Installation Steps

1. **Safety First:** Turn off power at the circuit breaker.
2. **Mounting Bracket:** Secure the mounting bracket to the ceiling junction box. Ensure it is firmly attached and can support the fan's weight.
3. **Assemble Downrod:** Feed the electrical wires from the fan motor through the chosen downrod.
4. **Hang Fan:** Carefully lift the fan assembly and hang it from the mounting bracket.
5. **Wiring:** Connect the electrical wires according to the provided wiring diagram in the detailed instructions. Ensure all connections are secure.
6. **Attach Blades:** Securely attach the fan blades to the motor housing.
7. **Install Light Kit:** Connect and install the LED light kit.
8. **Final Assembly:** Attach the canopy and light cover.
9. **Power On:** Restore power at the circuit breaker and test the fan.

OPERATING INSTRUCTIONS

Your VONLUCE ceiling fan is operated using the included remote control, offering a range of functions for personalized comfort.

Remote Control Functions

- **Power On/Off:** Turns the fan and light on or off.
- **Fan Speed Control:** Adjusts the fan speed through 6 levels.
- **Light Control:** Dims the light and adjusts color temperature.
- **Reversible Motor:** Changes the direction of blade rotation for seasonal use.
- **Timer Function:** Sets the fan to turn off after 1, 4, or 8 hours.

Adjustable Fan Speeds

The fan offers 6 adjustable speeds to suit your preference:

- **Speed 1-2:** Gentle Breeze (Sleep Mode) for quiet, subtle air movement.
- **Speed 3-4:** Natural Wind for comfortable, moderate airflow.
- **Speed 5-6:** Cooling Air (High Speed Mode) for maximum air circulation.

Dimmable LED Light Kit

The integrated LED light kit provides independent and stepless adjustments for both color temperature (3000K-6500K) and brightness (10%-100%). This allows you to customize the lighting to create the perfect ambiance for any activity.

Reversible DC Motor for Year-Round Comfort

The reversible DC motor allows you to change the direction of the fan blades. In summer, the fan rotates counter-clockwise to create a downdraft, providing a cooling effect. In winter, it rotates clockwise to create an updraft, circulating warm air trapped near the ceiling and helping to warm the room.

Ultra-Quiet Operation and Memory Function

The fan operates at a volume of less than 35dB, ensuring a quiet environment suitable for sleeping or working. The memory function remembers the last light and wind speed settings (if operated for more than 10 seconds) and resumes them when turned on again.

MAINTENANCE

Regular maintenance helps prolong the life and performance of your ceiling fan.

- **Cleaning:** Dust the fan blades and motor housing periodically with a soft, damp cloth. Do not use abrasive cleaners or solvents. Ensure the fan is turned off and power is disconnected before cleaning.
- **Light Cover:** Clean the light cover with a soft, dry cloth.
- **Tighten Fasteners:** Periodically check all screws and fasteners on the fan and mounting hardware to ensure they are secure. Loose connections can cause wobbling or noise.
- **Blade Balance:** If the fan wobbles, check that all blades are securely attached and balanced. A blade balancing kit (not included) can be used if necessary.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Fan does not start	No power to the fan; Loose wire connections; Remote control battery low or not paired.	Check circuit breaker and wall switch; Verify all wire connections are secure; Replace remote battery or re-pair remote with fan (refer to remote pairing instructions in the full manual).
Light does not work	Loose wire connection in light kit; Incorrect remote setting; LED module failure.	Check light kit wiring; Ensure light is turned on via remote and brightness is not set to minimum; Contact support if LED module is suspected to be faulty.
Fan wobbles	Loose blades or mounting hardware; Unbalanced blades; Incorrect installation.	Ensure all blade screws and mounting screws are tight; Use a blade balancing kit to correct imbalance; Recheck installation steps.
Excessive noise	Loose screws; Motor housing rubbing; Blades hitting an obstruction.	Tighten all screws; Ensure no parts are rubbing; Check for obstructions around the blades.
Remote control not responding	Low or dead battery; Remote not paired; Interference.	Replace remote battery; Re-pair remote with the fan (usually involves pressing a button combination on the remote within a short time after turning on power to the fan); Minimize interference from other electronic devices.
