### Miele 9974590

# Miele Original DKF 26-1 Odor Filter Instruction Manual

Model: 9974590

## 1. INTRODUCTION

The Miele Original DKF 26-1 Odor Filter is designed to effectively prevent the build-up of unpleasant odors in your kitchen when used with compatible Miele recirculation hoods. These filters utilize active charcoal to neutralize food smells, ensuring a fresher kitchen environment.

## Product Overview

This product includes a pack of two Miele Original DKF 26-1 Odor Filters, specifically engineered for Miele recirculation hood systems.

Image: Two Miele Original DKF 26-1 Odor Filters. These rectangular filters are designed to fit into Miele recirculation hoods to absorb kitchen odors.

## 2. SAFETY INFORMATION

Please read all instructions carefully before installation and use. Keep these instructions for future reference.

- Ensure the range hood is turned off and disconnected from power before attempting to install or replace filters.
- Handle filters with clean hands to avoid transferring grease or dirt.
- Dispose of old filters responsibly according to local regulations.

## 3. INSTALLATION GUIDE

---

These odor filters are compatible with Miele DA 7000 USA hoods. Refer to your specific Miele recirculation hood's user manual for detailed instructions on accessing the filter compartment.

### Installation Steps:

1. **Power Off:** Ensure your Miele recirculation hood is completely turned off and unplugged from the power supply to prevent accidental operation.
2. **Locate Filter Compartment:** Open the filter compartment of your Miele DA 7000 USA hood. This typically involves releasing latches or clips. Consult your hood's manual if unsure.
3. **Remove Old Filters:** Carefully remove the old odor filters. Note their orientation for correct installation of the new filters.
4. **Insert New Filters:** Place the new Miele Original DKF 26-1 Odor Filters into the compartment, ensuring they are correctly seated and oriented as the old ones were.
5. **Secure Compartment:** Close and secure the filter compartment.
6. **Restore Power:** Plug the hood back into the power supply and turn it on.

## 4. OPERATION

---

Once installed, the Miele Original DKF 26-1 Odor Filters work passively to absorb and neutralize cooking odors as air is recirculated through your Miele hood. No specific user interaction is required for their operation beyond proper installation.

## 5. MAINTENANCE AND REPLACEMENT

---

For optimal performance and effective odor control, it is recommended to replace the Miele Original DKF 26-1 Odor Filters every **6 months**. The lifespan of the filter may vary depending on cooking frequency and intensity.

### Replacement Indicators:

- Noticeable decrease in odor absorption.
- Lingering cooking smells in the kitchen after using the hood.
- Reaching the recommended 6-month replacement interval.

## 6. TROUBLESHOOTING

---

Problem	Possible Cause	Solution
Lingering odors despite hood operation.	Filters are old or saturated.	Replace the odor filters with new Miele Original DKF 26-1 filters.

Problem	Possible Cause	Solution
Filters do not fit correctly.	Incorrect filter model or improper installation.	Ensure you have the correct DKF 26-1 filters for Miele DA 7000 USA hoods. Re-check installation steps in Section 3.
