Xoopar Gamma RP

Xoopar Octopus Gamma Multi-Connector USB Hub with 3000mAh Power Bank

Instruction Manual

1. PRODUCT OVERVIEW

The Xoopar Octopus Gamma is a versatile 4-in-1 multi-connector USB hub with an integrated 3000mAh power bank. Designed for convenience and portability, it allows you to charge various devices simultaneously and provides a power boost when an external power source is unavailable. This product is made from recycled plastic and features a compact, lightweight design.

Image 1.2: Key features of the Octopus Gamma, including recycled plastic construction, readiness for use, dual charging capability, and its 4-in-1 multi-adapter functionality.

2. SETUP

The Xoopar Octopus Gamma is designed for immediate use. No complex setup is required. Simply identify the appropriate connector for your device.

2.1 Identifying Connectors

The device features four types of connectors:

- **Lightning:** For Apple devices (iPhone, iPad, AirPods).
- **USB-C:** For modern Android phones, tablets, and other USB-C compatible devices.
- **Micro USB:** For older Android phones, power banks, and various accessories.
- **USB-A:** The standard USB connector for connecting to power adapters, computers, or other USB-A ports.

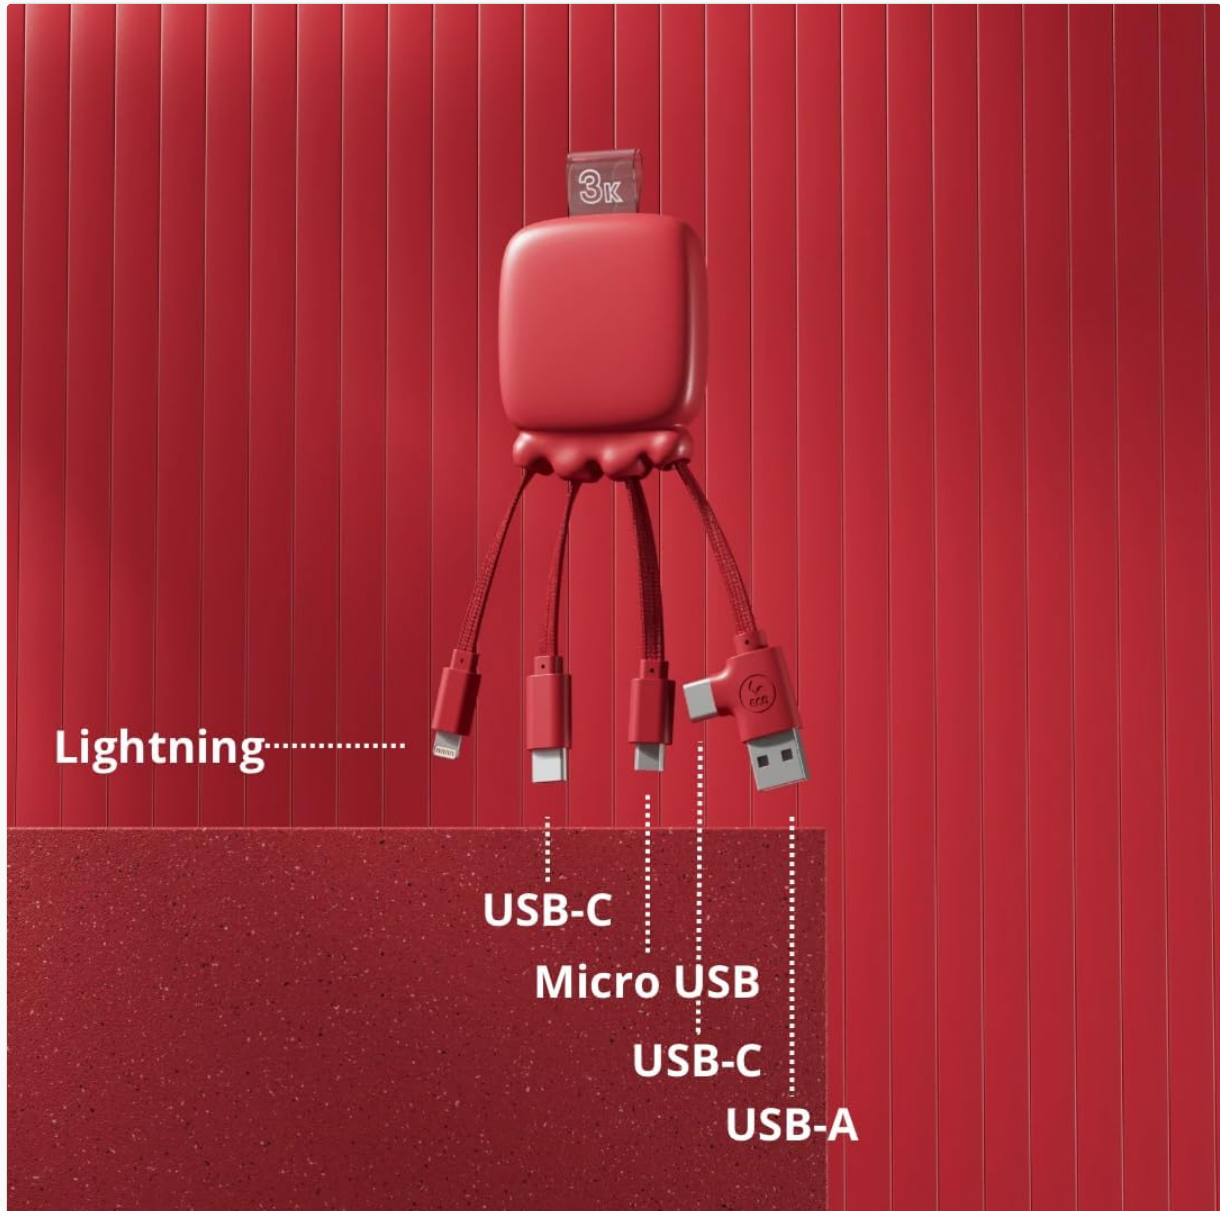

Image 2.1: Detailed view of the Octopus Gamma's connectors, clearly indicating Lightning, USB-C, Micro USB, and USB-A ports.

3. OPERATING INSTRUCTIONS

3.1 Charging Your Devices

1. Identify the correct connector for your device (Lightning, USB-C, or Micro USB).
2. Plug the appropriate connector into your device's charging port.
3. Connect the USB-A end of the Octopus Gamma to a power source. This can be a wall adapter, computer USB port, or car charger.
4. Your device will begin charging. The Octopus Gamma can charge up to two devices simultaneously if connected to a sufficient power source.

