Ring Outdoor Cam (Stick Up Cam) Battery Instruction Manual

Model: Ring Outdoor Cam (Stick Up Cam) Battery

INTRODUCTION

The Ring Outdoor Cam (Stick Up Cam) Battery is a versatile, weather-resistant security camera designed for both indoor and outdoor use. This battery-powered device allows you to monitor your property, see, hear, and speak to visitors from your phone, tablet, or select Echo devices. It features Live View, color night vision, two-way talk, and motion alerts to enhance your home security.

SETUP

Setting up your Ring Outdoor Cam (Stick Up Cam) Battery is a straightforward process, typically taking 5-10 minutes. Ensure you have a high-speed internet connection and a 2.4 GHz Wi-Fi network available.

What's Included in the Box:

- Outdoor Cam (Stick Up Cam) Battery
- Quick Release Battery Pack
- Micro USB Charging Cable
- User Manual
- Security Sticker
- Screws and Wall Anchors

Installation Steps:

1. **Charge the Battery:** Fully charge the Quick Release Battery Pack using the provided Micro USB Charging Cable before initial setup.
2. **Insert Battery:** Insert the charged battery pack into the camera.
3. **Download the Ring App:** Download the Ring app from your device's app store.
4. **Connect to Wi-Fi:** Follow the in-app instructions to connect your camera to your 2.4 GHz Wi-Fi network.
5. **Mounting:** The camera features an integrated mounting base/stand with an adjustable angle. It can sit freestanding on a flat surface or be mounted to a wall using the included screws and wall anchors. For ceiling mounting, an additional Mount for Outdoor Cam (Stick Up Cam) is sold separately.

OPERATING INSTRUCTIONS

The Ring Outdoor Cam provides comprehensive monitoring and interaction features accessible through the Ring app and
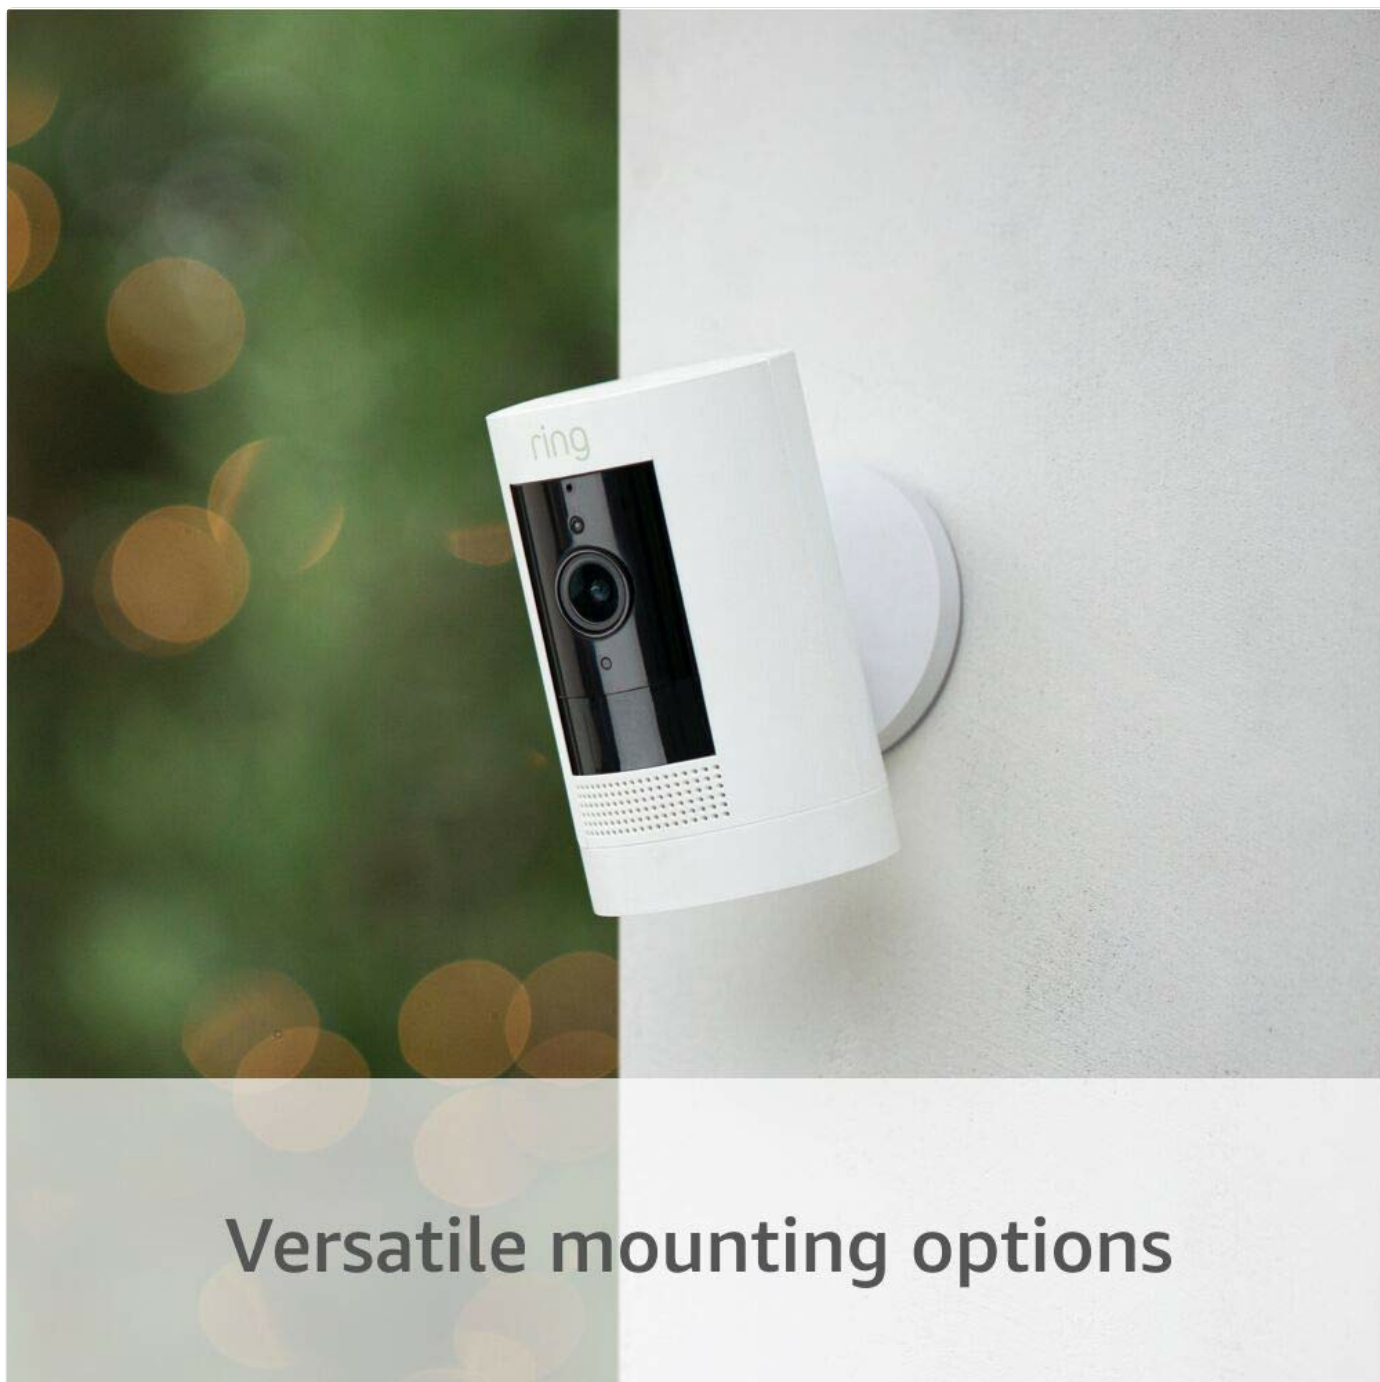

