SETUP

Power Supply

The cassette player can be powered by two (2) AA batteries or via a USB power supply.

1. Battery Installation:

- Open the battery compartment cover located on the back of the device.
- Insert two AA batteries, ensuring correct polarity (+/-) as indicated inside the compartment.
- Close the battery compartment cover securely.

2. USB Power Connection:

- Connect the small end of the included USB power cord to the DC 5V input port on the cassette player.
- Connect the standard USB end to a USB power adapter (not included) or a computer's USB port.

Inserting a Cassette Tape

1. Gently open the cassette compartment door.
2. Insert a cassette tape with the exposed tape facing upwards and the side you wish to play facing the front.
3. Close the cassette compartment door until it clicks securely.

OPERATING INSTRUCTIONS

Playing Cassettes

1. Ensure a cassette tape is properly inserted.
2. Set the FM/Tape switch to the "Tape" position.
3. Press the **Play** button to begin playback.
4. Adjust the **Volume Control Wheel** to your desired listening level.
5. To stop playback, press the **Stop** button.
6. To fast forward, press the **FF** button. To rewind, press the **REW** button. Press **Stop** to disengage.

Auto Reverse Function

The player features an auto-reverse function, allowing the tape to play in both directions without needing to manually flip the cassette.

- During playback, press the **Auto Reverse** button to switch the tape direction. The player will automatically reverse and continue playing the other side of the tape.

Using the FM Radio

1. Set the FM/Tape switch to the "FM" position.
2. Use the tuning dial (if present, otherwise the FF/REW buttons might serve as tuning) to scan for FM radio stations.
3. Adjust the **Volume Control Wheel** to your desired listening level.

Using the Built-in Speaker

The device includes a built-in speaker for direct audio output. No special action is required; audio will play through the speaker unless headphones are connected.

Connecting Headphones or External Audio Devices

For private listening or connecting to external speakers, use the 3.5mm headphone/AUX output jack.

- Plug the included headphones or your own 3.5mm audio cable into the **Headphone/AUX Output Jack**.
- When headphones are connected, audio will automatically switch from the built-in speaker to the headphones.

MAINTENANCE

Proper care ensures the longevity and optimal performance of your cassette player.

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the device. Do not use liquid cleaners or abrasive materials.
- **Tape Heads:** Periodically clean the tape heads with a specialized cassette head cleaner to maintain sound quality.
- **Storage:** When not in use for extended periods, remove the batteries to prevent leakage. Store the device in a cool, dry place away from direct sunlight and extreme temperatures.
- **Avoid Dust:** Keep the cassette compartment closed when not in use to prevent dust accumulation.

TROUBLESHOOTING

If you encounter issues with your cassette player, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No power	Dead batteries; USB cable not connected; faulty power source.	Replace batteries; ensure USB cable is securely connected to a working power source.
No sound from speaker/headphones	Volume too low; headphones not fully plugged in; FM/Tape switch in wrong position; dirty tape heads.	Increase volume; ensure headphones are fully inserted; set switch to correct mode (Tape/FM); clean tape heads.

Problem	Possible Cause	Solution
Poor sound quality (cassette)	Dirty tape heads; worn-out tape; incorrect tape insertion.	Clean tape heads; try a different tape; re-insert tape correctly.
FM radio static/poor reception	Weak signal; interference.	Relocate the player to an area with better reception; try adjusting the player's orientation.
Tape not playing/moving	Tape jammed; mechanism issue; tape not inserted correctly.	Check for tape jams; ensure tape is inserted correctly; if issue persists, contact support.
