4. OPERATING INSTRUCTIONS

The Bosch Hand Blender is designed for blending liquids, pureeing cooked foods, and preparing sauces or soups.

General Use

1. Ensure the blending wand is securely attached to the motor unit.
2. Place the food to be processed in a suitable container. For best results, use a tall, narrow container.
3. Immerse the blending wand into the food before plugging the appliance into the mains socket.
4. Press and hold the single trigger button to start blending.
5. Move the blender gently up and down in the container to ensure even blending. The anti-splash design helps minimize mess.
6. Release the button to stop the appliance.
7. Unplug the appliance from the mains socket immediately after use and before cleaning.

Tips for Best Results

- For hot liquids, allow them to cool slightly before blending to avoid steam buildup and potential burns.
- Do not fill containers too full to prevent overflow.
- Avoid blending hard ingredients like ice cubes or whole spices, as this can damage the blades or motor.
- For thicker mixtures, add a small amount of liquid to aid blending.

5. MAINTENANCE & CLEANING

Regular cleaning ensures optimal performance and extends the life of your hand blender.

Cleaning Instructions

1. **Always unplug the appliance before cleaning.**
2. **Motor Unit:** Wipe the motor unit with a damp cloth. Never immerse it in water or other liquids.
3. **Blending Wand:** Detach the blending wand from the motor unit. Rinse the blending wand under running water immediately after use. For thorough cleaning, you can wash it with warm soapy water using a brush to safely clean around the sharp blades.
4. **Drying:** Ensure all parts are thoroughly dry before reassembling or storing.

Caution: The blades are extremely sharp. Handle with care during cleaning.

6. TROUBLESHOOTING

If you encounter issues with your Bosch Hand Blender, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Blender does not start.	Not plugged in; power outage; blending wand not properly attached.	Check power connection; verify power supply; ensure blending wand is clicked into place.
Motor stops during operation.	Overheating due to continuous use; food too thick or hard.	Unplug and let cool for 30 minutes; reduce food quantity or add liquid; avoid blending hard items.

Problem	Possible Cause	Solution
Poor blending results.	Insufficient liquid; blending wand not fully immersed; too much food.	Add more liquid; ensure wand is fully immersed; process smaller batches.
Excessive vibration or noise.	Blending wand not properly attached; damaged blade.	Re-attach blending wand securely; if blade is damaged, contact customer support.

If the problem persists after trying these solutions, please contact Bosch customer support.
