ASAKUKI ZH-001S

ASAKUKI Humidifier User Manual

Model: ZH-001S | Brand: ASAKUKI

Introduction

Thank you for choosing the ASAKUKI Humidifier. This cool mist humidifier is designed to improve air quality and comfort in your home, ideal for bedrooms, baby nurseries, and plant care. With its user-friendly features and efficient operation, you can easily maintain optimal humidity levels. Please read this manual carefully before use to ensure proper operation and maintenance.

Setup Guide

1. Unpacking and Placement

Carefully remove all components from the packaging. Place the humidifier on a flat, stable, and water-resistant surface. Ensure it is away from direct sunlight, heat sources, and electronic devices.

2. Filling the Water Tank

The ASAKUKI humidifier features a convenient top-fill design. Simply remove the top cover and pour clean, cool water directly into the tank. Do not pour water into the mist outlet. Fill up to the 'MAX' line indicated on the side of the unit. Distilled or demineralized water is recommended to prevent mineral buildup.

Image: The wide opening simplifies both filling and cleaning.

3. Installing the Demineralization Filter

The humidifier comes with a detachable demineralization cleaning filter. Ensure it is properly twisted into its designated slot at the bottom of the water tank. This filter helps to reduce impurities and white dust.

4. Adding Essential Oils (Optional)

For aromatherapy, locate the built-in aroma box at the back of the unit. Pull out the small tray and add 10-15 drops of your favorite essential oil onto the lavender scented pad provided. Slide the tray back into place. Do not add essential oils directly into the water tank.

Image: The aroma box for essential oils is located at the back.

5. Power Connection

Plug the power cord into a standard electrical outlet. The unit is now ready for operation.

Operating Instructions

1. Power On/Off

Press the power button on the control panel or the remote control to turn the humidifier on or off.

2. Humidity Control Modes

- **Smart Auto Mode:** Press the 'Auto Mode' button. The humidifier will automatically adjust the mist level (low/middle/high) to maintain a comfortable humidity level in your room. The built-in 3-color coded light indicates the current humidity level (e.g., green for comfort).

- **Custom Mode:** Use this mode to set a specific target humidity between 40% and 80% Relative Humidity (RH). The humidifier will work to achieve and maintain this set level.
- **Manual Mist Levels:** Adjust the mist output manually between low, medium, and high settings using the mist control button.

Image: Choose between Smart Auto Mode or Custom Mode for precise humidity control.

3. Sleep Mode

Activate Sleep Mode for quiet operation. This mode lowers noise levels and turns off the display light, ensuring a peaceful night's rest without visual disturbance.

Image: Sleep Mode ensures quiet operation and turns off display lights.

4. Timer Setting

Set the timer for automatic shut-off from 1 hour to 12 hours. The humidifier will turn off once the set time expires or when the water tank is empty.

5. Night Light

Toggle the optional warm night light on or off using the light button on the control panel or remote. This adds a soothing ambiance to your space.

6. Remote Control Operation

The included remote control provides convenient access to all humidifier functions from a distance, including power, mode selection, mist level adjustment, timer, and night light control.

Image: Control your humidifier conveniently with the included remote.

Maintenance and Care

1. Regular Cleaning

To ensure optimal performance and hygiene, regularly clean the water tank and base. The wide opening and simple construction make cleaning easy, leaving no hard-to-reach corners. Use the provided cleaning brush for thorough cleaning.

2. Demineralization Filter Care

The detachable demineralization cleaning filter helps to filter impurities and reduce white dust. Periodically clean the filter according to the instructions in the quick guide to maintain its effectiveness. Replace the filter as needed based on water quality and usage.

Room Coverage	Up to 320 Square Feet
Product Dimensions	5.9"D x 9.79"W x 11.5"H
Item Weight	2.62 Pounds
Voltage	120 Volts
Wattage	27 watts

Troubleshooting

- **No Mist Output:** Ensure the water tank is filled above the minimum level. Check if the unit is properly plugged in and powered on.
- **Unusual Odor:** Clean the water tank and demineralization filter thoroughly. Use distilled water to prevent mineral and bacterial buildup.
- **White Dust Around Unit:** This indicates mineral buildup from hard water. Use distilled or demineralized water and regularly clean the unit and filter.
- **Unit Not Responding:** Ensure the power cord is securely connected. Try unplugging and re-plugging the unit. If using the remote, check its battery.
- **Auto Shut-off:** The humidifier will automatically turn off when the water level is too low or the set timer expires. Refill the tank or reset the timer if needed.

Warranty and Support

ASAKUKI is committed to your satisfaction. We provide customer support via email to assist with any questions or concerns regarding your humidifier. While specific warranty details are not provided in this manual, please retain your proof of purchase for any potential claims. For assistance, please contact ASAKUKI customer support.

Ask a question about this manual
