## IMPORTANT SAFETY INFORMATION

---

**Warning:** For safe operation and handling, keep the Quico Hair Straightener away from water and flammable materials. Always use the provided anti-scald glove to avoid burns. Unplug the device after use. Do not leave the device unattended while it is still plugged in. This product is not intended for use by children. Please refer to the user manual for additional safety information.

## PRODUCT OVERVIEW

---

The QUICO HC102 Professional Negative Ion Hair Straightener is designed for versatile hair styling, offering both straightening and curling capabilities. It features advanced technology for efficient and safe use.

- **Negative Ion Technology:** Minimizes static electricity and frizz, leaving hair smoother and shinier.
- **Ceramic Heating Plates:** Upgraded plates infused with tourmaline and ceramic powder protect hair from damage, resulting in smoother, less frizzy hair.
- **Fast Heating:** Advanced PTC heating technology allows the straightener to heat up steadily in just 15 seconds.
- **Adjustable Temperature:** Four temperature settings (320°F/360°F/390°F/450°F) cater to various hair types and styling needs.
- **Temperature Memory:** The device automatically recalls the last used temperature setting upon next power-on.
- **Worldwide Voltage:** Supports a wide voltage range of 110-240V for global use. Note: Comes with a US plug; a suitable adapter is required for other regions.
- **Auto Shut-Off:** For safety, the device automatically turns off after 60 minutes of inactivity.
- **360° Rotatable Swivel Cord:** Prevents tangling during use.

# Ideal Gift for Her

## SETUP

---

1. **Unpack:** Carefully remove all items from the packaging.
2. **Inspect:** Check the straightener and accessories for any signs of damage. Do not use if damaged.
3. **Power Connection:** Plug the straightener into a suitable electrical outlet (110-240V). If traveling internationally, ensure you use an appropriate plug adapter for your region.
4. **Prepare Hair:** Ensure your hair is clean, dry, and detangled before use.

# Classic Size, Meet your Diversified Needs

Style your hair not only at home,  
but also in the office, hotel etc.

## OPERATING INSTRUCTIONS

### Power On/Off and Temperature Adjustment

1. **Power On:** Press and hold the power button until the indicator lights illuminate.
2. **Select Temperature:** Press the power button repeatedly to cycle through the four temperature settings: 320°F, 360°F, 390°F, and 450°F. The corresponding indicator light will show the selected temperature.
3. **Fast Heating:** The straightener will reach the desired temperature in approximately 15 seconds.
4. **Temperature Memory:** The device will automatically recall the last used temperature setting upon next power-on.
5. **Power Off:** Press and hold the power button until the indicator lights turn off. The device will also automatically shut off after 60 minutes of inactivity.

**100-240V**  
**Worldwide Voltage**

Global Styling, Anytime, Anywhere.

**Note:** Includes US plug only.  
If used in Europe, UK, Australia etc other countries,  
you need to purchase a converter by yourself.

## Styling Hair

Always use the provided anti-scald glove during styling to protect your hand from heat.

### Straightening Hair:

1. Section your dry hair using the provided clips.
2. Take a small section of hair and place it between the heating plates, close to the roots.
3. Gently clamp the plates together and glide the straightener slowly down the hair section from root to tip.
4. Repeat until the desired straightness is achieved for that section.
5. Continue with remaining sections.

### Curling Hair:

1. Section your dry hair using the provided clips.
2. Take a small section of hair and clamp it between the plates near the roots.
3. Rotate the straightener 180 degrees and slowly pull it down the hair shaft, allowing the hair to wrap around the barrel.

4. Release the hair to reveal a curl.
5. Repeat for all sections to create curls.

## MAINTENANCE

1. **Cleaning:** Ensure the straightener is unplugged and completely cool before cleaning. Wipe the plates and exterior with a soft, damp cloth. Do not use abrasive cleaners or immerse the device in water.
2. **Storage:** Store the straightener in a cool, dry place. Ensure the cord is not wrapped tightly around the device to prevent damage.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Straightener does not turn on.	Not properly plugged in; power outlet issue.	Ensure the straightener is securely plugged into a working outlet. Check the power button.

Problem	Possible Cause	Solution
Not heating up.	Power issue; device malfunction.	Verify power connection. If still not heating, contact customer support.
Hair is frizzy after use.	Incorrect temperature setting; hair not fully dry.	Ensure hair is completely dry. Adjust temperature to a suitable setting for your hair type.
Device automatically shuts off.	Auto shut-off feature activated.	This is a safety feature. Turn the device back on if needed.
