This manual provides essential information for the proper installation, operation, and maintenance of your MOZA ES Formula Wheel Mod.

PACKAGE CONTENTS

- MOZA ES Formula Wheel Mod (280mm)
- Mounting Hardware (screws, if applicable)

SETUP

Follow these steps to properly install the MOZA ES Formula Wheel Mod onto your MOZA ES wheel base.

- Preparation:** Ensure your MOZA ES wheel base is powered off and disconnected from your computer. Place the wheel base on a stable surface.
- Remove Original Wheel Rim (if applicable):** If your MOZA ES wheel currently has a removable rim, carefully detach it according to the MOZA ES wheel's original instructions. This typically involves unscrewing retaining bolts or disengaging a quick-release mechanism.
- Attach Formula Wheel Mod:** Align the MOZA ES Formula Wheel Mod with the mounting points on the MOZA ES wheel's hub. Ensure the connectors (if any) are properly seated.
- Secure the Mod:** Use the provided mounting hardware (e.g., screws) to firmly attach the Formula Wheel Mod to the wheel hub. Tighten screws evenly to ensure a secure fit without over-tightening.

5. **Connect to PC:** Reconnect your MOZA ES wheel base to your computer and power it on.

2. **Calibration:** The wheel may perform an automatic calibration upon startup. If manual calibration is required, follow the prompts within the MOZA Pit House software.
3. **Button Mapping:** Utilize the MOZA Pit House software to customize the functions of the various buttons and switches on the Formula Wheel Mod. You can assign specific in-game actions to each control.
4. **Game Configuration:** Within your racing simulation game, ensure the MOZA ES wheel is selected as the primary controller. Adjust in-game force feedback and control settings as desired.

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your MOZA ES Formula Wheel Mod.

- **Cleaning:** Use a soft, dry, lint-free cloth to clean the surface of the wheel mod. Avoid using abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish and rubber grips.
- **Storage:** When not in use, store the wheel mod in a clean, dry environment away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically inspect the mounting hardware for tightness and the grips for any signs of wear or damage.
