SETUP & ASSEMBLY

Becoming a Mini MasterChef is an exciting process! Follow these steps to assemble your miniature dishes:

1. **Unbox Your Capsule:** Carefully open your Mini Brands Create capsule to reveal all the wrapped components.
2. **Identify Your Recipe:** Consult the included recipe guide to identify the specific mini dish you received and its corresponding ingredients.
3. **Prepare Your Workspace:** Ensure you have a clean, flat surface. It is recommended to place a protective layer (like wax paper or the included orange mat) underneath to prevent any resin spills.
4. **Assemble Ingredients:** Following the step-by-step visual instructions in your recipe guide, carefully place the miniature food ingredients into their designated serving dishes. Use the provided miniature utensils (like tweezers or spatulas) for precision.

Example: Ramen Dish Assembly

To assemble the miniature Ramen dish:

1. Place the miniature noodles into the bowl.
2. Add the chashu (pork slices) and boiled egg halves.
3. Carefully pour the broth resin over the ingredients.
4. Add the nori (seaweed) and green onion toppings.

Example: Fruit Tart Assembly

To assemble the miniature Fruit Tart:

1. Place the tart base on the serving plate.

2. Pipe the whipped cream resin into the tart base.
3. Arrange the miniature fruit pieces (e.g., kiwi, berries, strawberries) on top of the whipped cream.
4. Drizzle the syrup resin over the fruit to secure them.

OPERATING INSTRUCTIONS

Curing Your Mini Dish with UV Light

The UV LED chef's hat is essential for curing the resin and setting your mini dish permanently. This process hardens the resin, ensuring your creation maintains its form.

1. **Activate UV Light:** Locate the switch on the bottom of the miniature chef's hat and turn it on. The hat will emit a blue UV light.

2. **Position for Curing:** Place the chef's hat directly over your assembled mini dish, ensuring the UV light covers the resin completely.
3. **Curing Time:** Allow the UV light to cure the resin for approximately 5-10 minutes, or until the resin is completely hardened and no longer sticky. For thicker layers of resin, additional curing time (up to 20-30 minutes) may be required.
4. **Final Check:** Once cured, the dish should be solid and dry to the touch. If it remains sticky, continue curing for a few more minutes.

MAINTENANCE & CARE

To ensure the longevity of your Mini Brands Create MasterChef dishes and accessories:

- **Cleaning:** Wipe any excess uncured resin from tools or surfaces immediately with a damp cloth. Once cured, the resin is permanent.
- **Storage:** Store your finished mini dishes and accessories in a cool, dry place away from direct sunlight to prevent discoloration or degradation over time.
- **Handling:** Handle finished dishes with care. While cured, they are still miniature and can be delicate.

TROUBLESHOOTING

- **Resin Not Curing:** Ensure the UV light is directly over the resin and that the batteries in the chef's hat are not depleted. Increase curing time if necessary.
- **Sticky Residue:** If the resin remains slightly sticky after curing, try curing for an additional 5-10 minutes. Ensure the resin layer is not too thick, which can hinder full curing.
- **Missing Components:** If any components are missing from your capsule, please contact Mini Brands customer support for assistance.
