# JRC X-Lite Slim Indicator Bite Alarm Set User Manual

Model: 1590423 | Brand: JRC

## 1. INTRODUCTION

---

The JRC X-Lite Slim Indicator Bite Alarm Set is a versatile tool designed for carp fishing. This indicator features a unique adjustable line clip system and a joint head, allowing for precise sensitivity adjustments to detect even the shyest bites while minimizing false alarms caused by environmental factors like wind. It is compatible with both monofilament and braided lines, offering flexibility for various fishing conditions.

## 2. PRODUCT FEATURES

---

- Slim hinge body design.
- Intelligent internal isotope slot for enhanced visibility (isotope not included).
- Dual line clip system for fixed or sliding line, compatible with monofilament and braided lines.
- Includes options for black chain or stiff arm attachments with hockey stick connectors.
- Six black stainless steel screw-on weights for adjustable indicator weight.
- Five interchangeable body colors: neon green, white, purple, red, and black.
- Quick-change body system with a simple twist and fix mechanism.
- Removable cord clip via a twist and fix system.

## 3. PACKAGE CONTENTS

---

Please ensure all components are present before proceeding with setup:

- X-Lite Slim Indicator unit (main body with hinge and joint head)
- Five interchangeable color bodies (neon green, white, purple, red, black)

- Black chain attachment
- Stiff arm attachment
- Hockey stick attachments
- Six black stainless steel screw-on weights
- Carrying case (as shown in product images)

## 4. SETUP INSTRUCTIONS

---

Follow these steps to assemble and prepare your JRC X-Lite Slim Indicator:

1. **Attach to Bite Alarm:** Connect the hockey stick attachment to your bite alarm. Then, attach either the black chain or the stiff arm option to the indicator unit and secure it to the hockey stick.
2. **Select Body Color:** The indicator comes with five different color bodies. To change the body, simply twist and remove the current body, then twist and fix the desired color body into place. This allows for quick customization based on preference or visibility needs.

Image: The JRC X-Lite Slim Indicator Bite Alarm Set includes five interchangeable color bodies: neon green, purple, red, orange, and black.

- 3. Adjust Line Clip:** The dual line clip system can be adjusted to either grip the line firmly (fixed line) or allow it to run freely (sliding line). This adjustment is crucial for sensitivity. Experiment to find the optimal setting for your fishing style and line type (monofilament or braided). The cord clip is also removable by twisting and fixing.
- 4. Add Weights (Optional):** If additional weight is required to increase the indicator's stability or sensitivity in certain conditions, screw on the provided black stainless steel weights to the bottom of the indicator unit.

## 5. OPERATING INSTRUCTIONS

---

The X-Lite Slim Indicator is designed for versatile use:

- **Line Compatibility:** The dual line clip allows for effective use with both monofilament and braided fishing lines. Ensure the line clip is adjusted appropriately for your chosen line type.
- **Sensitivity Adjustment:** The joint head and adjustable line clip system are key to customizing sensitivity. For detecting shy bites, adjust the line clip to grip the line more firmly. For minimizing false bites from wind or water movement, adjust the line clip to allow the line to run more freely. Experiment with these settings to achieve optimal bite indication.
- **Visual Indication:** The indicator's movement will signal a bite. The interchangeable color bodies allow you to select a color that provides the best contrast and visibility in your fishing environment.

## 6. MAINTENANCE

---

To ensure the longevity and optimal performance of your JRC X-Lite Slim Indicator, follow these maintenance guidelines:

- **Cleaning:** After each use, wipe down the indicator and its components with a damp cloth to remove any dirt, slime, or debris. Avoid using harsh chemicals or abrasive materials.
- **Drying:** Ensure all parts are thoroughly dry before storing to prevent corrosion or damage.
- **Storage:** Store the indicator set in its protective carrying case in a cool, dry place away from direct sunlight and extreme temperatures.

- **Inspection:** Periodically inspect the line clip, hinge, and other moving parts for any signs of wear or damage. Replace any worn components if necessary.

## 7. TROUBLESHOOTING

---

Here are solutions to common issues you might encounter:

- **Issue:** Indicator is too sensitive, resulting in false bites.  
**Solution:** Adjust the line clip to a looser setting, allowing the line to run more freely. Consider adding more screw-on weights to increase stability, especially in windy conditions.
- **Issue:** Indicator is not sensitive enough, missing subtle bites.  
**Solution:** Adjust the line clip to a tighter setting, ensuring it grips the line more firmly. Remove any unnecessary screw-on weights to reduce resistance.
- **Issue:** Difficulty seeing the indicator.  
**Solution:** Change the indicator body to a color that provides better contrast against the background or water conditions (e.g., neon green for low light, white for dark backgrounds). Ensure the indicator is positioned correctly for optimal visibility.

## 8. SPECIFICATIONS

---

<b>Brand</b>	JRC
<b>Model Number</b>	1590423
<b>UPC / GTIN</b>	043388134387
<b>Item Type Name</b>	fishing bite alarms
<b>Compatible Line Types</b>	Monofilament, Braided
<b>Adjustable Sensitivity</b>	Yes (via joint head and line clip)

## 9. WARRANTY AND SUPPORT

---

Specific warranty details for the JRC X-Lite Slim Indicator Bite Alarm Set are not provided in this manual. For warranty information, technical support, or replacement parts, please contact JRC directly or refer to the official JRC website. Keep your proof of purchase for any warranty claims.

## 10. SAFETY INFORMATION

---

Please observe the following safety precautions:

- Keep out of reach of children.
- Handle with care to avoid injury from sharp components or fishing hooks.
- Do not attempt to modify the product, as this may void the warranty and could lead to malfunction.
- Dispose of packaging materials responsibly.
