Lacidoll LCD-JSQ-J19

Lacidoll 16L/4.2Gal Whole House Ultrasonic Cool Mist Humidifier

Model: LCD-JSQ-J19

1. Introduction

Thank you for choosing the Lacidoll 16L/4.2Gal Whole House Ultrasonic Cool Mist Humidifier. This device is designed to efficiently humidify large spaces up to 1500 sq.ft., providing a comfortable environment for your home, bedroom, office, or greenhouse. Featuring a large capacity, quiet operation, smart humidistat, and an aroma diffuser, this humidifier is engineered for ease of use and optimal performance. Please read this manual thoroughly before operation to ensure proper use and maintenance.

2. Important Safety Instructions

- Always place the humidifier on a firm, flat, water-resistant surface away from walls and heat sources.
- Do not immerse the base unit in water or other liquids.
- Unplug the humidifier from the power outlet before filling, cleaning, or moving.
- Use distilled or purified water to prevent mineral buildup and white dust. If hard water is used, the water pump may become clogged.
- Keep out of reach of children and pets.
- Do not block air vents or mist outlet.
- The humidifier features an automatic shut-off when water runs out, enhancing safety.

3. Package Contents

Upon unpacking, please ensure all items listed below are present. Note: The power cord, user manual, remote control, and extension pipe are located inside the water tank.

- Lacidoll Cool Mist Humidifier x 1
- Extension Pipe x 1
- Remote Control x 1
- User Manual x 1

4. Setup Guide

1. **Unpack and Inspect:** Carefully remove all components from the packaging. Locate the power cord, remote control, and extension pipe inside the water tank.
2. **Placement:** Place the humidifier on a flat, stable surface in the desired room. Ensure it is at least 6 inches away from walls and furniture to allow for proper mist dispersion. This humidifier is suitable for large bedrooms, whole houses, offices, and grow rooms.

Image: Lacidoll humidifier positioned in a spacious room, demonstrating its suitability for large areas up to 1500 sq.ft.

3. **Fill Water Tank:** The humidifier features a convenient top-fill design. Remove the top cover and pour distilled or purified water directly into the tank. The 16L (4.2Gal) capacity allows for extended operation.

4. **Attach Extension Tube (Optional):** For elevated mist output, attach the provided extension tube to the mist nozzle on the top cover. Ensure it is securely fitted.

Image: Step-by-step guide demonstrating the simple process of attaching the detachable extension tube for customized mist direction.

5. **Connect Power:** Plug the power cord into a standard 120V AC electrical outlet. The unit will enter standby mode.

5. Operating Instructions

Control Panel & Remote Control

The humidifier can be operated via its touch screen control panel or the included remote control. Both offer access to the following functions:

- **Power On/Off:** Press the power button to turn the unit on or off.
- **Mist Output Adjustment:** Cycle through 4 speed mist levels (Low, Medium, High, Turbo) or select Intermittent mist (30s, 60s, 90s intervals) to control the mist volume.
- **Humidity Setting:** Utilize the built-in humidistat to customize the desired humidity level from 40% to 90%. The humidifier will automatically adjust mist output to maintain this level, stopping when reached to prevent over-humidification. The display shows the current humidity.

Image: The humidifier's digital display showing humidity settings, illustrating its smart humidistat capability to maintain desired environmental moisture.

- **Timer Function:** Set an operating timer for up to 12 hours. The unit will automatically shut off once the set time expires.
- **Sleep Mode:** Activate Sleep Mode for undisturbed rest. In this mode, the control panel lights turn off, and the humidifier operates at a quiet 35 dB.

- **360° Nozzle:** The mist nozzle can be rotated 360 degrees to direct the mist flow as desired.

6. Maintenance

Regular cleaning is essential for optimal performance and longevity of your humidifier. Always unplug the unit before cleaning.

- **Daily Maintenance:** Refill the water tank with fresh, clean distilled or purified water daily.
- **Weekly Cleaning:**
  - Empty any remaining water from the tank.
  - The wide opening water tank allows for easy access. Wipe the inside of the tank thoroughly with a soft, damp cloth.
  - Clean the nebulizer disc and water basin with a soft brush or cloth to remove any mineral deposits. A mixture of white vinegar and water (1:1 ratio) can help dissolve stubborn deposits. Rinse thoroughly.

- Clean the aroma box/tray as needed.

- **Hard Water Considerations:** If hard water is used, mineral buildup (white dust) may occur. This can clog the water pump over time. We strongly recommend using distilled or purified water. If your water pump becomes clogged, please contact customer support for a replacement pump.

7. Troubleshooting

Problem	Possible Cause	Solution
No mist or low mist output	Low water level; Clogged nebulizer disc/pump; Unit not powered on.	Refill water tank; Clean nebulizer disc and water basin; Ensure power cord is securely plugged in and unit is turned on. If pump is clogged due to hard water, contact support for replacement.
Inaccurate humidity reading	Sensor obstruction or malfunction.	Ensure sensor is clean and unobstructed. Allow unit to run for a day to calibrate. If issue persists, contact customer support.
White dust around humidifier	Using hard water.	Switch to distilled or purified water. Regularly clean the unit to remove mineral deposits.
Unit not responding to remote control	Remote battery low/dead; Obstruction between remote and unit.	Replace remote battery; Ensure clear line of sight to the unit's sensor.

8. Specifications

- **Brand:** Lacidoll
- **Model Name:** LCD-JSQ-J19
- **Capacity:** 16 Liters / 4.2 Gallons
- **Coverage Area:** Up to 1500 sq.ft.