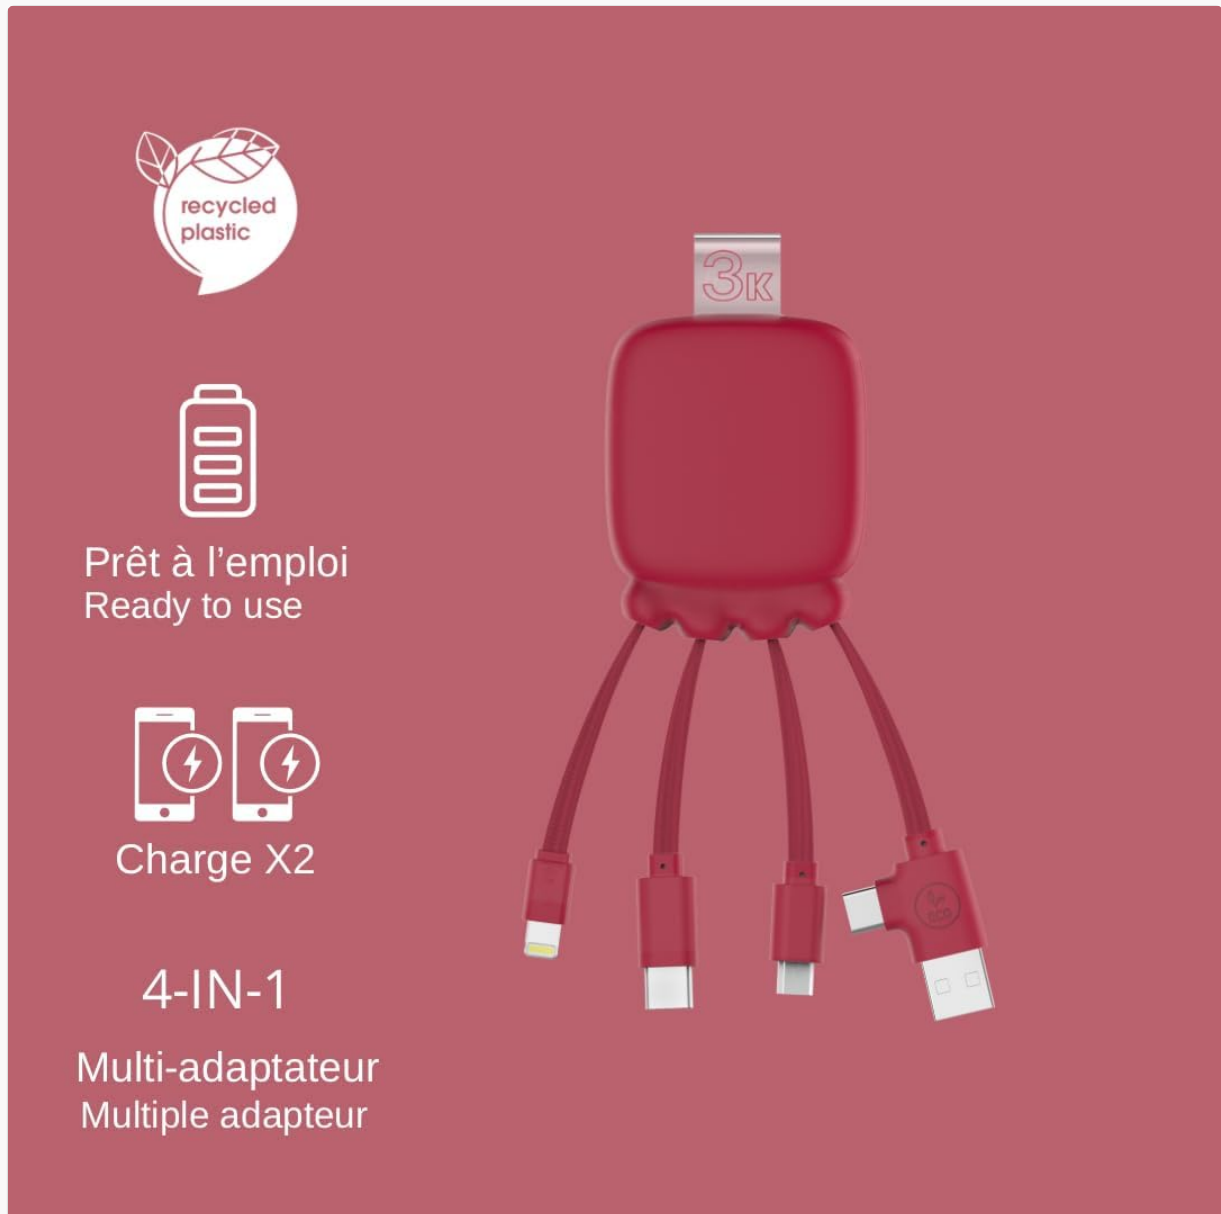

Image 3.1: The Octopus Gamma actively charging a smartphone, illustrating its function as a portable power source.

3.2 Using the Integrated Power Bank

The Octopus Gamma includes a 3000mAh internal battery for portable charging when no external power source is available.

