USAGE

Once the replacement parts are installed, your WYZE Robot Vacuum Cleaner WVCR200S will operate with renewed efficiency. The new main roller brush and side brushes will effectively sweep and agitate debris, while the fresh HEPA filter will ensure optimal air filtration, capturing fine particles and allergens. Regular use of the cleaning tool will help maintain these components between replacements.

MAINTENANCE

Proper maintenance of your replacement accessories will extend their lifespan and ensure consistent cleaning performance.

Regular Cleaning

- **Main Roller Brush:** Periodically remove the main brush and use the provided cleaning tool to cut and remove any tangled hair or debris.
- **Side Brushes:** Check side brushes for tangled hair or debris. If bristles are bent, they can often be restored by soaking them in hot water for a few minutes.
- **HEPA Filter:** Tap the filter gently over a trash can to dislodge dust. Use the brush end of the cleaning

tool to remove fine dust from the filter pleats. Do not wash the HEPA filter with water unless explicitly stated as washable by the manufacturer.

Replacement Schedule

To ensure your vacuum cleaner maintains optimal performance, it is recommended to replace the accessories every three months. Regular replacement extends the device's lifespan and improves cleaning efficiency.

TROUBLESHOOTING

- **Reduced Suction:** Check if the HEPA filter is clogged with dust. Clean or replace the filter as necessary.
- **Brushes Not Spinning:** Inspect the main roller brush and side brushes for tangled hair or debris that might be obstructing their movement. Remove any blockages using the cleaning tool.
- **Unusual Noises:** Ensure all brushes and filters are correctly installed and seated. Remove any foreign objects that may have become lodged in the brush mechanisms.
