- Keep the device clean by wiping it with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- Store the Strike Pack in a cool, dry place away from direct sunlight and extreme temperatures when not in use.
- Handle the paddles and connectors with care to prevent bending or damage.
- If paddles become loose or require adjustment, use the provided small screwdriver to tighten the screws as needed.

TROUBLESHOOTING

Common Issues and Solutions

- **Device Not Powering On:** Ensure the USB cable is securely connected to both the Strike Pack and a direct USB port on your Xbox console. If the issue persists, try unplugging and re-plugging the power cord from the controller.
- **App Not Detecting Device:** Verify that Bluetooth is enabled on your mobile device and that the Strike Pack is powered on and connected to the console. Ensure the StrikePack Central App has the necessary permissions.
- **Paddles Not Responding/Mapping Issues:** Check the paddle connections and ensure they are securely attached. Use the StrikePack Central App to re-map buttons and verify configurations. Some users have reported paddles occasionally losing their mapping; re-configuring via the app usually resolves this.
- **MODs Not Functioning (e.g., Anti-Recoil, Rapid Fire):** Ensure the MODs are correctly configured and activated within the StrikePack Central App. Some game updates or anti-cheat measures may affect MOD functionality on consoles.
- **PC/Computer Connection Issues:** The Strike Pack is designed for direct console connection. If attempting to update firmware via PC/Mac, you MUST disconnect the U-shaped USB Adapter from the mod pack and the controller before connecting to the computer. Failure to do so may prevent the computer from recognizing the mod pack and can cause damage.

CRITICAL WARNING: Plugging the Strike Pack or its cable into a PC/computer (without following specific firmware update instructions) or a wall outlet can permanently damage the device and void your warranty. Always connect directly to your Xbox console for normal operation.
