3. PRODUCT FEATURES

- **2-in-1 Brewing Style:** Allows for brewing with either standard K-cup compatible pods or your own ground coffee/tea.
- **Reusable Design:** Constructed from durable materials for multiple uses, reducing waste from disposable filters.
- **Large Capacity Filter Basket:** The ground coffee basket can hold up to 0.5 oz (approximately 14 grams) of ground coffee.
- **Nylon Mesh Filter:** Ensures efficient filtration for a clean brew.

4. SETUP AND INSTALLATION

Before first use, wash the reusable filter components with warm, soapy water and rinse thoroughly. Ensure all parts are dry before assembly.

4.1 Using with K-Cup Compatible Pods

1. Place a standard K-cup compatible pod into the K-cup holder.
2. Ensure the pod is seated correctly and securely.
3. Insert the assembled K-cup holder into your Teglu coffee maker's brew chamber.

4.2 Using with Ground Coffee

1. Open the lid of the reusable ground coffee filter basket.
2. Fill the basket with your desired amount of ground coffee, up to the "MAX" line or approximately 0.5 oz (14 grams). Do not overfill.
3. Close the lid securely.
4. Insert the filled ground coffee filter basket into your Teglú coffee maker's brew chamber.

5. OPERATING INSTRUCTIONS

Once the filter is correctly installed in your Teglú coffee maker (CM-206 or CM-208), follow your coffee maker's standard operating procedures:

1. Ensure the water reservoir of your coffee maker is filled with fresh water.
2. Place your coffee mug on the drip tray.
3. Select your desired brew size (if applicable on your model).
4. Press the brew button to start the brewing cycle.
5. Wait for the brewing cycle to complete.
6. Carefully remove the filter after brewing, as it may be hot.

6. CARE AND MAINTENANCE

Regular cleaning of your reusable filter will ensure optimal performance and longevity.

6.1 Daily Cleaning

- After each use, remove the filter from the coffee maker.
- Discard used coffee grounds or K-cup pod.
- Rinse the filter thoroughly under running water to remove any remaining coffee particles.
- For ground coffee filters, use a small brush (if necessary) to clean the mesh.
- Allow the filter to air dry completely before next use or storage.

6.2 Deep Cleaning

- Periodically, wash the filter with warm, soapy water.
- Rinse thoroughly to remove all soap residue.
- Ensure no coffee oils or residues remain, as these can affect coffee flavor.

Do not use abrasive cleaners or scrubbers, as these can damage the filter mesh.

7. TROUBLESHOOTING

If you encounter issues while using your Teglú Reusable K-Cup and Ground Coffee Filter, refer to the following common solutions:

- **Coffee grounds in cup:**
 - Ensure the ground coffee filter lid is securely closed.
 - Do not overfill the ground coffee basket.
 - Use a coarser grind of coffee if the issue persists.

- **Slow brewing or no coffee:**

- Check if the filter is clogged. Clean thoroughly as per maintenance instructions.
- Ensure the filter is correctly seated in the coffee maker.
- Verify that the coffee maker's water reservoir is filled.

- **Filter not fitting correctly:**

- Confirm your coffee maker model is CM-206 or CM-208.
- Ensure no foreign objects are obstructing the brew chamber.

For issues related to the coffee maker itself, please consult your Teglu CM-206 or CM-208 coffee maker manual.
