### **baboni PD-2-6**

# Baboni 3-Flaps Pet Door Instruction Manual

Model: PD-2-6 (X-Large for Door with Metal Frame)

## 1. PRODUCT OVERVIEW

---

The Baboni 3-Flaps Pet Door is designed to provide your pets with the freedom to enter and exit your home independently. Constructed with a durable steel frame and a telescoping tunnel, this pet door is built for strength and longevity. Its innovative 3-flap system offers enhanced weatherproofing and energy efficiency, making it suitable for both interior and exterior door installations.

## 2. KEY FEATURES

---

- **Freedom and Independence:** Allows pets to go in and out without human assistance, ideal for potty breaks or playtime.
- **Durable Construction:** Features a metal laser welding process and high-quality steel aluminum alloy oxidation for enhanced durability and security.
- **3-Flaps Energy-Saving Design:** Comprises two vinyl flaps with magnetic closures and one insulated middle flap to protect against extreme weather and air drafts, improving energy efficiency.
- **Telescoping Tunnel:** Accommodates doors with thicknesses ranging from 1 3/8 inches to 1 57/64 inches,

ensuring a snug fit for various door types.

- **Secure Closing Panel:** Includes a slide-in metal panel for added security and to block off the opening when not in use or during severe weather.

### 3. DIMENSIONS AND SIZING

Careful measurement is crucial to ensure the correct pet door size for your pet and door. Refer to the specifications below and the pet size chart to select the appropriate model.

- **Flap Opening (X-Large):** 13 19/64" W x 23 19/32" H
- **Frame Dimensions (X-Large):** 17 11/16" W x 28 13/32" H
- **Cutout in Door (X-Large):** 14 9/16" W x 24 13/16" H
- **Telescoping Tunnel Thickness:** Accommodates doors 1 3/8" - 1 57/64" thick.
- **Weight Limit:** Up to 220 pounds.

## Door Size XL

**Note:** Please make sure the width and height of your pet's chest, then refer to our product size, select the right size pet door.

### Pet Size Chart

To determine the best fit for your pet, measure their width and height as indicated in the chart below. Ensure your pet can comfortably pass through the flap opening.

# Pet Size Chart

- A** Make sure your pet is standing
- B** Measure the width of your pet's chest
- C** Measure the height from your pet's shoulders to the bottom of chest
- D** Choose the door where both your pet's height and width fit

Size	Width	Height	Weight
M	< 8"	< 12"	< 40 lb
L	< 10"	< 16"	< 100 lb
XL	< 13"	< 23"	< 220 lb

Image 3.2: Guide for measuring your pet and selecting the appropriate door size (M, L, XL).

## Baboni Pet Door Size Chart

Door Size	Pet Size	Flap Opening	Frame Dimensions	Cutout in door	Telescoping Tunnel
Medium	Up to 40 pounds	8 1/4"W x 12 1/4"H	12 1/4"W x 17 1/8"H	9 3/16"W x 13 9/16"H	1 3/8 - 2 in thick
Large	Up to 100 pounds	10 1/4"W x 16 1/4"H	14 1/4"W x 21 1/16"H	12"W x 18 7/8"H	
X-Large	Up to 220 pounds	13 19/64"W x 23 19/32"H	17 11/16"W x 28 13/32"H	14 9/16"W x 24 13/16"H	

## 4. SETUP AND INSTALLATION

This pet door is designed for easy installation in various interior and exterior doors. A cut-out template and step-by-step instructions are included with your product. Please follow the provided instructions carefully.

