SETUP

- Initial Charge:** For shipping safety, the fog machine battery is only about 20% charged. Fully recharge the device using the provided charging cable before first use. Charging takes approximately 3 hours.
- Fill Fluid Tank:**
 - Gently lift the silicone cover on the fluid tank.
 - Locate the oil injection hole.
 - Carefully fill the tank with the LENSGO fog fluid. Ensure the tank is not overfilled.
 - Replace the silicone cover securely.
 - Wait 5 minutes after refilling before using to allow the fluid to saturate the system.
- Attach Accessories:** Select the desired tube (hard straight, hard elbow, silicone hose) and nozzle (liquid smoke filter, high pressure nozzle) for your intended effect and securely attach them to the device's output port.

MAINTENANCE

- **Fluid Management:** Always ensure there is sufficient fog fluid in the tank. Operating the machine without fluid can cause the oil tank to become hot and potentially damage the pipe.
- **Cleaning:** If the fog machine produces black smoke or strange odors, clean any remaining liquid in the tank and inject new fog fluid.
- **Storage:** Store the device in its receiving bag or case in an upright position to prevent leaks.
