

Wouxun KG-S72C

Wouxun KG-S72C Portable Handheld AM/FM CB Radio User Manual

Brand: Wouxun | Model: KG-S72C

INTRODUCTION

This manual provides comprehensive instructions for the setup, operation, maintenance, and troubleshooting of your Wouxun KG-S72C Portable Handheld AM/FM CB Radio. Please read this manual thoroughly before using your device to ensure proper functionality and longevity.

PACKAGE CONTENTS

Upon unboxing, verify that all the following components are included in your package:

- Wouxun KG-S72C Radio Unit
- Lithium-ion Battery Pack (2000mAh)
- Antenna
- Belt Clip
- Desktop Charger
- AC Adapter
- BNC Adapter
- Wrist Strap
- Owner's Manual (this document)

Figure 1: Wouxun KG-S72C radio with its complete set of accessories.

SETUP

1. Battery Installation:

Align the lithium-ion battery pack with the battery compartment on the back of the radio. Gently push until it clicks into place, ensuring a secure connection.

2. Charging the Battery:

Connect the AC adapter to the desktop charger, then plug the adapter into a standard electrical outlet. Place the radio with the installed battery into the desktop charger. The charging indicator light will show the charging status. The radio can also be charged directly via its USB-C port using a compatible USB-C cable and power source.

3. Antenna Attachment:

Screw the antenna clockwise onto the antenna connector located on the top of the radio until it is finger-tight. Do not overtighten.

4. Belt Clip Attachment:

Attach the belt clip to the designated slots on the back of the radio for convenient carrying.

Figure 2: Front view of the Wouxun KG-S72C radio.

OPERATING INSTRUCTIONS

1. Power On/Off:

Rotate the power/volume knob clockwise to turn the radio on. Continue rotating to adjust the volume. Rotate counter-clockwise until it clicks to turn the radio off.

2. Channel Selection:

Use the channel selector knob or the up/down buttons to navigate through the 40 standard CB channels. The radio also supports up to 400 customizable memory channels.

3. AM/FM Switching:

The KG-S72C supports both AM and FM operation. Refer to your owner's manual for specific instructions on how to switch between AM and FM modes, often configurable via a side key.

4. **Transmit (PTT) Button:**

Press and hold the Push-To-Talk (PTT) button, located on the side of the radio, to transmit. Release the button to receive.

Figure 3: Side view showing the PTT button.

5. **VOX Function:**

Voice Operated Exchange (VOX) allows for hands-free transmission. When enabled, the radio will transmit when it detects your voice. Consult the full owner's manual for VOX activation and sensitivity settings.

6. **CTCSS Tones and DCS Codes:**

Continuous Tone-Coded Squelch System (CTCSS) and Digital Coded Squelch (DCS) help filter out

unwanted conversations. These can be programmed for specific channels.

7. Power Selectivity:

The radio supports high and low power output settings (up to 2 watts AM and 4 watts FM). Use low power for shorter distances to conserve battery life.

8. Priority Channel Scan:

Activate the priority channel scan feature to monitor a designated priority channel while scanning other active channels.

9. Monitor Function:

The monitor function allows you to temporarily disable the squelch to listen for very weak signals.

10. Favorite Channels:

Quickly access emergency channels 9 and 19 using the dedicated Favorite Channels function.

11. LCD Display:

The lighted LCD display shows the current channel name, number, or frequency, along with battery status and other indicators. It is designed for readability in various lighting conditions.

12. Configurable Keys:

The two side keys and one top key can be configured for various functions, such as fast AM/FM switching or activating the built-in flashlight. Refer to the full owner's manual for customization options.

MAINTENANCE

- **Cleaning:**

Wipe the radio's exterior with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners. Ensure the USB-C port cover is securely closed to maintain water resistance.

- **Battery Care:**

To prolong battery life, avoid fully discharging the battery frequently. Recharge the battery when the low battery indicator appears. Store the radio and battery in a cool, dry place when not in use for extended periods.

- **Water and Dust Resistance:**

The KG-S72C features IP65 dust and water resistance. While it is protected against dust ingress and low-pressure water jets, it is not designed for submersion. Always ensure all port covers are sealed when operating in dusty or wet environments.

TROUBLESHOOTING

If you encounter issues with your Wouxun KG-S72C, consider the following common troubleshooting steps:

- **Radio does not power on:**

Check if the battery is properly installed and fully charged. Ensure the power/volume knob is rotated clockwise to the 'on' position.

