PARIS RHÔNE PE-AH039

PARIS RHÔNE PE-AH039 Ultrasonic Cool Mist Humidifier User Manual

INTRODUCTION

Thank you for choosing the PARIS RHÔNE PE-AH039 Ultrasonic Cool Mist Humidifier. This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your new humidifier. Please read these instructions thoroughly before use and retain them for future reference.

IMPORTANT SAFETY INSTRUCTIONS

To reduce the risk of fire, electric shock, or injury, always follow basic safety precautions when using electrical appliances. This includes, but is not limited to, the following:

- Read all instructions before operating the humidifier.
- Always place the humidifier on a firm, flat, waterproof surface at least 12 inches (30 cm) away from walls and appliances.
- Do not operate the humidifier if the cord or plug is damaged, or if the unit malfunctions or has been dropped.
- Unplug the humidifier from the power outlet before filling, cleaning, or moving it.
- Do not immerse the humidifier in water or other liquids.
- Use only clean, cool tap water or distilled water in the tank. Do not add essential oils directly into the water tank; use the designated aroma box if available.
- Keep the humidifier out of reach of children and pets.
- Do not block the mist outlet or air vents.
- Do not attempt to repair or modify the humidifier yourself. Contact customer support for assistance.

PACKAGE CONTENTS

Please check the package for the following items:

- PARIS RHÔNE PE-AH039 Humidifier

- Instruction Manual
- Cleaning Brush

PRODUCT DIAGRAM

Familiarize yourself with the components of your humidifier:

knob.

1. Mist Nozzle
2. Water Tank Lid
3. Water Tank (3.2L Capacity)
4. Base Unit
5. Control Knob / Power Button
6. LED Display
7. Aroma Box (located on the side or back of the base)

SETUP

1. Initial Cleaning

Before first use, remove all packaging materials. Wipe the water tank and base with a soft, damp cloth. Rinse the water tank thoroughly with clean water.

2. Placement

Place the humidifier on a flat, stable, and waterproof surface. Ensure it is at least 12 inches (30 cm) away from walls, furniture, and electronic devices. Do not place it on carpet or a towel, as this may block the air inlet.

3. Filling the Water Tank

Top Fill Design & Easy to clean

Image: A hand pouring water into the top-fill opening of the PARIS RHÔNE PE-AH039 Humidifier.

- Remove the water tank lid.
- Pour clean, cool tap water or distilled water directly into the tank opening. Do not exceed the maximum fill line.
- Replace the water tank lid securely.

4. Power Connection

Plug the power cord into a standard electrical outlet (100V).

Whisper-Quiet Operation

26db

Image: Close-up of the control knob on the PARIS RHÔNE PE-AH039 Humidifier, showing mist level settings from low to high.

1. Power On/Off

Rotate the control knob clockwise to turn the humidifier on. Continue rotating to adjust the mist output. Rotate counter-clockwise until it clicks to turn the humidifier off.

2. Adjusting Mist Output

The humidifier offers adjustable mist levels. Rotate the control knob to select your desired mist output, from low (approx. 300ml/h) to high (approx. 350ml/h). The digital display may show the current setting.

3. Night Light Function

The humidifier features a 7-color LED night light. Press the dedicated light button (if available, or cycle through modes via the control panel) to activate or change the light mode. There are 8 lighting modes to choose from, including a fixed color or a cycling mode.

4. Sleep Mode

Compact design & Space Saving

Image: The PARIS RHÔNE PE-AH039 Humidifier operating quietly in a bedroom next to a sleeping child, illustrating its low noise level (26dB).

Activate Sleep Mode for quiet operation and to turn off all display lights, ensuring an undisturbed sleeping environment. Refer to the control panel for the specific Sleep Mode button or combination.

5. Timer Function

The humidifier includes optional timers for automatic shut-off. Consult the control panel or specific buttons to set the desired operating duration (e.g., 2H, 4H, 8H, 12H).

6. Aroma Diffuser

Locate the aroma box, typically a small tray on the side or back of the base. Add a few drops of essential oil onto the aroma pad (not directly into the water tank). The mist will carry the fragrance into the air.

7. Automatic Shut-off

The humidifier will automatically turn off when the water level is too low or the water tank is removed, indicated by a red light or an icon on the display. Refill the tank to resume operation.

MAINTENANCE AND CLEANING

Regular cleaning is crucial for optimal performance and hygiene. Always unplug the humidifier before cleaning.

Daily Maintenance

- Empty any remaining water from the tank and base.
- Wipe the tank and base dry with a clean cloth.
- Refill with fresh water before each use.

Weekly Cleaning (Descaling)

Due to its wide 7-inch top opening, the water tank is easy to clean.

- Unplug the humidifier and empty all water.
- Pour 1 cup (240ml) of white vinegar into the water tank and base.
- Let it soak for 30 minutes.
- Use the provided cleaning brush to gently scrub the inside of the tank, the nebulizer, and the base.
- Rinse all components thoroughly with clean water until the smell of vinegar is gone.
- Dry all parts completely before reassembling or storing.

Aroma Box Cleaning

Remove the aroma pad from the aroma box. Wash the pad with mild soap and water, then rinse thoroughly. Allow it to air dry completely before reuse. Replace the pad if it becomes discolored or hardened.

TROUBLESHOOTING

If you encounter issues with your humidifier, please refer to the following common problems and solutions:

| Problem | Possible Cause | Solution |
|----------------------------|---|--|
| No mist or low mist output | Low water level Nebulizer/transducer is dirty Mist nozzle blocked | Refill water tank Clean the nebulizer with the cleaning brush and vinegar solution Check and clear any blockages in the mist nozzle |
| Unusual odor | New unit smell Dirty water or tank Essential oil residue | Run for a few hours in a well-ventilated area Clean the water tank and refill with fresh water Clean the aroma box and replace the aroma pad |

| Problem | Possible Cause | Solution |
|-----------------------------------|--|--|
| Water leakage | Water tank lid not secured Unit placed on an uneven surface Cracked water tank | Ensure the water tank lid is tightly closed Place the humidifier on a flat, stable surface Contact customer support if the tank is damaged |
| Humidifier turns off unexpectedly | Water level is too low Timer function activated | Refill the water tank Check timer settings and adjust if necessary |

If the problem persists after trying these solutions, please contact PARIS RHÔNE customer support.