## Tools and Materials Required (Not Included):

- Pencil
- Measuring Tape
- Drill with appropriate drill bits
- Jigsaw or reciprocating saw (for cutting door opening)
- Screwdriver (Phillips head)
- Level
- Safety glasses and gloves
- Silicone sealant (optional, for weatherproofing)

## Installation Steps:

1. **Prepare the Door:** Choose the desired location on your door. Ensure there are no obstructions (e.g., door handles, internal wiring) where the pet door will be installed.
2. **Measure and Mark:** Use the provided cut-out template to mark the opening on your door. Ensure the template is level and at the correct height for your pet.
3. **Cut the Opening:** Carefully cut along the marked lines using a jigsaw or reciprocating saw. For metal doors, a side grinder with a metal cut-off blade may be more effective to prevent bending.
4. **Assemble the Door Frame:** Separate the inner and outer frames of the pet door. If necessary, adjust the telescoping tunnel to match your door's thickness.
5. **Position and Secure:** Place one frame half into the cutout from one side of the door. Align the second frame half on the opposite side. Insert the mounting screws through the pre-drilled holes, ensuring they pass through both frame halves and the door. Tighten the screws securely.
6. **Seal (Optional):** For exterior doors, apply a bead of silicone sealant around the edges of the frame where it meets the door to enhance weatherproofing.

## 5. OPERATION

---

### Pet Usage:

The Baboni pet door's 3-flap system allows pets to push through easily. The magnetic closures ensure the flaps return to a closed position after your pet passes, maintaining insulation.

Image 5.1: A dog demonstrating the ease of use of the Baboni pet door.

### **Using the Closing Panel:**

The pet door includes a slide-in metal closing panel. To use it, simply slide the panel down into the designated grooves on the inside of the pet door frame. This panel provides a secure barrier, preventing access when needed (e.g., at night, during extreme weather, or when you are away).

Image 5.2: The pet door shown with its standard flaps and with the additional metal closing panel inserted for security.

## 6. MAINTENANCE

---

Regular maintenance will ensure the longevity and optimal performance of your Baboni pet door.

- **Cleaning:** Clean the flaps and frame regularly with a mild soap and water solution. Avoid abrasive cleaners that could damage the materials.
- **Inspect Flaps:** Periodically check the flaps for any signs of wear, tears, or damage. Ensure the magnetic closures are functioning correctly and the flaps seal properly.
- **Check Screws:** Over time, screws may loosen. Periodically check and tighten all mounting screws to ensure the door remains securely installed.
- **Lubrication:** If the slide-in panel becomes stiff, a small amount of silicone spray lubricant can be applied to the grooves to ensure smooth operation.

## 7. TROUBLESHOOTING

---

- **Flaps Not Closing Properly:**
  - Check for debris or dirt obstructing the magnetic strips or hinges. Clean thoroughly.
  - Ensure the door frame is installed squarely and not warped, which could prevent proper flap alignment.

- Verify that the magnets are still securely attached to the flaps and frame.
- **Pet Hesitant to Use the Door:**
  - Gently guide your pet through the door using treats or toys.
  - Temporarily tape the flaps open to allow your pet to get used to the opening, then gradually lower them.
  - Ensure the door is installed at an appropriate height for your pet.
- **Drafts or Air Leaks:**
  - Inspect the seal around the frame where it meets the door. Reapply silicone sealant if necessary.
  - Check the condition of the flaps for any gaps or damage.
  - Ensure the magnetic closures are strong enough to hold the flaps securely.

## 8. SPECIFICATIONS

Specification	Detail
Model Number	PD-2-6
Size	X-Large for Door (Metal Frame)
Minimum Compatible Thickness	1.38 Inches
Weight Limit	220 Pounds
Frame Material	Alloy steel
Product Dimensions (L x W x H)	2 x 17.69 x 28.41 inches
Item Weight	17.81 pounds
Color	White
Manufacturer	baboni

## 9. WARRANTY AND SUPPORT

Baboni is committed to providing high-quality products and excellent after-sales service. While specific warranty terms are not detailed here, the manufacturer offers an after-sales guarantee to ensure customer satisfaction. For any product inquiries, technical assistance, or support needs, please contact Baboni customer service through the retailer where the product was purchased or visit the official Baboni brand store online.
