allow them to dry before reassembling.

TROUBLESHOOTING

- **Feeder is leaking:** Ensure all parts are securely assembled after refilling or cleaning. Double-check that the base is tightly locked and the feeder is flipped correctly after filling nectar as shown in the 'Refilling Nectar' section.

- **Camera not connecting to Wi-Fi:** Verify your Wi-Fi network is 2.4Ghz. Ensure the camera is within range of your router. Restart both the camera and your router, then attempt to reconnect via the app.

- **No bird detections:** Check camera placement to ensure a clear view of the feeding ports. Verify motion detection settings in the app are enabled and sensitivity is adjusted appropriately.

- **Ants or bees present:** Ensure the ant moat is filled with water. Check that the silicone bee guards are properly in place around the feeding ports.

- **Short battery life:** Ensure the camera is fully charged. Extreme temperatures can affect battery performance.

SPECIFICATIONS

Feature	Detail
Brand	birdsnap
Model Number	H53
Target Species	Hummingbird
Material	Plastic
Special Features	Bee Resistant, Built-In Ant Moat, 2.4Ghz WiFi (not for 5G), Weatherproof
