- **Main Lens:** For capturing photos and videos.
- **Selfie Lens:** Located on the front for self-portraits.
- **Display Screen:** 2.4-inch screen for viewing photos, videos, and navigating menus.
- **Print Output Slot:** Where printed photos emerge.
- **Control Buttons:** Power, Shutter, Navigation (Up, Down, Left, Right), Menu, Print.
- **USB Port:** For charging and data transfer.
- **SD Card Slot:** For inserting the memory card.

## 4. SETUP

### 4.1 Charging the Camera

Before first use, fully charge the camera. Connect the provided USB charging cable to the camera's USB port and the other end to a standard USB power adapter (not included) or a computer's USB port. The charging indicator will illuminate during charging and turn off when complete.

The camera features an 800mAh rechargeable battery, providing approximately 3-4 hours of usage on a full charge.

## 4.2 Inserting the SD Card

The camera comes with a 64GB SD card. Locate the SD card slot on the side of the camera. Insert the SD card with the metal contacts facing down until it clicks into place. To remove, gently push the card in until it springs out.

## 4.3 Loading Print Paper

The camera uses ink-free thermal print paper. Follow these steps to load a new roll:

1. **Step 1:** Open the front flap of the camera where the print paper is housed.
2. **Step 2:** Insert a new paper roll into the compartment, ensuring it is oriented correctly. The paper should feed from the bottom of the roll towards the print output slot.
3. **Step 3:** Close the lid firmly. A small portion of the paper should protrude from the print output slot, indicating it is ready for printing.

## What in the Package:

## 5.6 Games and MP3 Playback

The camera includes built-in games and supports MP3 playback. Navigate to the respective modes via the camera's menu. Ensure MP3 files are loaded onto the SD card for playback.

## 5.7 Time-lapse Function

Utilize the time-lapse feature to capture a series of photos at set intervals (e.g., 3s, 5s, 10s). This function is accessible through the camera's menu settings.

# 6. MAINTENANCE

## 6.1 Cleaning

To clean the camera body, use a soft, dry cloth. For the lens, use a specialized lens cleaning cloth. Avoid using liquid cleaners or abrasive materials, as they may damage the camera.

## 6.2 Storage

Store the camera in a cool, dry place away from direct sunlight and extreme temperatures. When not in use for extended periods, ensure the battery is partially charged (around 50%) to prolong its lifespan.

## 7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Camera does not power on.	Battery is depleted.	Charge the camera using the provided USB cable.
Cannot take photos/videos.	SD card is full or not inserted correctly.	Check SD card insertion. Delete unnecessary files or replace the SD card.
Photos are not printing.	No print paper, paper loaded incorrectly, or print head issue.	Ensure paper is loaded correctly and sufficient. Check for any paper jams.
Poor print quality.	Low print quality setting, dirty print head, or low battery.	Adjust print quality settings. Clean the print head gently. Ensure battery is charged.
Bluetooth connection issues.	Bluetooth not enabled, camera/phone too far apart, or app issue.	Ensure Bluetooth is active on both devices. Keep devices close. Restart app/camera.
