## 6. MAINTENANCE

## 6.1 Cleaning Your Tablet

To clean your Fire HD 10, use a soft, lint-free cloth. Avoid abrasive cleaners, solvents, or aerosol sprays. For stubborn smudges, slightly dampen the cloth with water. Do not spray liquids directly onto the screen or into any openings.

## 6.2 Software Updates

Your device receives guaranteed software security updates for at least four years after its last availability for purchase as a new unit. Ensure your tablet is connected to Wi-Fi to receive and install these updates, which provide new features and security enhancements. You can check for updates in the device settings.

## 6.3 Battery Care

To maximize battery life, avoid exposing your tablet to extreme temperatures. It is best to keep the battery charge between 20% and 80% for long-term health, though occasional full charges/discharges are fine.

## 6.4 Storage Management

Regularly check your device's storage. Delete unused apps, clear app caches, and transfer large files (like photos and videos) to cloud storage or an external micro-SD card to free up internal space and maintain optimal performance.