1. Ensure the internal power bank is charged (see Section 3.3).
2. Plug the appropriate connector (Lightning, USB-C, or Micro USB) into your device.
3. The Octopus Gamma will automatically begin supplying power from its internal battery to your device.
4. The power bank can provide a significant boost to your smartphone's battery, helping to prevent power loss during travel or emergencies.

3.3 Recharging the Octopus Gamma Power Bank

The internal power bank of the Octopus Gamma recharges automatically when the USB-A connector is plugged into an external power source and you are simultaneously charging another device. This ensures the power bank is always ready for use.

1. Connect the USB-A end of the Octopus Gamma to a wall adapter, computer, or other USB-A power source.
2. Connect one of the output connectors (Lightning, USB-C, or Micro USB) to a device you wish to charge.
3. The Octopus Gamma will charge your device and its internal power bank simultaneously.

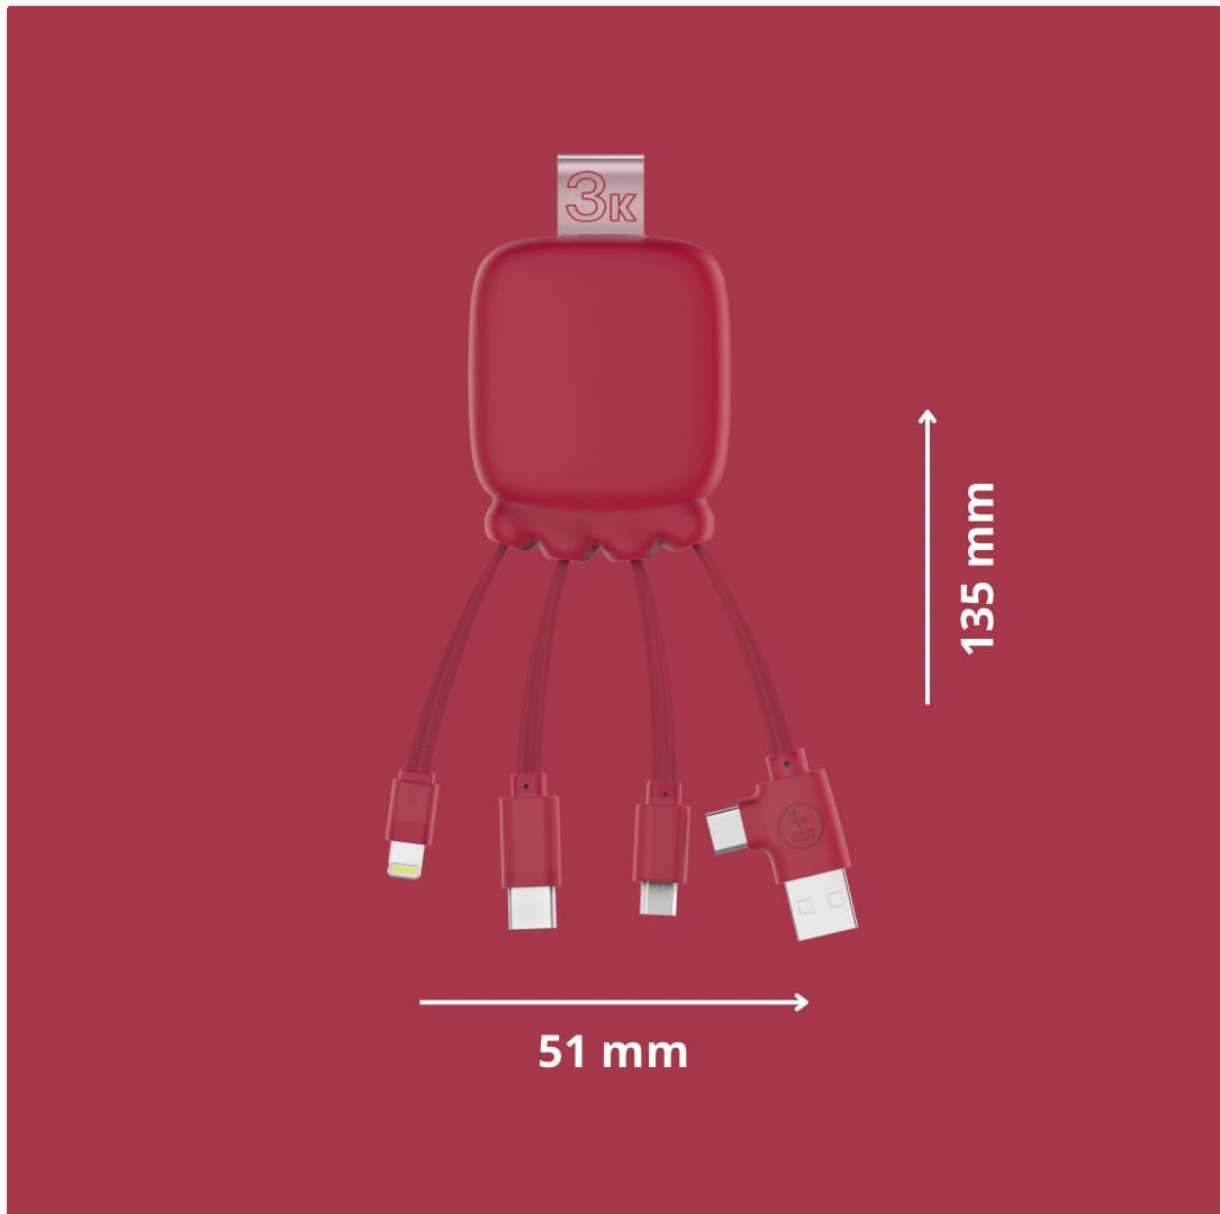

Image 3.2: The Octopus Gamma connected to a power strip, demonstrating simultaneous charging of both the connected device and the internal power bank.

Image 3.3: The Octopus Gamma in a typical use environment, connected to a laptop, alongside a keyboard and smartphone.

4. MAINTENANCE

To ensure the longevity and optimal performance of your Xoopar Octopus Gamma, follow these maintenance guidelines:

- **Cleaning:** Wipe the device with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the device in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid excessive bending or pulling of the cables to prevent damage to the connectors or internal wiring.
