5. OPERATING

5.1 Basic Navigation

Navigate the Meta Quest 3 interface using either the Touch Plus controllers or hand tracking. Hand tracking allows you to interact with virtual objects using your bare hands, while controllers offer precise input for gaming and specific applications.

5.2 Mixed Reality Experiences

The Meta Quest 3 features full-color passthrough, allowing you to see your physical surroundings while digital content is overlaid. This enables mixed reality applications where virtual objects blend into your real-world

environment. Activate passthrough by double-tapping the side of the headset or through the quick settings menu.

5.4 Entertainment and Productivity

The Meta Quest 3 can be used for watching movies, browsing the web, and productivity tasks. Utilize the virtual screens to create a personal theater experience or a multi-monitor workspace.

5.5 Battery Management

The headset has an approximate battery life of 2-3 hours depending on usage. Monitor the battery level through the headset's interface. For extended sessions, consider using a compatible external power bank.

6. MAINTENANCE

6.1 Cleaning the Headset and Lenses

Use a dry microfiber cloth to gently clean the headset's exterior. For lenses, use a specialized lens cleaning cloth. Do not use liquid cleaners, alcohol, or abrasive materials, as these can damage the lenses and internal components. Avoid direct sunlight exposure to the lenses, as this can cause permanent screen damage.

6.2 Controller Care

Wipe controllers with a dry or slightly damp cloth. Ensure battery compartments are dry before inserting new batteries. Avoid dropping controllers or exposing them to extreme temperatures.

6.3 Storage

Store the Meta Quest 3 in a cool, dry place away from direct sunlight. Use the original packaging or a dedicated carrying case to protect the device from dust and physical damage.

7. TROUBLESHOOTING

7.1 Common Issues and Solutions

- **Headset not powering on:** Ensure the headset is fully charged. Try a different power outlet or charging cable.
- **Controllers not pairing:** Check controller batteries. Restart the headset and controllers. Re-pair controllers through the headset's settings menu.
- **Blurry vision:** Adjust the headset's fit and IPD (interpupillary distance) wheel. Clean the lenses.
- **Tracking issues:** Ensure your play area has adequate lighting. Clear any reflective surfaces. Restart the Guardian system setup.
- **Wi-Fi connectivity problems:** Restart your router and the headset. Ensure you are within range of your Wi-Fi network.
