5. OPERATING INSTRUCTIONS

This section covers basic operation of your monitor.

5.1 Power On/Off

Locate the power button, usually on the bottom right bezel or rear of the monitor. Press it to turn the monitor on or off.

5.2 On-Screen Display (OSD) Menu

The OSD menu allows you to adjust various monitor settings such as brightness, contrast, color temperature, input source, and more. Access the OSD menu using the buttons located on the monitor, typically on the bottom edge or rear.

- Use the navigation buttons to move through menu options.
- Press the select button to confirm a selection.
- Use the exit button to close the OSD menu.

5.3 Input Source Selection

If you have multiple devices connected, use the OSD menu or a dedicated input select button to switch between HDMI and VGA inputs.

5.4 Tilt Adjustment

Gently tilt the monitor panel forward or backward to achieve your preferred viewing angle. Do not force the tilt beyond its designed range.

6. MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your monitor.

6.1 Cleaning the Screen

- Always turn off the monitor and unplug the power cord before cleaning.
- Use a soft, lint-free cloth lightly dampened with water or a specialized screen cleaner.
- Do not spray cleaner directly onto the screen.
- Avoid using abrasive cleaners, alcohol, or ammonia-based solutions.

6.2 Cleaning the Casing

Wipe the monitor casing with a soft, dry cloth. For stubborn dirt, use a mild, non-abrasive cleaner applied to the cloth, not directly to the monitor.

6.3 General Care

- Avoid placing the monitor in direct sunlight or near heat sources.
- Ensure adequate ventilation around the monitor.
- Do not place heavy objects on the monitor or its cables.

7. TROUBLESHOOTING

If you encounter issues with your monitor, refer to the following common problems and solutions:

Problem	Possible Solution
No image on screen	Ensure the power cable is securely connected and the monitor is turned on. Check that the video cable (HDMI/VGA) is properly connected to both the monitor and the computer. Verify the correct input source is selected in the OSD menu.
Image is blurry or distorted	Check the display resolution settings on your computer and ensure they match the monitor's native resolution (1920x1080). Reconnect the video cable.
Screen flickering	Ensure the video cable is securely connected. Enable Flicker-Less technology in the OSD menu if it's not already active. Update your graphics card drivers.
No audio from speakers	Check the volume settings on both the monitor (via OSD) and your computer. Ensure the audio output is directed to the monitor.
Colors appear incorrect	Adjust color settings (brightness, contrast, color temperature) in the OSD menu. Reset the monitor to factory default settings.

If the problem persists after trying these solutions, please contact Acer customer support.