compatible smart devices.

Key Features:

- **1080p HD Video:** Enjoy clear, high-definition video quality.
- **Live View:** Access a real-time video feed of your property at any time through the Ring app.
- **Color Night Vision:** Provides enhanced visibility in low-light conditions.
- **Two-Way Talk with Noise Cancellation:** Communicate with people on your property from anywhere using your phone or tablet.
- **Motion Alerts:** Receive instant notifications on your device when motion is detected. Customizable privacy zones and audio privacy features allow you to focus on relevant areas.
- **Wide Field of View:** The camera offers a 130° diagonal, 110° horizontal, and 57° vertical field of view.

Ring Protect Subscription (Sold Separately):

For advanced features such as saving recorded videos for up to 180 days, receiving alerts for people and packages, and more, a Ring Protect subscription is required. Without a subscription, you can only access Live View and will not have recorded video history.

MAINTENANCE

- **Battery Charging:** The Quick-Release Battery Pack provides long-lasting power. Battery life varies based on usage and environmental factors. When the battery level is low, remove the pack and charge it using the Micro USB Charging Cable.
- **Weather Resistance:** The camera is designed to be weather-resistant, operating in temperatures from -5°F to 122°F (-20°C to 50°C). While it handles rain and snow well, it is splash-resistant, not fully waterproof.
- **Software Updates:** This device receives guaranteed software security updates for at least four years after its last availability for purchase as a new unit. Ensure your device is connected to Wi-Fi to receive automatic updates.

- **Cleaning:** Periodically clean the camera lens and housing with a soft, damp cloth to ensure optimal video clarity. Avoid abrasive cleaners.

TROUBLESHOOTING

If you encounter issues with your Ring Outdoor Cam, consider the following common solutions:

- **Connection Issues (Offline/Choppy Video):**

  - **Check Signal Strength:** In the Ring app, navigate to Device Health to check the RSSI (Received Signal Strength Indicator) for your camera. A strong signal is crucial for reliable performance. An RSSI closer to 0 (e.g., -30 to -60) indicates a stronger connection.
  - **Router Proximity:** Ensure your Wi-Fi router or a mesh Wi-Fi node is within optimal range of the camera. Obstructions like thick walls can weaken the signal.
  - **Reboot Router:** Try rebooting your Wi-Fi router and then resetting/reconnecting the camera through the Ring app.

- **Notifications Not Received:**

  - **App Permissions:** Verify that the Ring app has notification permissions enabled in your phone's settings.
  - **In-App Settings:** Check motion detection settings and notification preferences within the Ring app. Ensure motion alerts are enabled for the specific camera.

- **Battery Draining Quickly:**

  - **Motion Frequency:** High motion detection frequency in busy areas can lead to faster battery drain. Adjust motion sensitivity and zones in the app.
  - **Live View Usage:** Frequent use of Live View will consume more battery.
  - **Temperature:** Extreme cold temperatures can reduce battery performance.

- **Two-Way Talk Audio Issues:**

  - **Microphone/Speaker Access:** Ensure the Ring app has microphone access permissions on your device.
  - **Internet Speed:** A stable internet connection is necessary for clear two-way audio.
