PAWPRO ALPHA1

PAWPRO Bark Control Collar User Manual

Model: ALPHA1
Brand: PAWPRO

Product Overview

The PAWPRO Bark Control Collar is an advanced device designed to help manage excessive barking in dogs. It utilizes artificial intelligence and sophisticated sensors to accurately detect your dog's barks, activating humane and painless deterrents. This collar is fully compliant with the new animal welfare regulations, offering a safe and legal solution for bark control.

It features a premium color screen and offers three respectful modes: BIP (sound), Vibration, and a combination of BIP+Vibration, which activate gradually through an automatic learning program. The collar is suitable for dogs of all sizes, from 2kg to 70kg, and is designed for optimal comfort with hypoallergenic materials and an IPX7 waterproof rating.

Setup and Initial Use

1. Unboxing and Inspection

Carefully remove all components from the packaging. Ensure the collar, charging cable, and any included accessories are present and undamaged.

2. Charging the Collar

Before first use, fully charge the collar. Connect the magnetic charging cable to the collar's charging port and plug the USB end into a compatible USB power adapter (not included). A full charge typically takes approximately 2 hours and provides up to 15 days of autonomy.

3. Fitting the Collar

Proper fit is crucial for the collar's effectiveness and your dog's comfort. The collar should be snug enough that two fingers can fit comfortably between the collar and your dog's neck. Ensure the sensor unit is positioned centrally on your dog's throat.

Operating Instructions

Turning On/Off

Refer to the detailed instructions in the included user manual for specific power on/off procedures, typically involving a long press of a button on the device.

Understanding the Modes

The PAWPRO collar offers three humane modes to deter barking:

- **BIP (Sound):** Emits an audible tone.
- **Vibration:** Delivers a gentle vibration.
- **BIP + Vibration:** Combines both sound and vibration.

These functions activate gradually through an automatic learning program, designed to help your dog learn to reduce excessive barking without discomfort.

Artificial Intelligence and Sensitivity

Equipped with Artificial Intelligence, a microphone, and advanced sensors, the collar filters out external noises and accurately detects your dog's barks, preventing accidental activations. The collar features 5 effective sensitivity levels, allowing you to adjust it to your dog's specific barking habits and environment.

Maintenance

Cleaning the Collar

Regularly clean the collar and the sensor unit with a soft, damp cloth. Ensure no dirt or debris accumulates around the sensors, as this may affect performance. Do not use harsh chemicals or abrasive materials.

Water Resistance (IPX7)

The PAWPRO collar is IPX7 waterproof, meaning it can withstand immersion in water up to 1 meter for 30 minutes. This makes it suitable for use in various weather conditions and allows for easy cleaning. However, it is not recommended for prolonged swimming or diving.

Battery Care

To maximize battery life, avoid completely draining the battery before recharging. Store the collar in a cool, dry place when not in use for extended periods.

Troubleshooting

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Collar not activating on bark.	• Low battery. • Incorrect sensitivity setting. • Collar not positioned correctly. • External noise interference.	• Recharge the collar. • Increase sensitivity level. • Adjust collar position to ensure sensor is on throat. • Ensure collar is detecting dog's bark, not other sounds.
Collar activating without barking.	• Sensitivity too high. • Collar picking up other sounds/vibrations.	• Decrease sensitivity level. • Ensure collar is snug and not rubbing against other objects.
Collar not holding charge.	• Battery degradation. • Faulty charging cable/adapter.	• Contact customer support if battery life significantly reduced. • Try a different USB adapter or charging cable.

If you encounter issues not listed here, please refer to the full user manual or contact PAWPRO customer support.

Specifications

Model Number: ALPHA1

Recommended Species: All dog breeds

Dog Size Compatibility: 2kg to 70kg

Dimensions: 11.3 x 9.2 x 5 cm (Collar unit dimensions, packaging dimensions are 11.3 x 9.2 x 5 cm)

Weight: 180 grams

Modes: BIP (Sound), Vibration, BIP + Vibration

Sensitivity Levels: 5

Waterproof Rating: IPX7

Charging Time: Approximately 2 hours

Battery Autonomy: Up to 15 days

Material: Hypoallergenic

Color: Black

Warranty and Support

Warranty Information

The PAWPRO Bark Control Collar is protected by a long-term warranty, ensuring the quality and reliability of your product. Please retain your proof of purchase for warranty claims. Specific warranty terms and conditions are detailed in the full product documentation.

Customer Support

For any questions, technical assistance, or warranty inquiries, please contact PAWPRO's responsive Belgian After-Sales Service (SAV Belge). Contact details can be found on the official PAWPRO website or within the product packaging. PAWPRO is a French brand committed to the well-being of your dog, providing high-quality products and dedicated customer support.
