

Jura ENA 8

Jura ENA 8 Automatic Coffee Machine User Manual

Model: ENA 8 Metropolitan Black (Model Number: 15496)

1. INTRODUCTION

This user manual provides essential information for the safe and efficient operation, maintenance, and care of your Jura ENA 8 Automatic Coffee Machine. Please read these instructions thoroughly before initial use and keep them for future reference. Proper use and maintenance will ensure the longevity and optimal performance of your machine.

2. SAFETY INSTRUCTIONS

Always observe the following safety precautions to prevent injury or damage to the appliance:

- Ensure the machine is placed on a stable, level surface.
- Do not immerse the machine or its power cord in water or other liquids.
- Keep children away from the appliance during operation.
- Only use original Jura spare parts and accessories.
- Unplug the machine from the power outlet before cleaning or if it will not be used for an extended period.

3. SETUP

3.1 Unpacking and Initial Placement

Carefully remove all packaging materials. Place the Jura ENA 8 on a clean, dry, and stable surface. Ensure adequate ventilation around the machine.

3.2 Filling the Water Tank

1. Remove the water tank from the machine.
2. Rinse the tank thoroughly with fresh water.
3. Fill the water tank with fresh, cold tap water up to the 'MAX' mark.
4. Reinsert the water tank firmly into the machine.

3.3 Filling the Bean Container

1. Open the aroma preservation cover on top of the machine.
2. Fill the bean container with fresh coffee beans. Do not use ground coffee, instant coffee, or caramelized beans.
3. Close the aroma preservation cover.

3.4 Power Connection and Initial Start-up

1. Plug the power cable into a suitable power outlet (120V).
2. Press the 'On/Off' button. The machine will perform an initial rinse cycle.
3. Follow the on-screen instructions on the touchscreen display for language selection and water hardness settings.

4. OPERATING INSTRUCTIONS

4.1 Touchscreen Interface

The Jura ENA 8 features an intuitive touchscreen display for easy navigation and selection of coffee specialties. Simply touch the desired icon to start preparation.

4.2 Preparing Coffee Specialties

The ENA 8 can prepare a variety of coffee and milk-based beverages. The Professional Aroma Grinder ensures optimal flavor extraction for each cup.

- **Espresso:** Place a cup under the coffee spout and select 'Espresso' on the touchscreen.
- **Coffee:** Place a cup under the coffee spout and select 'Coffee' on the touchscreen.
- **Cappuccino / Latte Macchiato:** Ensure the milk system is connected and a cup is placed under the spout. Select the desired milk specialty.
- **Two-Cup Function:** For certain specialties, the machine can prepare two cups simultaneously. Place two cups under the spouts and select the '2x' option if available.

4.3 Customization Options

You can customize your beverages:

- **Coffee Strength:** Adjust the strength via the touchscreen before preparation.
- **Volume:** Program the desired coffee volume for each specialty.
- **Temperature:** Select your preferred brewing temperature.

ENA 8 Specialty Range

Image: A visual guide to the range of coffee specialties the Jura ENA 8 can produce, including Espresso, Coffee, Cortado, Cappuccino, Flat White, Latte Macchiato, and more.

5. MAINTENANCE

Regular maintenance is crucial for the performance and lifespan of your Jura ENA 8. The machine will prompt you for necessary cleaning and maintenance tasks.

5.1 Daily Cleaning

- Drip Tray and Coffee Grounds Container:** Empty and rinse daily. The machine will prompt you when this is required.
- Milk System Rinsing:** Perform a milk system rinse after each milk preparation. The machine will guide you through this process.

5.2 Cleaning Program

The Jura ENA 8 has an integrated cleaning program. Use Jura cleaning tablets as instructed by the machine's display. This program cleans the brewing unit and coffee system.

5.3 Descaling Program

Depending on your water hardness and filter usage, the machine will prompt you to perform a descaling program. Use Jura descaling tablets and follow the on-screen instructions carefully.

5.4 Filter Replacement

If you are using a CLARIS water filter, the machine will indicate when it needs to be replaced. Replace the filter promptly to ensure water quality and protect the machine from limescale buildup.

6. TROUBLESHOOTING

This section addresses common issues you might encounter with your Jura ENA 8.

Problem	Possible Cause	Solution
"Fill Water Tank" message	Water tank is empty or not correctly inserted.	Fill the water tank with fresh water and ensure it is securely in place.
"Empty Grounds Container" message	Coffee grounds container is full.	Empty the coffee grounds container and drip tray, then reinsert them.
"Fill Bean Container" message	Bean container is empty.	Fill the bean container with fresh coffee beans.
Coffee is not hot enough	Pre-heating not sufficient, or cup is cold.	Pre-heat cups. Adjust coffee temperature setting in the menu.
Milk foam quality is poor	Milk system dirty or milk not cold enough.	Perform milk system cleaning. Use fresh, cold milk (approx. 4°C/39°F).

If you encounter issues not listed here or if solutions do not resolve the problem, please contact Jura customer support.
