7. Troubleshooting

If you encounter any issues with your coffee table, please refer to the following common solutions:

Problem	Possible Cause	Solution
Table is wobbly or unstable.	Uneven floor; loose connections; adjustable feet not properly set.	Adjust the leveling feet at the bottom of each leg until the table is stable. Check and tighten all screws and bolts. Ensure the table is on a flat surface.
Screws do not fit into holes during assembly.	Misaligned parts; defective threading; incorrect screw size.	Ensure parts are correctly aligned as per the manual. Do not force screws. If a screw hole appears defective or a part is incorrect, contact VECELO customer service for replacement parts.
Lower mesh shelf does not lie flat.	Improper assembly; bent component.	Re-check the assembly steps for the lower shelf. Ensure all support bars are correctly positioned and secured. If the component is bent, contact customer service.
Scratches or damage on surface.	Impact from sharp objects; abrasive cleaning.	Use appropriate cleaning methods and protective pads. For minor scratches, furniture repair kits may be used. For significant damage, contact customer service.
