WARMITORY W23-HSWC*B

WARMITORY Heated Steering Wheel Cover

Model: W23-HSWC*B - Instruction Manual

Introduction

This manual provides essential instructions for the safe and effective use of your WARMITORY Heated Steering Wheel Cover, Model W23-HSWC*B. Please read this manual thoroughly before installation and operation to ensure proper functionality and safety.

Important Safety Information

Adherence to these safety guidelines is crucial for preventing accidents and ensuring product longevity.

- **Disconnect Power While Driving:** Once your hands are warm, or when the vehicle begins to move, disconnect the power cord connector to ensure safe driving.
- **Magnetic Head Alignment:** If the magnetic head does not return to the heating state while driving, ignore it and concentrate on driving. It will typically restore heating after several turns. If not, reinstall the magnetic connection (refer to Steps 2 and 3 in the Installation Guide) after stopping the vehicle. The magnetic head must be fully aligned for normal operation.
- **Avoid Slippage:** If the steering wheel cover slides on the wheel, discontinue use immediately. Ensure proper installation to prevent movement.
- **No Adjustments While Driving:** It is strictly prohibited to adjust the product or its connections while the vehicle is in motion.
- **Fire Safety:** Keep the product away from all fire sources.
- **Power Source:** This product cannot be recharged. It operates solely via a 12V USB power source.

Product Features

- **Rapid Heating:** Equipped with high-performance Ni-Cr heating wire, the cover warms from 0℉ to 101℉ (38℃) within approximately 3 minutes.
- **Premium Material:** Constructed from high-grade leatherette PU combined with a high-density padding layer for comfort and durability.
- **Safety Protection:** Features insulation, flame-retardant protection, and an Overheat Protection thermostat for enhanced safety.

- **User-Friendly Installation:** Designed with a non-slip rubber bottom for secure attachment and flexible, detachable power lines for easy setup.
- **Universal Fit:** Compatible with most M-size round steering wheels, typically 14.5 to 15.25 inches (37-39 cm) in diameter.

Setup and Installation

Follow these steps to properly install your heated steering wheel cover:

1. **Install Cover:** Place the heated steering wheel cover onto your vehicle's steering wheel. Ensure the seam is positioned at the top and the stitching is on the right side.
2. **Secure Magnetic Ends:** Use the provided cable ties to secure both ends of the magnetic connection onto the steering wheel. It is important that both ends of the magnet are kept in the same straight line and at the same height. If there is a height difference, use the extra tape pads adhesive to raise the lower end.
3. **Align and Secure:** Align the black square component with the seam of the steering wheel and secure it using the tape pads adhesive.
4. **Final USB Securement:** Secure the magnetic USB cable to prevent movement.

Important Notes for Installation:

- Use at least 3 cable ties to prevent slippage of the cover.
- The wire should be secured in the middle of the Velcro strap to maintain stability.

Operating Instructions

To activate the heating function:

1. Connect the USB cable to the 12V cigarette lighter adapter in your vehicle.
2. A blue light on the USB cable will illuminate, indicating that power is connected and the heating process has begun.
3. The steering wheel cover will quickly warm up, reaching its optimal temperature within approximately 3 minutes.
4. For safety, disconnect the power cord once your hands are comfortably warm or before you begin driving.

Maintenance

Proper care will extend the life of your heated steering wheel cover:

- **Cleaning:** The cover is made of leatherette PU. For minor spills or dust, wipe with a soft, damp cloth. If any adhesive residue is left after installation, it can be wiped off with a wet wipe.
- **Storage:** When not in use, store the cover in a dry place away from direct sunlight and extreme temperatures.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners or solvents, as these may damage the material or heating elements.

Troubleshooting

If you encounter any issues, refer to the following common problems and solutions:

- **Issue: Cover is not heating.**
  Solution: Ensure the USB cable is securely plugged into both the steering wheel cover and the 12V cigarette lighter adapter. Check if the blue indicator light on the USB cable is illuminated. If not, try a different 12V outlet or USB port.
- **Issue: Magnetic connection detaches or heating stops intermittently.**
  Solution: Re-check the magnetic head alignment (refer to Installation Steps 2 and 3). Ensure the magnetic head is fully aligned and securely attached. If driving, ignore and focus on the road; it should re-engage after turns. Reinstall if necessary when the vehicle is stopped.
- **Issue: Power cord gets tangled or interferes with steering.**
  Solution: Always disconnect the power cord before driving. When stationary, ensure the cable is routed away from moving parts of the steering column. Use the provided cable ties to secure the wire.
- **Issue: Cover feels too hot.**
  Solution: The product is designed for quick warming. Disconnect the power cord once the desired warmth is achieved. This product does not feature adjustable heat settings.
- **Issue: Cover slides on the steering wheel.**
  Solution: This indicates improper installation or an incompatible steering wheel size. Ensure the cover is correctly sized for your steering wheel (14.5-15.25 inches diameter) and that all cable ties are securely fastened as per installation instructions. Discontinue use if sliding persists.

Specifications

Brand	WARMITORY
Model Number	W23-HSWC*B
Material	Polyurethane Leather
Color	Deep Black
Item Weight	1.81 pounds (approx. 0.82 kg)

Package Dimensions	11.02 x 5.35 x 4.41 inches (approx. 28 x 13.6 x 11.2 cm)
Steering Wheel Diameter	14.5 - 15.25 inches (37-39 cm) - M Size
Power Input	12V DC (via cigarette lighter adapter)
Heating Performance	0℉ to 101℉ (38℃) in approx. 3 minutes
Safety Features	Overheat Protection thermostat, insulation, flame-retardant protection

Vehicle Compatibility

This heated steering wheel cover is designed to fit most M-size round steering wheels with a diameter between 14.5 and 15.25 inches (37-39 cm). Please measure your steering wheel's outer diameter to confirm compatibility.