- **Battery Care:** For optimal battery life, avoid fully discharging the internal power bank frequently. Recharge it regularly.

5. TROUBLESHOOTING

Problem	Possible Cause	Solution
Device not charging.	Incorrect connector used. Power source issue. Internal power bank depleted.	Ensure the correct connector is firmly plugged into your device. Try a different USB-A port or wall adapter. Recharge the Octopus Gamma by connecting its USB-A end to a power source.
Slow charging.	Low power output from source. Charging multiple devices.	Use a higher-wattage power adapter. Charge devices one at a time for faster charging.
Octopus Gamma not recharging.	Faulty USB-A connection. Power source issue.	Ensure the USB-A connector is securely plugged into a working power source. Try a different USB-A port or wall adapter.

6. SPECIFICATIONS

Feature	Detail
Model Name	Gamma RP

Feature	Detail
Model Number	XP61075
Connectors	Lightning, Micro USB, USB Type A, USB Type C
Power Bank Capacity	3000 mAh
Battery Type	Lithium-polymer
Weight	70 Grams
Dimensions (L x W x H)	13.5 x 5.1 x 1.7 cm
Special Features	Fast Charging, Lightweight, Recycled Plastic Construction
Compatible Devices	Smartphones, Tablets, Laptops, Speakers, Earphones (Universal compatibility)
Manufacturer	XOOPAR
Country of Origin	China

7. WARRANTY AND SUPPORT

7.1 Warranty Information

The Xoopar Octopus Gamma (Model XP61075) comes with a **2-year manufacturer's warranty**. This warranty covers defects in materials and workmanship under normal use. Please retain your proof of purchase for warranty claims.

The warranty does not cover:

- Damage caused by misuse, abuse, accident, or neglect.
- Unauthorized repairs or modifications.
