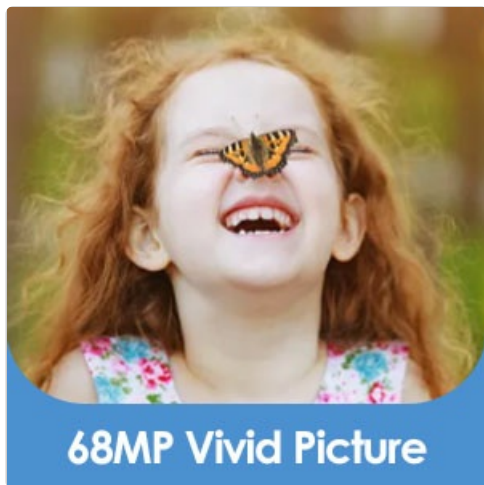

Image 5.2: Capture vivid pictures with 68MP resolution.

### 5.3. Digital Zoom

The camera features 16X digital zoom. Use the T (Telephoto) button to zoom in and the W (Wide) button to zoom out. This is useful for capturing both close-up and distant scenes.

### 5.4. Portrait and Selfie Functions

The camera automatically detects facial expressions for accurate focusing. It supports auto-delayed photography with options for 2s, 5s, and 10s delays. Face recognition and smile detection features help capture optimal moments. Two shutter release buttons allow for comfortable operation with either hand.

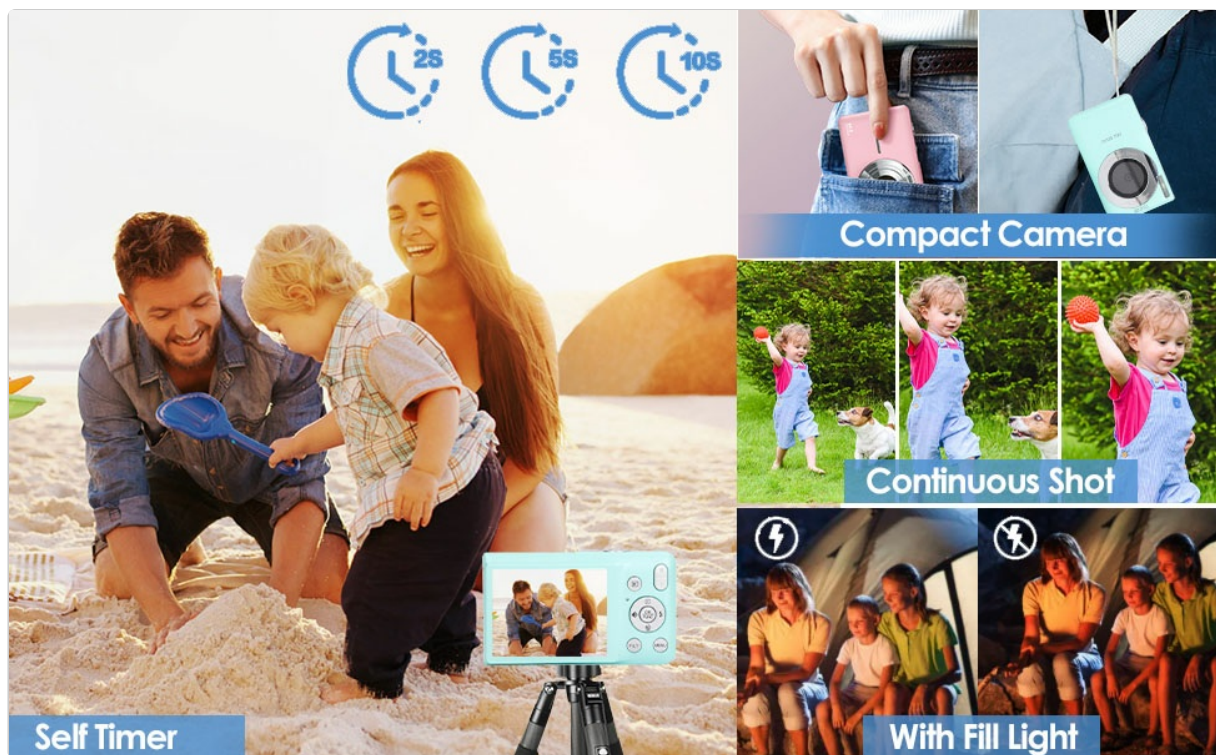

Image 5.3: Features like self-timer, compact design, continuous shooting, and fill light enhance the photography experience.

### 5.5. Beauty Filters

Enhance your photos with 20 built-in beauty filters. Access these filters via the "FILT" button or through the camera menu to adjust beauty and selfie effects, adding a unique touch to your images.

### 5.6. Connecting to a Computer and Printing

Easily connect the camera to a computer using the provided USB data cable. Once connected, you can transfer photos for instant printing. The camera also allows for cropping or rotating photos before printing.

Image 5.4: The camera offers versatile connectivity options, including a 4-in-1 interface for connecting to computers.

## 6. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera body. For the lens, use a specialized lens cleaning cloth and solution. Avoid harsh chemicals.
- **Storage:** Store the camera in a cool, dry place away from direct sunlight and extreme temperatures. If storing for extended periods, remove the battery.

- **Battery Care:** Do not expose the battery to high temperatures. Charge the battery regularly, even if not in use, to maintain its lifespan.
