3. SETUP

Before using the charger, please ensure your device is compatible with a 29.4V DC input and features a barrel round plug

tip.

1. **Unpack the Charger:** Carefully remove the charger from its packaging.
2. **Inspect for Damage:** Check the charger and cable for any visible signs of damage. Do not use if damaged.
3. **Verify Compatibility:** Confirm that your device requires a 29.4V DC power supply and has a barrel round plug tip. This charger is specifically designed for SwagTron Swagger-1 and Swagger Pro electric scooters.
4. **Connect to Power Outlet:** Plug the AC input side of the charger into a standard wall outlet (100-240VAC, 50/60Hz).
5. **Connect to Device:** Insert the barrel round plug tip of the DC output cable firmly into the charging port of your electric scooter.

4. OPERATING INSTRUCTIONS

Once connected, the charger will begin supplying power to your device. Most devices will have an indicator light to show charging status (e.g., red for charging, green for fully charged).

1. **Initiate Charging:** After connecting both the AC power and the device, charging should begin automatically.
2. **Monitor Charging:** Observe your device's charging indicator. Avoid leaving the device connected to the charger for extended periods after it is fully charged, although the charger includes Over Voltage, Over Current, and Short Circuit Protection.
3. **Disconnect Safely:** Once charging is complete, first disconnect the barrel plug from your device, then unplug the charger from the wall outlet.

Important Note on Batteries:

Rechargeable batteries have a finite lifespan, typically 1 to 3 years. If your device's battery is old or dead, it may not accept a charge, and this is not an indication of a faulty charger. If you suspect a battery issue, a voltmeter can be used to test if the charger is outputting the correct voltage (29.4V DC).

5. MAINTENANCE

Proper care will extend the life of your charger:

- **Keep Dry:** Do not expose the charger to water, moisture, or high humidity.
- **Avoid Extreme Temperatures:** Store and operate the charger in moderate temperatures.
- **Handle with Care:** Do not drop, bend, or apply excessive force to the charger or its cables.
- **Clean Gently:** Use a dry, soft cloth to clean the charger. Do not use liquid cleaners.
- **Store Properly:** When not in use, coil the cable neatly and store the charger in a cool, dry place away from direct sunlight.