- **No reception or poor audio:**

Verify the antenna is securely attached. Check the volume level. Ensure you are on an active channel. The squelch level might be set too high; try using the monitor function.

- **Cannot transmit or poor transmission range:**

Ensure the PTT button is fully pressed. Check the battery level, as low battery can affect transmit power. Verify the antenna connection. Ensure you are on a clear channel and within range of the receiving station. Check the power selectivity setting (High/Low).

- **Display is blank or unreadable:**

Adjust the display brightness if available. If the display is completely blank, try restarting the radio or recharging the battery.

For more detailed troubleshooting or issues not covered here, please refer to the comprehensive owner's manual or contact Wouxun customer support.

SPECIFICATIONS

Feature	Specification
Model Number	KG-S72C
Brand	Wouxun
Item Weight	1.25 pounds
Package Dimensions	7.65 x 7.3 x 3 inches
Battery Type	1 Lithium Ion battery (included)
Battery Capacity	2000mAh
Charging Port	USB-C
Number of Channels	40 CB channels, 400 customizable memory channels
Frequency Range	26.965 MHz - 27.405 MHz
Transmit Power	Up to 2 watts AM, 4 watts FM
Water Resistance Level	IP65 (Dust and Water Resistant)
Audio Connector	Kenwood 2-Pin (K1)
ASIN	B0CDP37FMX
Date First Available	August 4, 2023
Manufacturer	QUANZHOU Wouxun Electronics Co., Ltd

WARRANTY INFORMATION

The Wouxun KG-S72C Portable Handheld AM/FM CB Radio comes with a **one-year manufacturer warranty** from Wouxun. This warranty covers defects in materials and workmanship under normal use. Please retain your proof of purchase for warranty claims.

For specific warranty terms and conditions, refer to the detailed warranty statement included with your product or visit the official Wouxun website.

CUSTOMER SUPPORT

Should you require technical assistance, have questions about your radio's operation, or need to inquire about warranty service, please contact Wouxun customer support. Contact information can typically be found on the official Wouxun website or in the full owner's manual provided with your product.

When contacting support, please have your product model number (KG-S72C) and purchase details readily available.

Fareday bags protect your radios from EMP damage and more

Introducing the new Fareday bag, designed to keep your radios safe from electromagnetic pulse (EMP) damage for emergency comms as one of our EMP protection. How do you protect your radios and other valuable items from Electromagnetic Pulse (EMP) damage and Electrostatic Noise (ESN) attacks? The general answer to this is to store them in a Faraday Cage. But where do you get one? After considerable research, here we add a solution. [Read More](#)

The XLT HS000HM headset is made for safety helmets and hard hats

A standard free way radio headset is difficult to wear with a hard hat, and most headsets will fail in a work environment due to all of those. The problem is finding one on the way most head hat can accommodate a helmet and hold it up for the entire shift. The XLT HS000HM has built-in ear hooks and an adjustable level of comfort. Unless, of course, you have the HS000HM Heavy Duty Dual Mount bracket from KLT. The XLT HS000HM is designed and built specifically for the use with hard hats and safety.

Announcing the Kenwood KG-572C Handheld AM/FM CB Radio!

CB radio as a service has changed a lot since creation in 1948. During this time, there have been a number of significant changes to the rules. The latest occurred on October 2001, when the FCC added CB radios to operate using Frequency Modulation (FM). With these changes, one could think the radio became obsolete. However, they were not. And exactly. With very few exceptions, the questionnaire CB has been somewhat silent at times. Very little activity, sometimes between the years 1950 and 1960. For the most part, the average CB user of today is pretty much the same as it was 20 years ago. That's why we have [RadioBuy](#).

DECLARATION OF SIMILARITY

Dear Sir or Madam:

We, Quanchuo Wuxuan Electronics Co., Ltd., hereby declare that the product:
TWO VOLT RAD2008/8182A, FCC ID: W97WU040123, models as
following:
RG-872CX, RG-872C-01, RG-872C-0R, RG-872C Plus, RG-872C Limited
Edition, RG-872C, RG-872C are electrically identical with the model
RG-872C which was tested by MPT Technology (Suzhou) Co., Ltd with the
same electromagnetic emissions and electromagnetic compatibility
characteristics.

A description of the differences between those models and that are declared
similar are as follows:

Those are the similar products with the same design and mainboard, and just
the different model names and Plastic Enclosure.

Please contact me should there be need for any additional clarification or
information.

Best Regards,

Signature:
