SETUP

1. Charging the Device

Before first use, fully charge the device.

1. Connect the USB-C cable to the charging port on the device.
2. Connect the other end of the USB-C cable to a suitable power adapter (not included).
3. The LED indicator will show charging status:
 - Red light: Battery below 30%
 - Blue light: Battery 30%-70%
 - Green light: Battery above 70%

4. The LED will turn solid green when fully charged.

STANDARD EDITION

Image: Illustration of the GEEKVAPE AQ (Aegis Q) Pod Kit's durable built-in 1000mAh battery and its stable output, indicating charging via USB-C port.

2. Filling the Cartridge

The GEEKVAPE AQ (Aegis Q) Pod Kit features a convenient top-fill system.

1. Remove the drip tip cap from the top of the cartridge.
2. Locate the filling port.
3. Insert the nozzle of your e-liquid bottle into the filling port and gently squeeze to fill the cartridge. Do not overfill.
4. Replace the drip tip cap firmly.
5. Allow the cartridge to stand for 5-10 minutes after first fill to ensure the coil is fully saturated. This prevents dry hits.

3. Installing the Cartridge

Ensure the cartridge is securely installed into the device.

1. Align the cartridge with the pod slot on the device.
2. Push the cartridge firmly into place until it clicks.

OPERATING INSTRUCTIONS

Power On/Off

- Press the firing button 5 times rapidly to turn the device ON or OFF. The LED indicator will flash to confirm.

Vaping

The GEEKVAPE AQ (Aegis Q) supports both draw-activated and button-activated vaping.

- **Draw Activation:** Simply inhale from the mouthpiece to activate the device.

- **Button Activation:** Press and hold the firing button while inhaling.

Adjusting Output Level

The device offers three adjustable output levels.

- Press the firing button 3 times rapidly to cycle through the output levels.
- The LED indicator will show the current output level:
 - Red light: Low output (3.1V)
 - Blue light: Medium output (3.4V)
 - Green light: High output (3.7V)

Aegis Style, Masterpiece Design.

Following the Aegis style design, Geekvape AQ looks chic, mixed with robust metal and smooth leather decor pieces. It feels sturdy and comfortable to hold.

Tri-proof Protection, Durable AQ.

With a tri-proof technology, Geekvape AQ grants you the freedom to work and travel. It resists spills and splashes from everyday liquids. What's more, it is crack-resistant and dust-proof, holding accident-proof durability!

Image: Detailed view of the GEEKVAPE AQ (Aegis Q) Pod Kit's single button for multi-use functions, including power on/off and 3-level output adjustments, along with the precise airflow control switch.

Adjusting Airflow

Customize your vaping experience from loose to tight by adjusting the airflow.

- Locate the airflow adjustment switch on the side of the device.
- Slide the switch to your desired position to increase or decrease airflow.

Cartridge Replacement

Replace the cartridge when you notice a burnt taste, reduced vapor production, or a change in flavor.

- 1. Remove the old cartridge by pulling it firmly from the device.
- 2. Dispose of the used cartridge responsibly.
- 3. Install a new cartridge as described in the "Setup" section.

Cleaning

Regular cleaning helps maintain optimal performance and hygiene.

- Wipe the device and cartridge connection points with a dry cotton swab or tissue to remove any e-liquid condensation.
- Clean the mouthpiece regularly.
- Do not use harsh chemicals or abrasive cleaners.

Storage

- Store the device in a cool, dry place away from direct sunlight and extreme temperatures.
- Keep out of reach of children and pets.
- If storing for an extended period, ensure the battery is partially charged (around 50%) to prolong its lifespan.

TROUBLESHOOTING
