## INFRAOVENS OO100, OO101, OO101B, OO101B1, OO101B2

# INFRAOVENS Reusable Liner Accessories Instruction Manual

For Ninja Woodfire Pizza Oven Models OO100, OO101, OO101B, OO101B1, OO101B2

Brand: INFRAOVENS

## INTRODUCTION

---

The INFRAOVENS Reusable Liner Accessories are designed to enhance your cooking experience and simplify cleanup when using your Ninja Woodfire Outdoor Oven. This set includes three distinct liners: a perforated mat, a solid liner, and a mesh mat, each serving a specific purpose to optimize various cooking methods.

These liners are compatible with Ninja Woodfire Outdoor Oven models OO100, OO101, OO101B, OO101B1, and OO101B2. They are constructed from PFOA-free fiberglass, offering non-stick properties and heat resistance up to 450°F.

## PRODUCT OVERVIEW

---

The INFRAOVENS liner set provides versatile solutions for various cooking needs:

- **Perforated Mat:** This mat features small holes designed to allow oils and grease to drip away from food, promoting healthier cooking and crispier results. It helps protect your oven's tray from excessive residue.

DESIGNED IN THE U.S.A | U.S.A BUSINESS

## PERFORATED MAT

*TO PROTECT YOUR TRAYS  
WHILE ALLOWING OILS AND GREASE  
TO DRIP AWAY FROM YOUR FOOD*

- NON-STICK
- PFOA-FREE FIBERGLASS
- DISHWASHER SAFE

 INFRAOVENS®

DESIGNED IN THE U.S.A | U.S.A BUSINESS

Image: A perforated mat placed inside the Ninja Woodfire Oven, holding chicken wings, demonstrating how it allows drippings to pass through.

- **Solid Liner:** This non-perforated mat is ideal for catching food drippings and preventing stickier, messier foods from adhering directly to your oven tray. It simplifies cleanup significantly.

DESIGNED IN THE U.S.A | U.S.A BUSINESS

## REUSABLE LINER

*TO PROTECT YOUR TRAY  
FROM STICKIER, MESSIER FOODS  
AND TO CATCH FOOD DRIPPINGS*

- NON-STICK
- PFOA-FREE FIBERGLASS
- DISHWASHER SAFE

- **Mesh Mat:** Designed with a fine mesh, this mat is perfect for dehydrating foods or cooking smaller items that might otherwise fall through the oven's rack.

DESIGNED IN THE U.S.A | U.S.A BUSINESS

## MESH MAT

*TO COOK SMALLER FOODS THAT  
WOULD OTHERWISE FALL THROUGH  
THE CRACKS OF THE RACK*

- NON-STICK
- PFOA-FREE FIBERGLASS
- DISHWASHER SAFE

 INFRAOVENS®

All three liners are made from fiberglass, are non-stick, PFOA-free, and are designed for durability and ease of use.

## SETUP AND PLACEMENT

Using the INFRAOVENS liners is straightforward:

1. Ensure your Ninja Woodfire Outdoor Oven is clean and cool before placing the liner.
2. Select the appropriate liner for your cooking task:
  - For roasting or smoking foods where drippings are desired to be caught, use the **solid liner**.
  - For cooking foods that benefit from fat drainage or crisping, use the **perforated mat**.
  - For dehydrating or cooking very small items, use the **mesh mat**.

3. Place the chosen liner directly onto the oven's cooking rack or tray. Ensure it lies flat and does not obstruct any vents or heating elements.
4. Place your food directly on the liner.

*Note:* Always ensure the liner is properly seated before adding food or starting the oven.

## OPERATING INSTRUCTIONS

---

The INFRAOVENS liners are designed to be used across various cooking functions of your Ninja Woodfire Outdoor Oven:

- **Roasting & Baking:** Use the solid liner to protect your oven tray from spills and baked-on residue. This is particularly useful for dishes with sauces or marinades.
- **Smoking:** The solid liner is excellent for catching drippings during smoking, keeping your oven cleaner and making post-smoking cleanup easier.
- **Dehydrating:** The mesh mat is specifically designed for dehydrating fruits, vegetables, or jerky, preventing small pieces from falling through the rack.
- **Broiling & Warming:** Both the perforated and solid liners can be used for broiling and warming, depending on whether you need fat drainage or full containment.

**Heat Resistance:** These mats are heat-resistant up to 450°F (232°C). Do not expose them to temperatures exceeding this limit, as it may cause damage to the liners. While the Ninja Woodfire Oven can reach higher temperatures for pizza, these liners are not intended for direct contact with extreme heat sources or temperatures above 450°F.

## MAINTENANCE AND CLEANING

---

One of the key benefits of INFRAOVENS liners is their ease of cleaning:

- **Dishwasher Safe:** All three liners are completely dishwasher safe. Simply place them in your dishwasher after use for a convenient and thorough cleaning.

Image: INFRAOVENS liners, including the mesh mat, placed in the top rack of a dishwasher, illustrating their dishwasher-safe feature.

- **Hand Washing:** For hand washing, use warm, soapy water and a soft sponge or cloth. Rinse thoroughly and allow to air dry or wipe dry before storage.
- **Storage:** Store the liners flat or rolled to prevent creasing, which could affect their performance over time.

Regular cleaning will ensure the longevity and continued non-stick performance of your liners.

## TROUBLESHOOTING

---

Issue	Possible Cause	Solution
-------	----------------	----------

Issue	Possible Cause	Solution
Liner appears damaged or warped after use.	Exposed to temperatures above 450°F (232°C).	Ensure oven temperature does not exceed 450°F when using the liners. These liners are not designed for the extreme high temperatures used for pizza stone cooking in the Ninja Woodfire Oven.
Food sticking to the liner.	Liner not properly cleaned; excessive residue buildup; damaged non-stick coating.	Clean the liner thoroughly after each use. For stubborn residue, soak in warm soapy water before cleaning. If the non-stick coating is visibly damaged, the liner may need replacement.
Liner slides around on the tray.	Improper placement; tray surface is oily or wet.	Ensure the oven tray is clean and dry before placing the liner. Position the liner flat and centered on the tray.

## SPECIFICATIONS

---

Feature	Detail
Material	Fiberglass (PFOA-free)
Color	Black
Product Dimensions	11.5"L x 11.5"W (each liner)
