GAPPO G4398/Granite

GAPPO Kitchen Faucet User Manual

Model: G4398/Granite (Product ID: 5c7bf50e-4c3e-4844-a08c-5024d7a803a9)

Brand: GAPPO

1. PRODUCT OVERVIEW

The GAPPO Kitchen Faucet with Pull Out Sprayer is designed for modern kitchens, offering convenience and durability. This single-handle faucet features a pull-out sprayer with multiple water modes and a magnetic docking system for secure retraction. Constructed from high-quality copper, it is built to prevent rusting and ensure long-lasting performance.

Key Features:

- **Magnetic Docking:** Ensures the sprayer head securely retracts and stays in place.
- **High-Quality Material:** Made of copper to effectively prevent rusting and ensure durability.
- **Adjustable Smart Handle:** Single handle operates with a 90-degree forward rotation for precise water temperature and flow control.
- **Versatile Sprayer:** Offers stream, spray, and filtered water modes.
- **360-Degree Swivel:** Provides full sink access and flexibility.

2. SETUP AND INSTALLATION

This faucet is designed for single-hole deck mount installation. Professional installation is recommended. Before beginning, ensure you have all necessary tools and components.

Pre-Installation Checks:

- Verify your water supply lines are compatible with 3/8" connectors. Adapters (1/2" to 3/8") may be required if your supply lines are 1/2".
- Ensure sufficient clearance under the sink for hose connections and tightening.

Installation Steps (General Guide):

1. Turn off the main water supply.

2. Remove your old faucet, if applicable.
3. Insert the new faucet into the sink hole.
4. Secure the faucet from underneath the sink using the provided mounting hardware.
5. Connect the hot and cold water supply lines to the corresponding inlets on the faucet. Ensure these connections are tight to prevent leaks. Note: The hoses connected to the base of the faucet inside the body can be challenging to tighten due to limited space; a small needle-nose pliers bent at 90 degrees may assist.
6. Connect the pull-out sprayer hose.
7. Attach the counterweight to the pull-out hose to ensure proper retraction.
8. Turn on the main water supply and check for leaks.

3. OPERATING INSTRUCTIONS

The GAPPO Kitchen Faucet is designed for intuitive and efficient operation.

Water Flow and Temperature Control:

- The single lever handle controls both water flow and temperature.
- Lift the handle to increase water flow.
- Rotate the handle 90 degrees forward (away from the user) to adjust temperature: rotate left for hot water, right for cold water.

Pull-Out Sprayer Operation:

- Gently pull the sprayer head from the spout to extend the hose.
- **Magnetic Docking:** When finished, guide the sprayer head back towards the spout. The magnetic docking system will securely pull it into place.

Figure 3.1: Magnetic Docking System

Water Modes:

The sprayer head offers three distinct water modes:

- **Stream:** For filling pots and general washing.
- **Spray:** For rinsing dishes and cleaning the sink.
- **Filter:** Provides filtered water (requires connection to a separate filtration system, not included).

WHY CHOOSE US?	
	
GAPPO	Others
✔ 2in1 Modern Kitchen Faucet	✗ Filter Faucet+Kitchen Faucet
✔ 360 Degree Swivels	✗ Unable to rotate
✔ Magnetic Docking	✗ Traditional Functions
✔ Safe & Lead Free	✗ Cheap Materials

4. MAINTENANCE

Regular maintenance will help preserve the appearance and functionality of your GAPPO Kitchen Faucet.

Cleaning:

- Clean the faucet regularly with a soft cloth and mild soap.
- Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the polished finish and copper material.
- Wipe dry after cleaning to prevent water spots, especially on the polished granite finish.

General Care:

- Periodically check all connections for tightness to prevent leaks.

- If water flow decreases, the aerator in the sprayer head may need cleaning. Unscrew the aerator and rinse away any debris.

5. TROUBLESHOOTING

If you encounter issues with your faucet, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Water leaks from connections	Loose connections or damaged O-rings/washers.	Ensure all supply line and hose connections are securely tightened. Replace O-rings or washers if damaged.
Reduced water flow	Clogged aerator or debris in water lines.	Unscrew and clean the aerator in the sprayer head. Flush water lines before reconnecting.
Sprayer head does not retract fully	Counterweight is obstructed or improperly positioned.	Check under the sink to ensure the counterweight on the pull-out hose is not obstructed and can move freely. Adjust its position if necessary.
Handle becomes loose	Set screw on the handle is loose.	Locate the set screw (usually on the side or back of the handle base) and tighten it with an appropriate Allen wrench.

If the problem persists after attempting these solutions, please contact GAPPO customer service for further assistance.

6. SPECIFICATIONS

Attribute	Detail
Brand	GAPPO
Model Number	G4398/Granite (5c7bf50e-4c3e-4844-a08c-5024d7a803a9)
