GSI Creos GT113

GSI Creos GT113 Mr. Dropper Bellows Instruction Manual

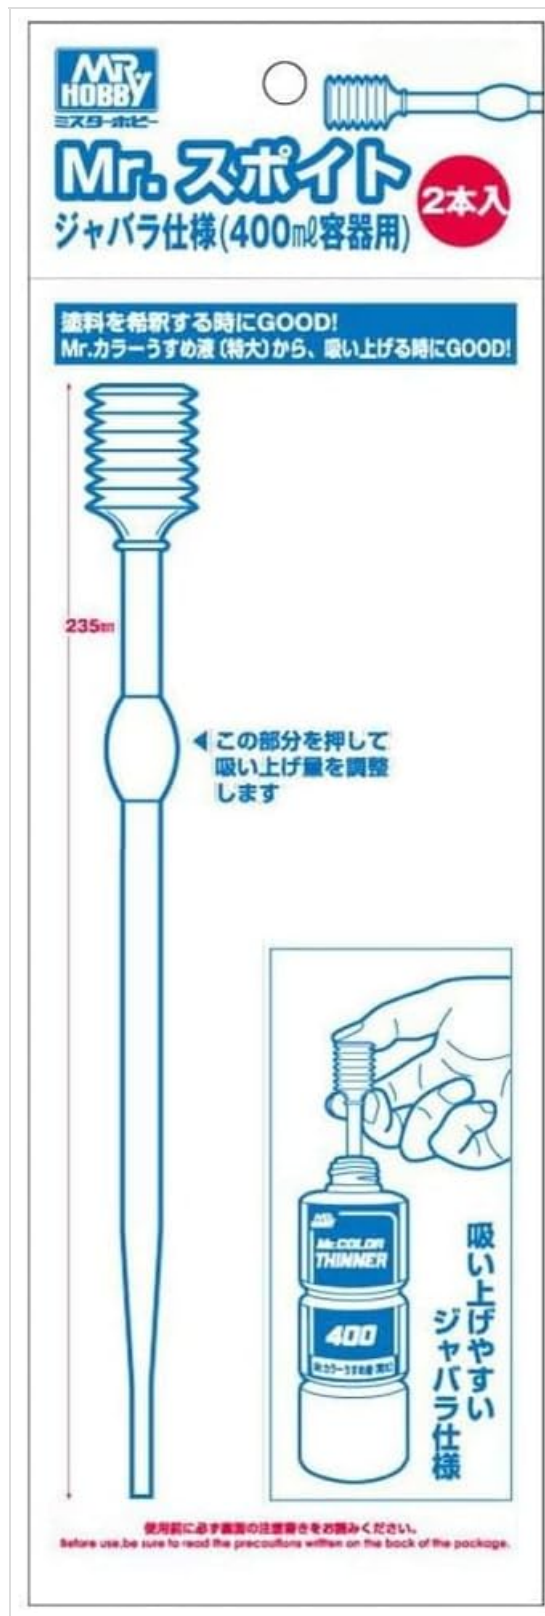

PRODUCT OVERVIEW

The GSI Creos GT113 Mr. Dropper Bellows is a specialized tool designed for hobby painting applications. It is compatible with 13.5 fl oz (400 ml) plastic containers, such as Mr. Color Thinner Liquid (Extra Large) and Mr. Leveling Thinner (Extra Large). Its unique bellows design facilitates easy liquid absorption, and the inflation part allows for precise adjustment of the suction volume. The overall length of the dropper is 9.3 inches (235 mm).

- Ideal for diluting paint and transferring liquids.
- Specifically designed for 13.5 fl oz (400 ml) poly containers.
- Bellows design ensures easy liquid absorption.
- Inflation part allows for precise suction volume adjustment.
- Length: 9.3 inches (235 mm).

SETUP

The GSI Creos GT113 Mr. Dropper Bellows requires minimal setup. Upon unpacking, ensure the dropper is clean and free from any debris. It is ready for immediate use with compatible liquid containers.

This image displays the packaging and a detailed diagram of the GSI Creos Mr. Dropper Bellows. It highlights the 235mm length and the bellows mechanism for liquid absorption and adjustment. The diagram also illustrates how the dropper fits into a Mr. Color Thinner 400ml container.

OPERATING INSTRUCTIONS

- 1. Insert into Container:** Carefully insert the narrow end of the dropper into the liquid within the compatible 13.5 fl oz (400 ml) container (e.g., Mr. Color Thinner Liquid). Ensure the dropper tip is fully submerged in the liquid.
- 2. Absorb Liquid:** Gently squeeze the bellows (inflation part) of the dropper to expel air, then release to draw liquid into the dropper. The bellows design allows for efficient absorption.

3. **Adjust Volume:** To control the amount of liquid absorbed or dispensed, press the bellows part. A gentle squeeze will draw or release smaller amounts, while a firmer squeeze will handle larger volumes.
4. **Dispense Liquid:** Position the dropper over your desired mixing cup or palette. Squeeze the bellows to dispense the absorbed liquid.

This image shows a hand holding the GSI Creos Mr. Dropper Bellows, inserting it into a Mr. Color Thinner 400ml container. The bellows part is visible, indicating the method for drawing liquid from the bottle.

Proper maintenance ensures the longevity and effective performance of your Mr. Dropper Bellows.

- **Cleaning After Use:** After each use, clean the dropper thoroughly to prevent paint or thinner residue from hardening inside.
- **Rinsing:** Rinse the dropper with an appropriate cleaning solution. For solvent-based paints, use paint thinner; for water-based paints, use water.
- **Flushing:** Squeeze and release the bellows multiple times while the dropper tip is submerged in the cleaning solution to flush out any remaining liquid.
- **Drying:** Allow the dropper to air dry completely before storage to prevent contamination or damage.

TROUBLESHOOTING

Difficulty Absorbing Liquid:

- Ensure the dropper tip is fully submerged in the liquid.
- Check for any blockages in the dropper tip or tube. Clean if necessary.
- Verify that the bellows part is sealing correctly and not damaged, allowing proper suction.
- Ensure the container is compatible and the liquid is not too viscous for the dropper.

Liquid Leaks:

- Inspect the dropper for cracks or damage.
- Ensure the bellows part is not over-compressed or damaged, which could prevent a proper seal.

SPECIFICATIONS

Model Number	GT113
Product Dimensions	9.25 x 0.79 x 0.79 inches (235 x 20 x 20 mm)
Item Weight	0.704 ounces (20 grams)
Manufacturer	GSI Creos
Compatible Container Size	13.5 fl oz (400 ml) plastic containers
Recommended Age	15 years and up
